## PREFACE

History always recalls National Census as one of the greatest achievements of any ruler who accomplishes it, precisely because it presupposes vision, systematic planning and sincere dream for sustainable development of his or her kingdom.

2012 was a milestone in the annals of the Latin Archdiocese of Trivandrum which celebrated its Platinum Jubilee that year. One of the important events which added colour and grandeur and substance was the socio-economic, pastoral and civic survey of the Archdiocesan population. Though the diocese was not new to such surveys, the present one was special with its coverage and depth. It was this bold decision and constant encouragement of Archbishop Soosa Pakiam that enabled us to fulfill such a satisfying, though hard and challenging, task with commendable output.

Preliminary discussions of the survey began in the beginning of 2011. There were many who enriched us to shape the survey format with solid support. The following ones deserve special mention of thanks: Fr. E.J. Thomas S J, Fr. Joye James S J, Dr. Irudayaraj, Dr. Charles Leon, Dr. Biju and Msgr. Eugine H. Pereira. It was also placed before the Diocesan Senate and other relevant Archdiocesan platforms, besides the directors of different ministries in the Archdiocese. A sample survey was carried out at Kochuthura, Nettayam and Thope during February - March, 2011. The format for data collection was presented in the Presbyterium held on 23rd August, 2011 along with the sample survey results. Suggestions were incorporated therein.

A Training of Trainers (ToT) was organized at the diocesan level on July 17th and 23rd 2011, for personnel such as the parish BCC coordinators, animators of various ministries and other parish representatives on the methodology of enumeration. They functioned as a resource team for training the enumerators at the villages. By the end of July, parish level training was completed. The field level survey was completed in five months starting from the month of August 2011. Some 2050 people were involved in the enumeration. From September 2011 onwards parishes began sending the completed survey forms. The commendable efforts of the parish priests, parish councils and other teams deserve a word of appreciation and thanks. Meanwhile, a new software was developed on VB.Net with Mysql for data entry and report generation. It is flexible enough to generate any combination of options. This parish/user-friendly software would not have been materialized but for the hard work and skills of Adv. Justus who deserves special thanks and it is joyfully recorded here.
Data entry which begun in November 2011 took almost eight months to complete. 39 people at different locations and times committed themselves to make it a reality. Though the names of all the members involved in the data entry are impossible to be mentioned here, the names of Mrs. Dayana, Mrs. Mercy, Miss. Jimmy Mole, Mr. Nandu, Mr. Sumesh, Bros. Ajith, Shijin, Immanuel, Marthoma and Lawrence can not go without mentioning. Their committed efforts are thankfully remembered here. Sr. Mary Vaz, the BCC office secretary, along with the animators and staff of BCC made all efforts needed to coordinate the entire process of data collection and entry. They together do deserve gracious thanks.

On 1st July 2013, the day of the Platinum Jubilee celebration, we could release the forane-wise family directory before the public which represented the source of this data base. After clearing errors the final data and its results were presented in the Presbytarium on 14th August, 2012 and priests were introduced to the use of the software. This introduction was given for the parish - forane representatives also.

The complete data were then handed over in November 2012 to ADHWANA, a State Level professional NGO, in order to bring out the report of the survey with the findings and recommendations. The volume in your hands with lot of information in tables and charts, along with analysis, findings and recommendations generated from the
supplied data is the result of sustained hard work of Dr. J. Mary John and his team of experts and staff. A big thanks to them. A special word of appreciation and thanks is due to SKETCH TRICKS for accomplishing the designing and printing works beautifully. We are indeed indebted to the Fr. Lenin Raj, the Secretary and Director, Trivandrum Social Service Society and to his staff in extending all possible supports throughout the process of survey, besides the financial assistance to carry out this task constraint- free.

Archdiocesan Synod, one of the great events of the Platinum Jubilee, discussed and suggested plans on various sectors and fields of activities. Further planning in detail, taking into account the ground realities of the parish communities needs to be done, yet. The plan will be SMART plan: Specific, Measurable, Achievable, Realistic and Time-bound. The survey and the report generated certainly will have its impact on that. The Report may serve as a historical data on our diocesan community and can form basis of comparison for future social analysis and planning, whenever necessary.

However, the findings of this survey shall better be used with constant and serious inputs from people's active participation at all levels of interventions- parish, forane and Archdiocesan. It is our modest expectation that it forms the basis for future planning.
We, the members of the Survey Team, take this opportunity to thank you, one and all for your share in making this a reality for the service of our valiant people who dare even the elements for sustenance and survival.

## Survey Coordination Team

## FOREWORD

"To know thyself is the greatest knowledge". The aims of "Latin Archdiocesan survey 2011" are: to know our Archdiocese in a better way; to know our strengths and weaknesses; to know the exact population; to situate ourselves with other communities; to find the areas of our development; to focus our ministries to the real needs of people. This is an eye opener to all members of our Archdiocese. The survey results reveal what we are and where we are today after 75 years of journey as a faith community rooted in Jesus and his principles.
"Latin Archdiocesan survey 2011" attempts also a study of each individual family and person in our Archdiocese. This effort taken in view of reaching substantiated inferences about our community has now reached to the present stage through expert guidance, participatory and collective action and thought, group discussions, well designed interview schedule, effective training sessions, tedious home- to- home data collection, tailor-made software preparation, patient data entry and intelligent data analysis-interpretation and high standard of organizing various factors.

This survey reports are arranged in two levels, namely Archdiocese-Forane level and Forane-Parish level. This is a very helpful tool for the decentralized planning in our Archdiocese which is a key principle of our first synod. Different ministries and commissions have to make use of this survey analysis for their entire planning of the ministry and could reflect in the annual plan and budget at least for the next 5 years. The forane which has regional preferences and priorities should make use of these survey findings for their long and short term planning of various ministries and concerns they face. As pastors and leaders of the community, they should make use of these results and analysis for their parish ministry. The parish councils, finance councils and other bodies in the parishes have to see their priorities and levels of different areas and should make efforts to improve them by planning and executing different programs for the target groups.

I sincerely appreciate this great task and all the persons who toiled to make this dream a reality. We are on our way to an improved situation not only in terms of our socio-economic progress but also in terms of our skills to understand the reality.

I love to state here that undertaking such an exercise should not be stopped with this one. At the completion of every tenth year, a similar exercise has a more relevant space in the process of updating the information. I once again appreciate each and every one behind this great achievement.

## THIRUVANANTHAPURAM LATIN ARCHDIOCESE. HISTORICAL BACKGROUND

## Introduction

Christianity claims its presence in Kerala since the $1^{\text {st }}$ century itself. Its inception was supposed to be by 52 AD with the arrival of St. Thomas, the Apostle, in this land. However, a historical study of Christian community in Kerala forgetting the services of foreign missionaries, who sacrificed their lives to promote social justice among the people of this land, who were suppressed and depressed under the then prevailing untouchability and colour discriminations, may perhaps be incomplete.

## Origin of Christian Community

In the past, Quilon was a prominent and predominant commercial centre of Travancore. Even before the merchants from western countries came to Travancore for their trade and commerce, the missionaries from Europe visited Travancore to propagate the Good News of Jesus, the Christ. Marcopolo, a famous traveler from Venice, who visited Quilon in the year 1292 AD has engrossed that there was a Christian community in this land. The seeds of faith, sown by the Franciscans and Dominicans, which were confirmed and strengthened by St. Francis Xavier, the Jesuit, and his followers, resulted in the formation of Christian communities along the coastal area of the erstwhile Travancore.

Pope John XXII, by a Decree "ROMANUS PONTIFIX" established the Diocese of Quilon in the year 1329, which became the first diocese in India. The writings of St. Francis Xavier mentions places such as Vizhinjam, Karumkulam, Puthiyathura, Pulluvila, Kollamcode, Vallavila, Thoothoor, Puthenthura, Thengappattanam, Inayam, Midalam, Vaniyakkudi, Kulachal, Kadiyappattanam, Muttom, Pallom, Manakkudi. The areas from Kulachal in the south to Adimalathura in the north were under a vicariate as recorded by Fr. Valithano, a Jesuit Missionary. There are evidences that Christian communities were existing at Mampally and Roitora even prior to the arrival of Francis Xavier.

## Formation of Trivandrum Latin Diocese

By $17^{\text {th }}$ century the Carmelite Missionaries landed in India. In 1898 , when Rt. Rev. Dr. Aloysious Maria Benziger was the Bishop of Kollam, the Carmelite Missionaries from Belgium resorted at Travancore and concentrated on mission works. Their mission area covered the present dioceses of Kollam, Punalur, Thiruvananthapuram, Neyyatinkara and Kottar which were part of the Diocese of Kollam. In 1930 Kottar diocese came into existence. In 1937 Pope Pious XI by a Decree "IN ORA MALABARICA" established the Trivandrum Latin Diocese by bifurcating the Kollam Diocese. The revenue Taluks of Chirayinkeezh, Thiruvananthapuram, Nedumangad and Neyyattinkara were placed under the jurisdiction of Trivandrum diocese. In 1952 the coastal parishes from Pallithura to Erayimmanthura were de-linked from Cochin Diocese and attached to the Diocese of Trivandrum.

## Bishops on Service

On formation of Trivandrum Diocese Rt. Rev. Dr. Vincent Dereira, the then Bishop of Kollam was appointed as the

#### Abstract

$1^{\text {st }}$ Bishop of Trivandrum Diocese. During his tenure the catholic population in the diocese increased to around three Lakhs and in the educational sector there were 63 primary schools, 28 U.P schools, 15 High Schools, 2 Training schools and 3 Colleges. Rt. Rev. Dr. Peter Bernard Pereira, who followed Bishop Vincent Dereira was the first Bishop from the soil and his tenure was from October 1966 to June 1978. Bishop Pereria lighted the lamp for many social developmental activities in the diocese. One of such is Marianad Community Development Programme. Trivandrum Social Service Society, a registered social service society is a pioneering initiative of Bishop Pereira. The Indian Space Research Organisation at Thumba was made possible because of the visionary intervention of Bishop Pereira. It was during his time that the land base for the future development of Trivandrum diocese was created.

Bishop Peter Bernard Pereira was succeeded by Bishop Jacob Archaruparambil OFM Cap, who was in service from October 1979 to 1990. It was during his period that the historical event of Kottar Living Together took place in the Golden Jubilee year of the diocese which gave new outlook to the diocese as a Participatory Church and the Church as the People of God by inculcating the vision of II Vatican Council. In the year 1990 Bishop Soosa Pakiam took charge of the diocese. Tremendous achievements both in the spiritual as well as social arenas have been made in the diocese during the past 23 years. Decentralization and participation were the basic principles adopted in every stage of administration in the Local Church.

## Bifurcation of the Diocese and Elevation as Archdiocese

In 1996 Trivandrum diocese was bifurcated and a new diocese came into being - Neyyatinkara Diocese. Thus the area of Thiruvananthapuram diocese was reduced to 686 sq. k.m. which encompassed the areas from Ayiroor of Chirayinkeezh Taluk in the north to Erayummanthurai of Vilavancode Taluk of Kanyakumari Dist in the south. A major portion of Trivandrum diocese is located along the coastal belt with six foranes, which extends to about 76 k.m in lenth. There are two foranes in the interior.

In the year 2004 Pope John Paul II was pleased to elevate Trivandrum diocese as an Archdiocese with Alappuzha, Kollam, Punalur and Neyyatinkara as its suffragent dioceses. Bishop Soosa Pakiam was elevated as the Archbishop of this ecclesiastical region.

## Renewal Process in the Diocese

The general observation is that the socio-economic, educational and political situation of the people of our diocese is not very impressive and the available statistics shows that they are far behind many of the other communities in Kerala. Diocese has adopted many strategies over the years to lift the community to the mainstream according to the need of the time. Especially community building that took place after the 'Kottar Living Together' and the structural and functional changes evolved in the diocese have contributed much to its growth.
There are several parishes (80) and sub-stations (43) working as the arms of the Archdiocese to implement, inter alia, the socio-economic-pastoral and educational activities with the people. Basic Christian Communities (BCCs) have been formed in all the parishes and sub- stations in order to enhance and sustain the active participation of the people and decentralization of the ministries. Pastoral ministry touches the pastoral and spiritual life of the people through the commissions of Bible, Catechism, Liturgy, Family Apostolate, Evangalization, Ecumenism and Dialogue.
In the educational sector there are 5 Higher Secondary Schools, 2 High Schools, 4 U.P Schools, 17 L.P Schools, 1 CBSC School and one Centre for Excellence, one Engineering College, one Nursing College, one ITC and one B.Ed College under the Archdiocesan management. Other than this there are 19 schools under the direct control of parish managements and 25 schools under the management of the religious and 4 schools under the Trusts of Latin Catholic lay people.

Social action ministry steered by Trivandrum Social Service Society has five departments such as (1) Capacity building, (2) Advocacy, Policy Lobbying and Net-working, (3) Socio-economic development and employment, (4) Health, environment and education and (5) Administration and Research. The activities are carried out through
various community based-organizations (forums) and institutions. There are 6 forums and 11 institutions under Social Action Ministry taking care of various target groups.

Other relevant activities of the Archdiocese are carried out through the Board for Clergy and Religious, Board for Temporalities, Board for Evangelization and Board for Laity. There are other autonomous ministries such as BCC, Youth Ministry, Media and Fisheries.

## Conclusion

The present survey is the first of its kind in terms of the preparations undertaken for execution, wide coverage of all Parishes and Foranes of the Archdiocese, inclusion of major socio-economic and pastoral subjects, the systematic conduct and team work and involvement of professional experts in various stages. The task and the results of this program are considered as one of the milestones in the annals of the archdiocese of Trivandrum. If this survey and its finding could be instrumental for various ministries to bring out certain remarkable changes in the growth of the People of God in our local church, that will certainly open up for a new horizon in the path of development and building up of the Kingdom of God.

Sex-wise participation in Confession among the members of the age group above 60 years

## CHAPTER 1

## INTRODUCTION

## Context

The Latin Catholic Archdiocese of Trivandrum was established in 1937. Half a century has elapsed under four Prelates. The Golden Jubilee Celebrations offered a good opportunity for reflection on the current status as well as future possibilities of the Diocese. Naturally the importance of developing socio-economic as well as pastoral profiles of the population, parishes, Foranes and the Archdiocese as a whole was keenly felt. After weighing the pros and cons as well as considering the modalities to be adopted, it was decided to do a comprehensive and integrated census survey, covering the entire families and individuals of the Archdiocese.

## Goal/Overall Objective of the Survey

The ultimate goal of the Census survey was to ensure that Archdiocesan, Forane and parish level socio-economic and pastoral planning processes are made more specific, measurable, achievable, realistic and time bound (SMART) and based on empirical data.

## Specific Objectives

- To collect/generate comprehensive and reliable data bearing on all aspects in the socio-economic and pastoral life of the families and individuals in the Archdiocese
- To prepare and bring out separate reports for each forane and a consolidated report of the entire Archdiocese, containing the findings of the survey.

## Data Base

All Latin Catholic families who were members of the Parishes belonging to the Latin Archdiocese of Trivandrum (hereinafter called Archdiocese) consisted of the data base for the survey

## Source of data

The source of data used for this report was the census survey conducted by Trivandrum Social Service Society (TSSS) during the 2011-2012 period.

## Geographical Coverage

The survey tried to cover all the Latin Catholic families who were members of 115 Parishes in 8 Foranes in the Archdiocese. The names of Foranes and corresponding number of parishes covered in the survey are given in the table below:

## Foranes and number of parishes covered in the survey

| SI. No | Foranes | No of Parishes including <br> sub-stations |
| :--- | :--- | :--- |
| 1 | Thoothoor | 8 |
| 2 | Pulluvila | 15 |
| 3 | Kovalam | 14 |
| 4 | Valiyathura | 10 |
| 5 | Pettah | 19 |
| 6 | Palayam | 19 |
| 7 | Puthukurichy | 19 |
| 8 | Anchuthengu | 10 |
|  | Total | 114 |

## Demographical Coverage

The Survey covered 58501 families and 217821 individuals with 112287 males ( $51.55 \%$ ) 105534 females ( $48.45 \%$ ) in 8 foranes.

## Sectoral Coverage

The survey covered several important and relevant sectors and subjects and collected data on families and their members. The following table shows the family-based and individual-based data collected on various areas and subjects.

Areas and subjects covered by the Survey

| Sectors | Subjects |  |  |  |
| :--- | :--- | :---: | :---: | :---: |
| A. Family-based data |  |  |  |  |
| Housing | Ownership of House |  |  |  |
|  | Type or Quality of House |  |  |  |
|  | Number of rooms in the house |  |  |  |
|  | Number of families living in the house |  |  |  |
|  | Number of members living in the house |  |  |  |
|  | Ownership/possession/ occupation of land |  |  |  |
|  | Area of own land |  |  |  |
|  | Gender distribution of land ownership |  |  |  |

| Energy consumption |  |
| :---: | :---: |
| Other assets ownership | Ownership of home appliances |
|  | Ownership of vehicles |
|  | Subscription to media and publications |
|  | Fishing equipments |
|  | Other work equipments |
|  | Commerce and industry |
|  | Agriculture |
|  | Family Expenditure |
|  | Debts |
| Possession of ration cards |  |
| APL/BPL |  |
| Coverage of Health Insurance |  |
| Sanitation facilities |  |
| Water for domestic use | Source |
|  | Drainage |
| Solid waste disposal | Destination |
| Children's Education | Study facilities |
|  | Parents' monitoring |
|  | Community support to education |
| Faith/Parish life | Availability of POC Bible |
|  | Family prayer |
|  | Participation in BCCs |
| Occurrence of Death |  |
| B. Data on individual members in the family |  |
| Sex distribution |  |
| Relation ship |  |
| Blood group |  |
| Marital status |  |
| Stages in life |  |

| Education | Levels |
| :---: | :---: |
|  | Medium of study |
|  | Subjects studied |
|  | Type of educational institutions accessed for studies |
| Employment and labour | Area of employment and labour |
|  | Positions in employment and labour |
| Health | Diseases |
|  | Bad habits |
|  | Disabilities |
| Involvement in Church/ Civil society organizations |  |
| Faith life | Participation in Holy Mass |
|  | Catechism |
|  | Sacrament of Reconciliation |

## Data collection process

Having decided on the geographical, demographical, sectoral and subject-wise coverage, a specific interview schedule corresponding to the areas and subjects was framed by the Archdiocesan team as the main tool for collection of data. Keys and supporting notes were made and sufficient copies were printed. Simultaneously, investigators for data collection were identified by the Parishes at the BCC level under the guidance of the Archdiocesan survey team. Subsequently, trainings were conducted to impart necessary knowledge and skills to the enumerators identified for data collection. Under the direct monitoring of the Parish Priests, the enumerators collected data from the families at the BCC unit level in the parishes.

Data collection involved 2050 persons and took 6 months to cover the entire area. During the process, frequent visits and interactions were made by the survey team.

## Data processing

The data thus collected in printed schedules were sorted out and minor errors were rectified. The entire data were then entered into a tailor-made SOFT WARE so that the outcome of the survey could be directly accessed by the parish priests to understand the profile and situation of each and every family in the Parish. Subsequently, it was decided to prepare a consolidated survey report which could be of immense support for multi-level planning processes in the Archdiocese for a reasonable period of time.
Accordingly, data entry was completed with the support of a team of technical personnel and a directory of families was released based on it. Finally, the work of tabulation and analysis of data together with the task of report formulation at the Forane and diocesan levels was entrusted with a State level specialized agency, ADHWANA. After tabulation of the entire data at the Forane and diocesan levels, interpretation and analysis of the data were completed. Forane-wise reports were separately prepared for 8 Foranes and an Archdiocesan report was prepared at the end. During this process, series of discussions took place with the Survey Coordination Team.

## The Reports

Each report is organized into three chapters. This first chapter deals with context and methodology of the entire process of the census survey. The second chapter presents the data processed in interpretative narration with charts or tables, hinting on the findings and implications of the information. Where ever relevant, sex-wise and age-wise analysis was attempted. In the third chapter, a summary of findings, related conclusions and some recommendations are given. The recommendations are meant to provide a space for more thinking to address the problems reflected in the survey findings. However, it is for the concerned communities to collectively plan appropriate programs to address their issues in a meaningful manner.

In all cases, original tables are given in the Annexure, while charts and summary of some tables are included within the report at appropriate place.

## Limitations of the Survey

- Though it was planned to cover the entire families and all the parishes in 8 Foranes in the Archdiocese, the coverage is subject to further verification with other sources of information such as Parish records.
- The usual data collection errors crept into the data to a small extent. The enumerators were mostly raw persons without prior experience in the job.
- Data requirement on a large number of subjects was not fully responded in several sectors and no data was available on those subjects.
- It was also found that some of the data available were not tallying with other related data, may be, due to differences in understanding the questions from the part of the interviewers and respondents.
- Since there were no earlier reliable reports or statistics corresponding to the regions and subjects covered by this survey, the analysis could not be carried out by comparing or contrasting with the past situation.

## Scope of the Survey

- In spite of the above limitations, which one has to expect in any such large process, the present survey has brought forth a very high level of qualified and quantified information useful for planning in sectors and localities covered in the survey
- It brought forth conclusions and recommendations which could be followed up by the Archdiocese in the near future through its various Ministries and Commissions.
- It provides reasonable insights for other dioceses to take up similar processes for planning
- The tables annexed to this report at the end will help individual parishes to find their situation and plan their programs accordingly.

## Latin Archdiocese of Trivandrum

Latin Archdiocese of Trivandrum consists of 8 ecclesiastical regions or Foranes. Though most of the regions are coastal areas, a substantial portion of the Archdiocese is interior. These areas may have an influence on the total picture of the socio-economic status of the entire population and families. A historical overview of the Archdiocese is given in the preliminary pages of the report.

## Chapter 2

## PRESENTATION OF DATA

Having completed the separate reports of eight regions/Foranes, the present report is a consolidated narrative of the data on the entire families and individuals of the Latin Archdiocese of Trivandrum, covered by the socioeconomic survey conducted in 2011-2012. It is the first of its kind in the 75 year history of the Archdiocese in terms of its geographical and subject coverage, size of data collected, number of volumes, comprehensiveness of the report and the vision behind it. Here in this chapter, an attempt is made to narrate the socio-economic and pastoral situation highlighting the important findings in view of the objectives for which this massive exercise was carried out. The report is organized as two sections, one for the family-related data and the other for the individual-related data. The sequence followed in the collection of data is kept in the narrative in order to help the readers to refer back to the source of the data.

## SECTION ONE: Families

According to the processed data relating to the eight Foranes in the Latin Archdiocese of Trivandrum, the total respondent families are $58501^{1}$. The total respondent population is $217821^{2}$ with 112287 ( $51.55 \%$ ) males and $105534(48.45 \%)$ females. In terms of number and percentage of families, Pulluvila forane is the biggest with 13107 families ( $22.40 \%$ ), followed by Thoothoor Forane with 10004 families ( $17.10 \%$ ) and Valiyathura forane with 9122 families ( $15.59 \%$ ). In terms of number and percentage of individuals or members of the respondent families, the same ranking is observed with Pulluvila (48986) holding the first place, Thoothoor in the second place (38791) and Valiyathura (32331). Pettah is the smallest forane in terms of number of families (2485-4.25\%) and individuals (8876-4.06\%).

| Name of the Forane | Families <br> Frequency | $\%$ | Individuals <br> frequency | $\%$ |
| :--- | :--- | :--- | :--- | :--- |
| Anchuthengu | 5095 | $8.71 \%$ | 19787 | $9.04 \%$ |
| Puthukurichy | 7736 | $13.22 \%$ | 28191 | $12.88 \%$ |
| Pettah | 2485 | $4.25 \%$ | 8876 | $4.06 \%$ |
| Palayam | 3610 | $6.17 \%$ | 12666 | $5.79 \%$ |
| Valiyathura | 9122 | $15.59 \%$ | 32331 | $14.78 \%$ |
| Kovalam | 7342 | $12.55 \%$ | 28193 | $12.88 \%$ |
| Pulluvila | 13107 | $22.40 \%$ | 48986 | $22.39 \%$ |
| Thoothur | 10004 | $17.10 \%$ | 38791 | $18.18 \%$ |
| Total | 58501 | $100.00 \%$ | 217821 | $100.00 \%$ |

[^0]
## Family-wise distribution of forane in the Diocese

## HOUSING

## Ownership of houses

Ownership of a house by a family is considered as the most basic asset for progress and so the most important indicator for sustainable development, socio-economic status, rootedness, identity and long standing relationships. The subjects covered in housing sector were ownership of houses, type or quality of houses, number of rooms in the house and number of families living in a house. 'The homeless' is defined as those who do not have a house and so live with their parents, siblings, relatives or friends.
Table No 1 deals with ownership of houses in the Latin Archdiocese of Trivandrum. The concept of ownership in this survey included real ownership, possession and occupation of a house. It is noted that a majority of the families have own house ( $68.21 \%$ ), while a sizeable section is homeless ( $22.07 \%$ ). A few families live in rented houses (5.64\%). (Chart No. 1)

Chart No. 1: Ownership of houses

Across the Foranes, Thoothoor forane tops the list of those who have their own house $(70.21 \%)$, followed by Pulluvila ( $69.40 \%$ ) and Palayam (69.39\%). In the case of homeless families, Kovalam Forane leads with $26.45 \%$, followed by Thoothoor (24.55\%) and Pulluvila (24.12\%).

## Type or quality of houses

Table No. $\mathbf{2}$ presents the type or quality of houses owned or possessed or occupied by the families who reported that they had their 'own' houses. Type or quality indicates the financial status of the owner. The largest section of families in the Archdiocese live in concrete houses (38.64\%) followed by those who live in sheet roofed houses $(13.11 \%)$ and tiled houses ( $11.09 \%$ ). Quite a number of families live in thatched houses $(5.02 \%)$. While $2.03 \%$ of families live in huts, several families live in multistoried houses (4\%). This concern is not applicable to the homeless families. (Chart No. 2)

Chart No. 2: Type or quality of houses

Looking at the Foranes, Anchuthengu forane has the largest percentage of families living in huts (3.98\%), followed by Pulluvila $(2.38 \%)$ and Puthukurichy ( $2.29 \%$ ). In the case of families living in thatched houses, Anchuthengu Forane $(9.99 \%)$ has the largest percentage, followed by Puthukurichy ( $7.30 \%$ ) and Pulluvila ( $7.22 \%$. At the same time, Pettah forane has the largest percentage of families living in concrete houses ( $46.60 \%$ ), followed by Palayam ( $46.57 \%$ ) and Puthukurichy ( $43.05 \%$ ). Thoothoor forane has the largest percentage of families living in sheetroofed houses (20.19\%), followed by Kovalam (16.29\%) and Pulluvila (13.53\%). Pettah forane has the distinction of maximum proportion of families living in multistoried houses, while Palayam tops in the matter of families living in flats (3.46\%).

## Number of rooms in the houses

An analysis of the number of rooms in the houses surveyed in the Foronate is given in Table No.3. Number of rooms in the house indicates the size of the house and financial situation of the house owner. A simple majority of families ( $52.15 \%$ ) has houses with 1-4 rooms, while others have bigger houses with more than 4 rooms (19.59\%). $5.84 \%$ did not provide any information in this regard. (Chart No. 3)

Chart No. 3: Number of rooms in the houses

Glancing across the Foranes, it is found that Anchuthengu forane tops the list of houses with 1-4 rooms (53.90\%), while Pettah forane leads those with more than 4 rooms ( $33.40 \%$ ).

## Number of Families accommodated in a single house

Number of families living in single household is an indication of congested life without proper personal privacy. This may also indicate the presence of joint families in the Archdiocese. Table No. 4 presents the number of families accommodated in a single house. Single families are accommodated in majority of the houses ( $55.24 \%$ ). A sizeable percentage of houses have 2 families ( $18.42 \%$ ), while $4.26 \%$ of houses have 3 families living in them. Some houses accommodate even more than 3 families (0.89\%). (Chart No.4)

Chart No. 4: Number of Families accommodated in a single house

In the forane level analysis, largest percentage of houses accommodating one family each is found in Pettah forane $(70.50 \%)$, while largest percentage of houses accommodating 2 families each is found in Valiyathura forane ( $20.99 \%$ ). Thoothoor has the largest percentage of houses accommodating 3 families each ( $5.05 \%$ ) and more than 3 families each (1.16\%).

## The accommodation pattern of individual members in houses

The accommodation pattern of individual members of families in the available houses is reflected in Table No.5. Largest section of households accommodate 1-4 members ( $46.24 \%$ ), followed by those households having 5-8 members (29.04\%) and those having more than 8 members (4.10\%) (Chart No. 5).

Chart No. 5: The accommodation pattern of individual members in houses

Looking across the Foranes, the largest section of households accommodating 1-4 families is found in Palayam Forane ( $65.68 \%$ ), closely followed by Pettah ( $64.02 \%$ ). In the case of households accommodating 5-8 members, Thoothoor stands first with $33.62 \%$. At the same time, in the matter of households accommodating more than 8 members, Kovalam leads with $5.56 \%$.

## LAND

This section deals with ownership, possession and occupation of land by the families, area-wise and sexwise distribution of ownership/possession/occupation. It is found that the terms, 'ownership', 'possession' and 'occupation', are used interchangeably to mean that the land is currently utilized by the respondent families. It can be understood merely as control over the land under their occupation. Land is the most basic asset and its ownership indicates financial base, social status, pre-requisite for progress in future.

## Ownership/ Possession and Occupation of various nature of Land

According to the data given in Table No.6, (Chart No.6), in the Archdiocese, 61.15\% of the families have their own land, while $20.16 \%$ of families are landless. While quite a number of families live in church land ( $6.41 \%$ ), some others live in puramboku (4.14\%). A few families are tenants ( $3.62 \%$ ), while a smaller section lives in Otti land (1.35\%).

Chart No. 6 Ownership/ Possession and Occupation of various nature of Land

Across the Foranes, in the case of own land, Pettah Forane stands first with $76.10 \%$, closely followed by Palayam $(74.63 \%)$ and Puthukurichy ( $73.35 \%$ ). In the case of landless families, Kovalam is the topper with $23.90 \%$, followed by Thoothoor with $22.69 \%$ and Pulluvila with $21.58 \%$.

## Land Area-wise distribution of families

Table No. 7 reports the area-wise distribution of land among families who had some type of land under their ownership/ possession/ occupation. In the Archdiocesan level, the largest section of families has 1-5 cents ( $48.21 \%$ ), followed by those who have 5-10 cents ( $13.41 \%$ ). Some families have $10-15$ cents ( $4.17 \%$ ), while quite a number of families have more than 16 cents ( $6.20 \%$ ). (Chart No.7)

Chart No.7: Area-wise distribution of families

Looking at the Foranes, in the case of families having 1-5 cents, Thoothoor forane tops with $56.27 \%$, followed by Pulluvila ( $54.11 \%$ ) and Valiyathura ( $50.90 \%$ ). In the case of families having more than 16 cents, Puthukurichy is the topper with $19.62 \%$ followed by Pettah with $7.81 \%$.

## Sex-wise distribution of land

Table No. 8 speaks about the sex-wise distribution of land ownership/ possession/ occupation. Gender dimension of land ownership is explored here. The largest section of families ( $32.62 \%$ ) has their land in the name of the adult males, most probably in the name of the husbands. While the next largest section (17.10\%) has their land registered in the name of the female adults, a large section (15.86\%) has it jointly registered. (Chart No. 8)

Chart No.8: Sex-wise distribution of land

Glancing across the Foranes, in the case of land registered in the name of the male adults, Thoothoor stands first with $47.97 \%$, followed by Palayam ( $40.08 \%$ ) and Pettah ( $34.81 \%$ ). In the case of land registered in the name of females, Puthukurichy is the topper with $25.52 \%$, followed by Pettah with $22.70 \%$. In the case of joint registration, Puthukurichy (23.13\%) followed by Valiyathura (21.57\%) leads the list.

## ENERGY CONSUMPTION

## Energy consumption for cooking

The survey inquired about the source of energy used for cooking by the families in the Archdiocese and examined the number and percentage of families using one or more of the sources like smokeless stoves, traditional stoves, LPG, Biogas, solar energy and electricity. Variations in the use of energy sources were considered in the survey as an indicator of awareness about energy and its sources, impact of use of energy on climate change and sustainable development and impact on family expenditure.

Table No. 9 reveals that considerable majority ( $57.14 \%$ ) use traditional stove using fire wood, may be, together with other sources, followed by those who use LPG (52.26\%) and those who use electricity ( $38.77 \%$ ). Very few families use non-conventional sources of energy such as biogas ( $5.11 \%$ ), smokeless stove ( $4.95 \%$ ) and solar (0.45\%). (Chart No.9)

Chart No.9: Energy consumption for cooking

Across the Foranes, in the case of users of traditional stove, Pulluvila and Puthukurichy lead with $28.03 \%$ and $15.88 \%$ respectively. In the case of biogas users, Pulluvila ( $34.62 \%$ ) tops, followed by Thoothoor ( $20.87 \%$ ). In the case of users of smokeless stove, Thoothoor (30.52\%) tops, followed by Pulluvila (21.44\%).

## ECONOMIC CONDITIONS

In order to gauge the economic base of the families of the Archdiocese, the status of ownership of home appliances, vehicles, fishing assets, other occupational assets and trade and commerce was explored in the survey. Subscription to media and publications was also considered in this regard.

## Home appliances

Ownership of one or more of the home appliances was related to the economic position of the families. Table No10 deals with the use of home appliances by the families in the Archdiocese. Exactly as found in the forane level analyses, home appliances such as fan ( $67.32 \%$ ), mixey ( $60.10 \%$ ) and fridge ( $41.08 \%$ ) are the most popular ones among the families. The next largest section uses CD player ( $21.75 \%$ ) and grinder ( $20.83 \%$ ). Several families have computers ( $8.89 \%$ ) and tape recorders ( $6.06 \%$ ), while only a few have Air conditioners $(2.34 \%)$. But, one fifth of the families (20.46\%) do not have any of the home appliances. (Chart No.10)

Chart No.10: Home appliances

## Ownership of Vehicles

Ownership of vehicles is another important indicator of economic status of the families (Table No.11). It is found that a large majority of the families (71.04\%) do not have any of the listed vehicles. Among the rest, two-wheeler owners are the largest section (17.65\%), followed by bi-cycle owners (7.61\%) and four wheeler owners (5.70\%). (Chart No 11)

Chart No 11: Ownership of Vehicles

Across the foranes, in the case of two wheeler owners, Valiyathura forane ranks first with $24.03 \%$, followed by

Palayam (15.19\%). In the case of bi-cycle owners, Puthukurichy leads with $26.66 \%$, followed by Valiyathura with $19.38 \%$. In the case of four wheeler owners, Palayam (25.09\%) and Pettah (20.74\%) are the toppers.

## Media and Publications

The use of and subscription to various visual and print media products is an indication of financial position, involvement in public affairs, level of civic sense and thirst for knowledge. Table No. 12 presents the data regarding the ownership/use of news papers, periodicals, telephones, mobile phones and televisions. List of items listed for specific enquiry included news papers, Jeevanum Velichavum (the Archdiocesan monthly), Jeevanadam promoted by the Latin Catholic Church in Kerala, other publications, television, land phone, mobile phone and internet.

Among the Archdiocesan population, Televisions ( $62.11 \%$ ) and mobile phones ( $56.98 \%$ ) are the most popular items. They are followed by daily news papers ( $21.88 \%$ ) and land phones ( $20.05 \%$ ). Very few families subscribe to Jeevanum Velichavum ( $3.32 \%$ ) and Jeevanadam ( $0.84 \%$ ). A sizeable section of families do not have any of the listed media and publications. (Chart No.12)

Chart No 12: Media and Publications

Across the Foranes, in the case of families subscribing to daily news papers, Valiyathura leads with $22.71 \%$, and in the case of Jeevanum Velichavum and Jeevanadam, Palayam Forane is the topper with $20.19 \%$ and $20.08 \%$ respectively.
Subscription to the media and publications extends beyond mere economic profiles of the families. It follows that a substantial percentage of families stood excluded from the reach of media and publications and means of modern communication. Further enquiries would be needed to probe further the impact of this situation.

## Ownership of Fishing Assets

Ownership of Fishing Assets was an important and direct indicator for the economic base of the families who are predominantly Mukkuvars with fishing as their major source of livelihood. Table No. 13 deals with this subject. A vast majority of families ( $88.73 \%$ ) do not possess any one of the listed fishing equipments. The rest of the families own one or the other or more than one of the 15 listed equipments. Comparatively, more families have canoes $(3.53 \%)$, catamaran $(2.69 \%)$, choonda (1.93\%), chalavala (1.23\%) and thattumadi (1.12\%). (Chart No. 13)

Chart No. 13: Ownership of Fishing Assets

Across the Foranes, in the case of families who do not have any of the fishing equipments, Pulluvila stands at the top with $22.02 \%$, followed by Valiyathura ( $16.25 \%$ ).

## Other Equipments

Regarding the ownership of other equipments as assets for livelihood, besides fishing equipments, a number of items were considered by the survey as given in Table No.14. Even larger section of families (89.28\%) does not possess any other occupational equipments. Sewing machines (7\%), auto-rikshaws ( $1.65 \%$ ) and cameras ( $0.65 \%$ ) are the popular equipments owned by the rest of the families. (Chart No. 14)

Chart No.14: Possession of Other Equipments

## Trade and Commerce

Table No. 15 presents data on proprietorship or ownership of firms, businesses or self-employment units in the Archdiocese. It is noted that a very vast majority of families (91.29\%) do not have any trade and commercial activities. Among the others, self employment unit owners (3.83\%), petty shop owners (1.12\%) and shop keepers (0.69\%) are the major sections. (Chart No 15)

Chart No. 15: Trade and Commerce

## Agriculture

Agriculture as reported here excluded fishing and included popular crops found in Kanyakumari District and southern Kerala. Table No. 16 provided the details regarding the distribution of families having various crops. But, among the Archdiocesan population, vast majority of families ( $88.18 \%$ ) do not have any agricultural activities or cultivation of crops. Others have crops like coconuts ( $5.30 \%$ ) and plantains ( $1.75 \%$ ) in a minor way. (Chart No. 16)

Chart No 16: Agriculture

Lack of land, lack of an agricultural tradition other than fishing, lack of interest in and knowledge of agriculture and lack of exposure to farming communities may be behind this low participation of fishing communities in agriculture in the area under observation. Participation in agriculture is also considered as an indicator of the communities' awareness of the need for alternative employment options in view of depleting fishery related sources of livelihood.

## Spending Pattern (Monthly Expenses for food)

A family's monthly expenses for food, education and health care are considered pointers to the financial position of the family and priorities in spending by the family. These are basic needs and one can not escape from such expenses in any case. Table No.17a contained details of the expenses for food. Three categories were made for the sake of analysis: families who spend less than Rs.2000/- and families who spend between Rs. 2000/- and Rs.3000/- per month and families who spend more than Rs.3000/- for food alone.

The largest section of families (45.44\%) spend between Rs.2000-3000/- per month for food expenses, followed by those who spend more than Rs.3000/- per month and those who spend less than Rs.2000/-. (Chart No. 17a)

Chart No 17a: Spending Pattern (Monthly Expenses for food)

## Monthly Expenses for Education

This sub-section speaks about how families in the Latin Archdiocese of Trivandrum spend for education of their children. Three categories were made with families who spend less than Rs.2000/- per month and families who spend between Rs. 2000/- and Rs.3000/- per month and families who spend more than Rs.3000/- for education. The Rs.2000/- mark was considered as a reasonable amount per month for all expenses for good education to the children, including English medium in good schools and educational institutions.

Majority of the families ( $55.23 \%$ ) reportedly does not spend anything for education, may be, because they do not have any one studying in their families. Excluding them, it is found that the largest section (19.54\%) spends more than Rs.2000/- per month for education. A sizeable section of families (16.76\%) spend between Rs.2000/and Rs.3000/- per month. A smaller section (8.47\%) spends more than Rs.3000/-.(Table No.17b and Chart No.17b)

Chart No.17b: Monthly Expenses for Education

## Monthly Expenses for medical care and treatment

Health is another important area where families spend regularly. Three categories were made with families who spend less than Rs.500/- per month and families who spent between Rs. 500 and Rs.2000/- and above Rs.2000/per month and families who spend more than Rs.3000/- for medical expenses. According to Table No. 17c, largest section of families spends more than Rs.1000/- per month ( $59.90 \%$ ) and a sizeable section spends less than Rs.500/- per month for medical treatment (24.30\%). (Chart No. 17c)

Chart No. 17c: Monthly Expenses for medical care

Across the Foranes, Thoothoor (12.93\%) and Pulluvila (12.43\%) stand higher in the case of families spending more than Rs.1000/- for medical expenses.

## Debt

Debt is another important indicator of economic status of families. Table Nos. 18 and No. 19 deals with debts incurred by the families. According to the available data, majority of the families ( $69.01 \%$ ) has debts of some volume. (Chart No 18)

## Chart No 18: Debts

Across the Foranes, in the case of families having debts, Kovalam stands higher than others with $(70.92 \%$, followed by Pulluvila ( $69.42 \%$ ).

## Current size of Debts

The largest section of the families (29.47\%) have lowest category of debts (below Rs.50000/-), followed by those $(20.86 \%)$ having higher amounts of debts ( $6-10$ lakhs). Several families have debts of more than 10 lakhs rupees $(9.61 \%)$, while some families have debts of $1-3$ lakhs ( $14.81 \%$ ) and some others have debts of Rs. 50000 /- to Rs.100000/-. (Chart No. 19)

Chart No. 19: Current size of Debts

## Ration Cards

Table No. 20 presents the status of ration card holding by the families. Ration card is one of the basic entitlements of a citizen and family of citizens. In the Archdiocese, $85.40 \%$ of the families have ration cards. (Chart No. 20)

Chart No. 20: Ration Cards

Glancing across the Foranes, Valiyathura (19.98\%) stands higher in the case of families who do not possess ration cards, closely followed by Thoothoor (19.21\%). In the case of those who have ration cards, Pulluvila stands first (92.97\%).

## APL and BPL Families

A simple majority of families are registered under the APL category (55.09\%), while only $22.77 \%$ are in the BPL category. (Table No. 21 and Chart No.21)

Chart No.21: APL and BPL Families

Sizeable sections of families are found to be included in BPL list in the foranes of Pulluvila topping the rest with $28.64 \%$, and Valiyathura (28.40\%) and Kovalam (28\%) closely following.

## Medical Insurance

Medical insurance is a social security measure intended to support the families financially in times of health needs and health crisis and is an important criteria for economic wellbeing. However, Table No. 22 reports that large majority of families (64.18\%) does not have any of the health insurance policies. (Chart No 22)

## Chart No. 22: Medical Insurance

Looking at the Foranes, in the case of families not having health insurance, Thoothoor is the topper with $85.03 \%$, followed by Pettah ( $72.03 \%$ ) and Valiyathura ( $71.93 \%$ ). Among those who have it, Anchuthengu ( $51.50 \%$ ) and Kovalam ( $50.44 \%$ ) are the toppers.

## Toilets

Toilets used for sanitation was considered as an indicator of basic needs, health status, personal and family privacy and civic sense. Table No. 23 deals with this aspect. In the Archdiocese, large majority of the families (80.74\%) have attached toilets. However, a sizeable section depends on public toilets (10.55\%-6172), while a substantial section $(5.89 \%-3446)$ goes to open air for defecation. (Chart No 23).

Chart No. 23: Toilets

Pettah Forane is found to have the largest section of families with attached toilets ( $95.33 \%$ ), while Pulluvila ranks first in the case of families using public toilets (20.58\%). Anchuthengu is found to have the largest section of families going to open air for defecation ( $12.27 \%$-625).

## Source of Water

Source of water for domestic purposes and drinking was included in the survey as an important indicator for wellbeing and healthy life. According to Table No.24, the largest section of families use public pipe (33.84\%) for drawing water for drinking, followed by those having water connection at home ( $28.15 \%$ ), bore well ( $20.29 \%$ ), own well ( $20.25 \%$ ), nearby houses ( $11.38 \%$ ) and public well ( $6.76 \%$ ). It is found that $4.57 \%$ of families purchase water for drinking (2674) at commercial rates. (Chart No 24)

Chart No 24: Source of Water

Across the Foranes, in the matter of purchasing water for drinking, Kovalam Forane stands at the top $(78.53 \%$ 2100), followed by Thoothoor (9.24\%), Pulluvila (7.11\%) and Puthukurichy (2.80\%).

## Drainage

Survey looked into the manner in which the families managed their waste water or used water and other liquid matter. This aspect had an influence on the health and hygiene of the families and their neighborhoods. Table No. 25 describes the distribution of drainage types. In the Archdiocese, the largest section of families has planned pits ( $47.17 \%$ ), while $11.44 \%$ have drainage system of some type. It is worrying to note that a large section of people $(40.21 \%)$ do not have any place to drain their waste water. It implies that they just let go their waste water in the open space. (Chart No. 25)

Chart No. 25: Drainage

Across the Foranes, in the case of families having no place to drain their waste water, Pulluvila is the topper with $29.24 \%$, followed by Thoothoor (16.10\%) and Anchuthengu (14.37\%). In the case of families having planned pits, Valiyathura stands at the highest, followed by Thoothoor (20.44\%) and Pulluvila (17.28\%).

## Solid waste disposal

The manner in which families disposed their solid waste was examined by the survey because this was an important indicator of health and hygiene as well as civic sense. Table No. 26 reveals that while the largest section ( $39.03 \%$ ) dumps their solid waste into the open air, the next larger section throws away their waste into the water sources ( $32.41 \%$-18959). Some families use public bins for waste disposal ( $9.32 \%$ ), some others give their waste to the waste collectors ( $8.50 \%$ ). (Chart No. 26)

Chart No. 26: Solid waste disposal

Glancing across the Foranes, in the case of those families dumpling their solid waste into water sources, Pulluvila stands at the highest position with $34.47 \%$ (6535), followed by Thoothoor (30.22\%) and Anchuthengu (12.93\%).

## EDUCATION

## Education support given to children

Education is a major area of focus in the survey. Various aspects dealing with education of the children are examined such as study facilities at home, parents' monitoring and community support to students. Tables (No.27, No. 28 and No.29) deal with these aspects respectively.

## Study facilities at home

The survey inquired if the students had tables and chairs, proper study time at home and study materials. Largest section of families ( $34.21 \%$ ) reports that they have tables and chairs for the children to study at home. Substantial number of families has study time arranged for children ( $25.82 \%$ ) and study materials ( $23.06 \%$ ). It is found that a very large section of families have no one studying $(44.38 \%)$ at the time of the survey. (Chart No. 27)

Chart No. 27: Study facilities at home

Across the Foranes, in the case of families providing tables and chairs for the children to study at home, Pulluvila Forane tops with $20.18 \%$, followed by Valiyathura ( $17.81 \%$ ) and Thoothoor ( $15.61 \%$ ). In the case of study time and provision of study materials, Pulluvila forane is the topper, with Valiyathura closely following.

## Frequency of time spent by the parents for monitoring their children's study

Table No. 28 measured the duration of time spent by the parents for monitoring their children's study. $44.50 \%$, the largest section, always monitor their children's study, followed by those who occasionally do this (7.77\%) and those who do this only during exam time (1.31\%). Some parents are unable to monitor their children's study (1.51\%). A very large section seems to have nobody studying in the family (39.40\%). (Chart No. 28).

Chart No. 28: Frequency of time spent by the parents for monitoring their children's study

Across the Foranes, in the case of families who always monitor their children's education, Palayam Forane stands at first place with $50.30 \%$, very closely followed by Puthukurichy (49.44\%) and Pettah (47.48\%).

## Types of Community support

Table No. 29 deals with the types of community support made available to children for their study. The possibilities of financial assistance, provision of study facilities, supervisory attention, free tuition and guidance were reviewed as supports from the community including parishes. Majority of the families seems to consider being 'not applicable' to this support $(52.80 \%)$. Of the rest, the largest section ( $33.10 \%$ ) does not receive any of the supports listed in the survey from the community. While some families acknowledge the receipt of financial support (4.10\%), some others $(3.09 \%)$ receive free tuition. Very small percentage of families receives guidance $(2.62 \%)$, study facilities ( $2.21 \%$ ) and guidance (1.83\%). (Chart No. 29)

Chart No. 29: Types of community support

Across the foranes, in the case of those families who receive no support, Pulluvila forane leads with $23.16 \%$, followed by Valiyathura (18.90\%) and Puthukurichy (14.02\%).

## FAITH LIFE

The next three tables deal with various aspects of faith life of the families in the Arch diocese.
Table No. 30 reports that a very large section of families ( $91.61 \%$ ) has P O C Bible at home. Only very small section does not have it. (Chart No. 30)

Chart No. 30: Families possessing P O C Bible

In this connection, across the Foranes, Pettah (97.18\%) very closely followed by Palayam (97.17\%) and Puthukurichy forane ( $96.28 \%$ ) are the toppers in possessing the Bible at home. Among those who do not have, Kovalam is the topper with $15.95 \%$.

## Participation in Family Prayer

According to Table No.31, a vast majority of families (81.92\%) always make family prayers at home, while quite a number of families occasionally do this (10.30\%). It is noted that $6.43 \%$ never make family prayers at home.
(Chart No. 31)
Chart No 31: Participation in Family Prayer

Across the foranes, in the case of families that make family prayers always, Puthukurichy (90.19\%) and Anchuthengu are the toppers ( $86.85 \%$ ). In the case of those who never do family prayer, Kovalam ( $11.06 \%$ ) and Pulluvila ( $8.68 \%$ ) are the first and second rank holders respectively.

## Participation in B C C Meetings

Table No. 32 provides the information that a large majority of families participates in BCC meetings ( $71.74 \%$ ), followed by those who occasionally participate ( $20.63 \%$ ). $5.76 \%$ of families never attend BCC meetings. Chart No. 32

Chart No. 32: Participation in B C C Meetings

Across the foranes, in the case of those who consistently participate in BCC meetings, Thoothoor forane leads with $79.66 \%$, followed by Pulluvila ( $77.90 \%$ ) and Puthukurichy ( $73.19 \%$ ). In the case of those who never participate, Pettah ( $9.94 \%$ ) and Palayam ( $9.53 \%$ ) are the toppers.

## Death within three years

Mortality rate of the people in a particular country or region is of great relevance in calculating the longevity or health of its people. According to Table No.33, in a vast majority of families (88.84\%) in the Archdiocese no death occurred during the last three years. There are many reasons for death in the remaining families such as death due to deceases (3.54\%-2071), old age (3.34\%), normal death (0.84\%), accidents ( $0.75 \%-438$ ), infant death ( $0.54 \%$ ), suicide $(0.34 \%-198)$ and murder $(0.05 \%-28)$ (Chart No. 33).

Chart No. 33: Death within three years

Across the foranes, in the matter of death due to diseases, Thoothoor forane is the topper with $22.02 \%$, followed by Pulluvila (19.65\%) and Valiyathura (17.19\%). In accident deaths, Pulluvila tops with $22.83 \%$, followed by Thoothoor $(20.55 \%)$. In the case of suicides, Puthukurichy leads with $22.73 \%$. In the case of murder, Pulluvila has a distinction of $53.57 \%$ (15) of 28 murders committed in the Archdiocese during the last three years.

## SECTION TWO

## Individual members of the families surveyed

The second section of this chapter is devoted to report the information regarding the individual members of the families in the Latin Archdiocese of Trivandrum. There were 217821 persons covered in the survey from the 8 Foranes. Sector-wise and subject-wise collection of data was carried out with regard to the members.

| Name of the Forane | Families <br> Frequency | $\%$ | Individuals <br> frequency | $\%$ |
| :--- | :--- | :--- | :--- | :--- |
| Anchuthengu | 5095 | $8.71 \%$ | 19787 | $9.04 \%$ |
| Puthukurichy | 7736 | $13.22 \%$ | 28191 | $12.88 \%$ |
| Pettah | 2485 | $4.25 \%$ | 8876 | $4.06 \%$ |
| Palayam | 3610 | $6.17 \%$ | 12666 | $5.79 \%$ |
| Valiyathura | 9122 | $15.59 \%$ | 32331 | $14.78 \%$ |
| Kovalam | 7342 | $12.55 \%$ | 28193 | $12.88 \%$ |
| Pulluvila | 13107 | $22.40 \%$ | 48986 | $22.39 \%$ |
| Thoothur | 10004 | $17.10 \%$ | 38791 | $18.18 \%$ |
| Total | 58501 | $100.00 \%$ | 217821 | $100.00 \%$ |

As seen in the chart below, in the Archdiocese, Pulluvila is the biggest Forane in terms of number of people with 48986 individuals ( $22.49 \%$ ), followed by Thoothoor with 38791 persons ( $17.81 \%$ ), Valiyathura with 32331 persons (14.84\%), Kovalam with 28193 (12.94\%) and Puthukurichy with 28191(12.94\%). The smallest forane in this regard is Pettah with 8876 persons ( $4.07 \%$ ), the only Forane with less than 10000 people.

## Member-wise distribution of parishes in frequency and percentage

## Sex-wise distribution of the population

According to Table No.34, in the Archdiocese, there are more males (51.55\%-112287) than females ( $48.45 \%$ 105534). Sex ratio in the Archdiocese is 939.85 , meaning that for 1000 males there are only 939.85 females. The situation is very much disadvantageous to females in gender terms. The sex ratio is much lower than that of the State of Kerala with 1084 in 2011. (Chart No. 34)

Chart No. 34: Sex-wise distribution of the population

## Age-wise distribution of the total population

The largest section of people in the Archdiocese belongs to the age group of $22-40$ years with 73403 persons ( $33.70 \%$ ), followed by the age group of $41-60$ years with $48490(22.26 \%)$ and the age group of $6-15$ years with 36257 ( $16.65 \%$ ) and the age group of 1-5 years with 20895 children ( $9.59 \%$ ). There are 17642 senior citizens above 60 years (8.10\%) in the Archdiocese (Table No. 35 and 35 a).

Chart No. 35: Age wise distribution of Population (in numbers)

Chart No. 35a: Age wise distribution of population in percentage

## Blood Groups

Table No. 36 deals with the distribution of persons according to their blood group. In general, majority of the population in the Archdiocese does not know their blood group (51.06\%) and 7.31\% of people did not provide any information. Among others, the largest section consists of persons with $0+(15.60 \%)$, followed by $\mathrm{B}+(11.24 \%)$ and A+ (7.68\%). (Chart No. 36)

Chart No. 36: Blood Groups

## Blood Groups of persons in the age group 18-45 years

Persons in the age group of 18-45 were separately considered as it was the most eligible group to donate blood. Therefore, their prevalence in the region was specially analyzed. Table No 36a presents the findings. Here, to, almost half the population ( $48.27 \%$ ) do not know their blood group. $6.68 \%$ did not give any information. Of the remaining people, persons with $0+(16.67 \%)$ leads, while persons with $B+(12.15 \%)$ and $A+(8.43 \%)$ following. Among those with rare blood groups, persons with $0-(2.36 \%)$ are the toppers with $\mathrm{B}-(1.47 \%)$ and $\mathrm{A}-(1.21 \%)$ following respectively. (Chart No 36a)

Chart No 36a: Blood Groups of persons in the age group 18-45

## Marital status

The marital status of total number of respondents in the Archdiocese was examined in the survey and is presented in Table No.37. A large section (48.62\%) is found as married, while a smaller section (38.16\%) is unmarried. $3.76 \%$ of the population is widows, while there are only $0.76 \%$ widowers. While there are $0.38 \%$ of women abandoned by their husbands, there are $0.21 \%$ husbands abandoned by their wives. Not a small section is found living together without proper marriage. (Chart No. 37)

Chart No. 37: Marital status

## Marital Status of the persons above 40 years

Marital status of the people above the age group above 40 years was examined and it is found that a very small section of people remains unmarried after 40 years of age ( $2.43 \%$ ) and that $79.47 \%$ are married. Percentage of widows among people above 40 years of age is much larger (10.67\%) than that found among the general population (Table No.37a and Chart No.37a).

Chart No.37a: Marital Status of the persons above 40 years

## Life Status

The survey tried to categorize the respondents according to various positions they held in their current life. According to the details given in Table No.38, workers (26.06\%), students ( $22.16 \%$ ) and the unemployed ( $20.82 \%$ ) are the major categories found among the people in the Archdiocese. Only a small section is reportedly employed in Governments (4.68\%), while $2.72 \%$ are pensioners. There are $2.41 \%$ dropped out students and $5.43 \%$ job aspirants. (Chart No. 38)

Chart No. 38: Life Status

## Educational Qualifications

The current status of education of the respondents as shown in Table No. 39 was analyzed. The available data show that in the Archdiocesan level the largest section of people have education up to the level of High School (20.74\%), followed by those who completed Upper Primary level (UP) (13.75\%) and those with Lower Primary level (LP) (11.93\%). There are, however, a substantial number of persons with Higher Secondary School (HSS) level of education (9.85\%). The number of persons with Degree and above is smaller with $6.26 \%$ degree holders, $2.31 \%$ with professional qualifications and $1.81 \%$ post graduates. There are of course some people with Diplomas and Post graduate diplomas and certificates.
In the Archdiocese, $9.39 \%$ of people are illiterate. This rate of literacy is slightly less than the Kerala State average of $93.91 \%$ (2011). (Chart No. 39)

Chart No. 39: Educational Qualifications

## Sex-wise distribution of educational qualifications in the age group of 5-15 years

In the age group of 5-15 years, males are found to out number females in all levels expect in the case of postgraduation, M. Phil./PhD and Professional qualifications. (Table No. 39a and 39i)

Table No. 39i: Sex-wise distribution of educational qualifications in the age group of 5-15 years

| Row Labels | F | M | Grand Total |

| No Data | $1.29 \%$ | $1.27 \%$ | $2.56 \%$ |
| Grand Total | $49.63 \%$ | $50.37 \%$ | $100.00 \%$ |

## Sex-wise distribution of educational qualifications in the age group of 2635 years

In the age group of 26-35 years, males are found dominating in all the listed levels of educational qualifications, except in the case of HSS, Degree, Post graduates and M. Phil. (Table No. 39b and 39ii),

Table No.39ii: Sex-wise distribution of educational qualifications in the age group of 26-35 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| Illiterate | $2.30 \%$ | $3.34 \%$ | $5.64 \%$ |
| Not Studying | $1.20 \%$ | $1.50 \%$ | $2.70 \%$ |
| Mere Literate | $2.81 \%$ | $3.31 \%$ | $6.12 \%$ |
| KG | $0.45 \%$ | $0.70 \%$ | $1.15 \%$ |
| LP | $2.74 \%$ | $3.93 \%$ | $6.67 \%$ |
| UP | $6.54 \%$ | $7.28 \%$ | $13.82 \%$ |
| HS | $12.88 \%$ | $13.77 \%$ | $26.66 \%$ |
| HSS | $5.83 \%$ | $5.73 \%$ | $11.56 \%$ |
| Degree | $5.18 \%$ | $4.29 \%$ | $9.47 \%$ |
| PG | $2.14 \%$ | $1.60 \%$ | $3.74 \%$ |
| M. Phil /PhD | $0.61 \%$ | $0.53 \%$ | $1.15 \%$ |
| Professional | $1.93 \%$ | $2.07 \%$ | $4.00 \%$ |
| Technical | $0.22 \%$ | $1.19 \%$ | $1.41 \%$ |
| Certificate | $0.16 \%$ | $0.22 \%$ | $0.39 \%$ |
| Diploma | $0.36 \%$ | $0.93 \%$ | $1.29 \%$ |
| PG Diploma | $0.18 \%$ | $0.23 \%$ | $0.42 \%$ |

| Other | $0.40 \%$ | $0.50 \%$ | $0.90 \%$ |
| :--- | :--- | :--- | :--- |
| No Data | $1.51 \%$ | $1.41 \%$ | $2.93 \%$ |
| Grand Total | $47.45 \%$ | $52.55 \%$ | $100.00 \%$ |

The above analysis shows that males are more in lower levels than females in both the age groups. With regard to higher and technical education, females are more in the age group of 16-26 years, while males are in a more advantageous situation than females in the age group of 26-35 years.

## Medium of Instruction opted for school education

Table No. 40 reveals the distribution of medium of instruction among persons who had a chance to go to school in their life time. In general, majority chose Malayalam medium for their education ( $56.09 \%$ ), while only $15.73 \%$ of people opted for English, followed by those who took Tamil ( $12.68 \%$ ). Only a small section selected Hindi as their medium of instruction. Selection of medium is not applicable to $5.18 \%$ of people. Some people did not give any information regarding this question (10.16\%). (Chart No. 40)

Chart No. 40: Medium of Instruction opted for school education

## Sex-wise distribution of Medium of Instruction for education in the age group of 5-15 years

In the age group of 5-15 years, more boys than girls chose the listed languages as their medium of instruction. English ( $41.19 \%$ ) is the most preferred medium of instruction, with Malayalam (40.95\%) following very closely (Table No. 40a and 40i).

Table No.40i: Sex-wise distribution of Medium of Instruction for education in the age group of 5-15 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| Malayalam | $19.94 \%$ | $21.01 \%$ | $40.95 \%$ |
| English | $19.91 \%$ | $21.29 \%$ | $41.19 \%$ |
| Tamil | $5.90 \%$ | $6.11 \%$ | $12.01 \%$ |
| Hindi | $0.13 \%$ | $0.14 \%$ | $0.27 \%$ |
| Not Applicable | $0.71 \%$ | $0.66 \%$ | $1.37 \%$ |
| No Data | $2.16 \%$ | $2.05 \%$ | $4.21 \%$ |
| Grand Total | $48.75 \%$ | $51.25 \%$ | $100.00 \%$ |

## Sex-wise distribution of medium of instruction of the age group 16-25 years

According to Table No. 40b and 40ii, except in the case of English medium, more males chose all other three listed languages, though the difference in percentage points is very small. Malayalam (56.63\%) is the most preferred medium for this age group.

Table No. 40ii: Sex-wise distribution of medium of instruction of the age group 16-25 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| Malayalam | $28.14 \%$ | $28.49 \%$ | $56.63 \%$ |
| English | $10.43 \%$ | $10.34 \%$ | $20.77 \%$ |
| Tamil | $6.97 \%$ | $7.21 \%$ | $14.19 \%$ |
| Hindi | $0.05 \%$ | $0.08 \%$ | $0.13 \%$ |
| Not Applicable | $0.84 \%$ | $1.05 \%$ | $1.90 \%$ |

| Grand Total | $47.24 \%$ | $52.76 \%$ | $100.00 \%$ |

## Subjects opted for studies after 'Plus Two'

As given in Table No.41, a large majority of people (72.94\%) do not find the question applicable to them, may be because, they have not gone beyond 'Plus Two' level of education and a sizeable section do not provide any data on this ( $8.68 \%$ ). Among those who have gone above HSS, most of the persons preferred Science (3.97\%), Arts (2.77\%), Commerce (2.56\%), Literature (1.50\%) and Engineering (1.40\%). Not many chose other subjects like management, fine arts, law, Medicine, architecture, journalism, I T I trades and other professional subjects
(Chart No. 41).

Chart No. 41: Subjects opted for studies after 'Plus Two’

## Sex-wise distribution of subjects for study of the age group of 16-25 years

Age group of 16-25 years (Table No. 41a and 41i), in the case of majority of the subjects females are in an advantageous situation, while in a number of subjects like Engineering, Medicine and Journalism, males are in a better situation, though in all these, the difference in percentage points is very low. It is noted that a large section of this age group ( $87.06 \%$ ) reportedly is out of this question's purview and a sizeable section ( $7.78 \%$ ) did not provide any data on this issue. Literature is the most preferred subject for this age group (1.48\%).

Table No.41i: Sex-wise distribution of subjects for study of the age group of 16-25 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |

| Grand Total | $48.75 \%$ | $51.25 \%$ | $100.00 \%$ |

## Sex-wise distribution of the subjects for study of the age group of 26-35 years

In the age group of 26-35 years, more males have selected listed subjects for study, except in the case of Literature, Arts, Science and Medicine. Majority of the population reports that it is not applicable to them in this age group. Science is the most preferred subject for this age group. (Table No. 41b and 41ii)

Table No.41ii: Sex-wise distribution of subjects for study of the age group of 26-35 years

| Row Labels | $\mathbf{F}$ | $\mathbf{M}$ | Grand Total |
| :--- | :--- | :--- | :--- |
| Not Applicable | $24.65 \%$ | $27.69 \%$ | $52.34 \%$ |
| Literature | $1.26 \%$ | $0.86 \%$ | $2.11 \%$ |
| Arts | $2.53 \%$ | $1.58 \%$ | $4.11 \%$ |
| Science | $7.15 \%$ | $4.39 \%$ | $11.55 \%$ |
| Commerce | $3.10 \%$ | $3.12 \%$ | $6.21 \%$ |
| management | $0.33 \%$ | $0.50 \%$ | $0.83 \%$ |
| Fine arts | $0.08 \%$ | $0.14 \%$ | $0.21 \%$ |
| law | $0.20 \%$ | $0.15 \%$ | $0.35 \%$ |
| Engineering | $1.85 \%$ | $2.84 \%$ | $4.69 \%$ |
| Medicine | $0.81 \%$ | $0.25 \%$ | $1.06 \%$ |
| Architecture | $0.05 \%$ | $0.09 \%$ | $0.14 \%$ |
| Journalism | $0.06 \%$ | $0.07 \%$ | $0.13 \%$ |
| ITI Trades | $0.33 \%$ | $1.50 \%$ | $1.83 \%$ |

| Other Professionals | $1.73 \%$ | $1.35 \%$ | $3.07 \%$ |
| :--- | :--- | :--- | :--- |
| Diploma | $0.57 \%$ | $0.92 \%$ | $1.48 \%$ |
| Certificate | $0.23 \%$ | $0.19 \%$ | $0.42 \%$ |
| Others | $1.47 \%$ | $1.48 \%$ | $2.95 \%$ |
| No data | $3.21 \%$ | $3.30 \%$ | $6.51 \%$ |
| Grand Total | $49.60 \%$ | $50.40 \%$ | $100.00 \%$ |

More males are found to have opted for professional subjects and courses than females.

## Preferred Education Institutions

The survey looks into the distribution of educational institutions which the respondents opt for their studies. The options include State-aided institutions which are managed by private individuals or organizations but financially supported by Governments, State unaided institutions managed by private individuals or organizations but following State syllabus, purely State Government institutions, CBSC and ICSE. The results are presented in Table No. 42. The largest section of people studied in State Government institutions ( $10.82 \%$ ) with slightly more males than females, State aided educational institutions ( $35.08 \%$ ) with $18.16 \%$ males and $16.92 \%$ females. This is followed by those who chose State unaided institutions (16.62\%) with more males than females, CBSC (20.58\%) and ICSE (3.14\%). (Chart No. 42)

Chart No. 42: Preferred Education Institutions

## Sex-wise distribution of the educational institutions preferred by the age group of 5-15 years

In the age group of 5-15 years, more boys are found to have studied in all the listed educational institutions. In this age group, the largest section studied in State aided institutions ( $36.28 \%$ ), followed by those who went to State unaided institutions (18.74\%). (Table No. 42a and 42i)

Table No.42i: Sex-wise distribution of the educational institutions preferred by the age group of 5-15 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| State Aided | $17.91 \%$ | $18.38 \%$ | $36.28 \%$ |
| State Un-Aided | $9.24 \%$ | $9.50 \%$ | $18.74 \%$ |
| State Government | $8.36 \%$ | $8.47 \%$ | $16.83 \%$ |
| CBSE | $5.04 \%$ | $6.12 \%$ | $11.16 \%$ |
| ICSE | $0.93 \%$ | $1.06 \%$ | $1.99 \%$ |
| Not Applicable | $3.68 \%$ | $4.10 \%$ | $7.78 \%$ |
| No Data | $3.19 \%$ | $3.20 \%$ | $6.39 \%$ |
| Grand Total | $48.75 \%$ | $51.25 \%$ | $100.00 \%$ |

## Sex-wise distribution of the educational institutions preferred by the age group of 16-25 years

When the higher age group of 16-25 years was analyzed, it is noted that the listed institutions attracted more males than females, except in the case of State unaided institutions. In this age group, State Aided educational institutions were the most preferred ones with $43.34 \%$ of people opting for them, followed by State Government institutions (25.63\%) and State unaided institutions with $8.40 \%$. (Table No. 42b and 42ii)

Table No.42ii: Sex-wise distribution of the educational institutions preferred by the age group of 16-25 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| State Aided | $21.08 \%$ | $22.26 \%$ | $43.34 \%$ |
| State Un-Aided | $4.43 \%$ | $3.97 \%$ | $8.40 \%$ |
| State Government | $12.49 \%$ | $13.14 \%$ | $25.63 \%$ |
| CBSE | $1.13 \%$ | $1.39 \%$ | $2.52 \%$ |
| ICSE | $0.26 \%$ | $0.19 \%$ | $0.46 \%$ |
| Not Applicable | $4.62 \%$ | $5.98 \%$ | $10.60 \%$ |
| No Data | $4.36 \%$ | $4.04 \%$ | $8.40 \%$ |
| Grand Total | $48.62 \%$ | $51.38 \%$ | $100.00 \%$ |

## Sex-wise distribution of the educational institutions preferred by the age group of 26-35 years

When the age group of 26-35 years was analyzed, the preference among males in this age group is found in favour of State aided and State unaided and ICSE stream, while females are found more with CBSE. Here also, the most preferred ones are State aided institutions with $39.87 \%$ to have studied in them, followed by State Government institutions (22.39\%). (Table No. 42c and 42iii)

Table No.42iii: Sex-wise distribution of the educational institutions preferred by the age group of 26-35 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| State Aided | $19.60 \%$ | $20.28 \%$ | $39.87 \%$ |
| State Un-Aided | $2.67 \%$ | $2.99 \%$ | $5.66 \%$ |
| State Government | $10.35 \%$ | $12.05 \%$ | $22.39 \%$ |
| CBSE | $0.38 \%$ | $0.19 \%$ | $0.57 \%$ |
| ICSE | $0.13 \%$ | $0.17 \%$ | $0.30 \%$ |
| Not Applicable | $7.96 \%$ | $10.04 \%$ | $18.01 \%$ |
| No Data | $5.79 \%$ | $6.36 \%$ | $12.14 \%$ |
| Grand Total | $47.51 \%$ | $52.49 \%$ | $100.00 \%$ |

State aided institutions are found as the most preferred ones in the age group analysis also.

## Employment Sectors

Table No. 43 suggests the distribution of employees according to their sectors of employment. Diverse sectors are considered for analysis such as those employed in State Government, those employed in Public sector, those employed in private non-service sector, those employed in private service sector, those self-employed in firms, wage labourers, those in fishing and agriculture, those employed in other States, those employed in Gulf countries, those employed in Europe and those employed in other foreign countries.
The data show that majority of the population $(55.14 \%)$ stand outside this consideration, may be because they are not employed any where. Some people did not provide information in this regard ( $8.97 \%$ ). Excluding this large portion, among others, the self-employed persons are the largest (22.58\%), distantly followed by those employed in Gulf countries ( $4.43 \%$ ), those in private non-service sector ( $3.28 \%$ ) and those employed directly by State Government ( $2.71 \%$ ). Only $0.67 \%$ of people are employed in public sector.(Chart No. 43)

Chart No. 43: Employment Sectors

## Sex-wise distribution of employment sectors in the age group of 18-28 years

In this age group of 18-28 years, except in the case of public sector and private service sector, males have more participation in employment in all other listed sectors. Excluding the 'not applicable' group ( $58.38 \%$ ) and those who did not give data ( $8.01 \%$ ), the largest category is the self-employed ( $19.17 \%$ ) with a larger percentage of males $(17.06 \%)$ than females ( $2.11 \%$ ), followed by those employed in Gulf countries ( $6 \%$ ) with a larger section of males $(5.49 \%)$ than females ( $0.51 \%$ ). (Table No. 43a and 43i)

Table No 43i: Sex-wise distribution of employment sectors in the age group of 18-28 years

| Row Labels | $\mathbf{F}$ | $\mathbf{M}$ | Grand Total |
| :--- | :--- | :--- | :--- |
| State government Direct | $0.55 \%$ | $0.75 \%$ | $1.29 \%$ |
| Public Sector | $0.27 \%$ | $0.23 \%$ | $0.50 \%$ |
| Private Sector | $2.66 \%$ | $3.10 \%$ | $5.76 \%$ |
| Private Service Sector | $0.32 \%$ | $0.31 \%$ | $0.62 \%$ |
| Self-Employed | $2.11 \%$ | $17.06 \%$ | $19.17 \%$ |
| Employed in other states | $0.44 \%$ | $0.59 \%$ | $1.04 \%$ |
| Gulf Countries | $0.51 \%$ | $5.49 \%$ | $6.00 \%$ |
| Europe | $0.12 \%$ | $0.19 \%$ | $0.30 \%$ |
| Other Foreign Countries | $0.31 \%$ | $0.56 \%$ | $0.87 \%$ |
| Not Applicable | $37.54 \%$ | $18.85 \%$ | $56.38 \%$ |
| No Data | $4.34 \%$ | $3.67 \%$ | $8.01 \%$ |
| Grand Total | $49.19 \%$ | $50.81 \%$ | $100.00 \%$ |

## Sex-wise distribution of employment sectors in the age group of 29-35 years

In the age group of 29-35 years (Table No. 43b and 43ii), in the distribution of employment sectors, it is found that males are in an advantageous situation with their greater presence in all the sectors listed in the survey. Except in the case of the self-employed persons and those employed in Gulf countries, the difference in percentage points is nominal. The employment sectors in which opportunities are grabbed by the Archdiocesan population are the self employment sector ( $32.77 \%$ ) and Gulf countries ( $9.59 \%$ ). For a larger section of people this question is reportedly not applicable (37.33\%).

Table No.43ii: Sex-wise distribution of employment sectors in the age group of 29-35 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| State government Direct | $1.19 \%$ | $1.47 \%$ | $2.66 \%$ |
| Public Sector | $0.44 \%$ | $0.46 \%$ | $0.90 \%$ |
| Private Sector | $2.43 \%$ | $3.83 \%$ | $6.26 \%$ |
| Private Service Sector | $0.34 \%$ | $0.42 \%$ | $0.76 \%$ |
| Self-Employed | $4.37 \%$ | $28.40 \%$ | $32.77 \%$ |

| Employed in other states | $0.38 \%$ | $0.77 \%$ | $1.15 \%$ |
| :--- | :--- | :--- | :--- |
| Gulf Countries | $0.92 \%$ | $8.67 \%$ | $9.59 \%$ |
| Europe | $0.22 \%$ | $0.39 \%$ | $0.61 \%$ |
| Other Foreign Countries | $0.34 \%$ | $0.81 \%$ | $1.15 \%$ |
| Not Applicable | $32.66 \%$ | $4.67 \%$ | $37.33 \%$ |
| No Data | $3.87 \%$ | $2.93 \%$ | $6.80 \%$ |
| Grand Total | $47.18 \%$ | $52.82 \%$ | $100.00 \%$ |

## Sex-wise distribution of employment sectors in the age group of 36-60 years

In the age group of 36-60 years (Table No. 43c and 43iii), except in the case of public employment where gender parity is visible, in all other sectors, males dominate with more percentage share. As found in the case of age groups discussed above, here, too, the difference in percentage points is very small, in all sectors except selfemployment and employment in Gulf countries.

Table No.43iii: Sex-wise distribution of employment sectors in the age group of 36-60 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| State government Direct | $1.98 \%$ | $2.78 \%$ | $4.75 \%$ |
| Public Sector | $0.55 \%$ | $0.55 \%$ | $1.10 \%$ |
| Private Sector | $1.34 \%$ | $2.46 \%$ | $3.80 \%$ |
| Private Service Sector | $0.30 \%$ | $0.38 \%$ | $0.68 \%$ |
| Self-Employed | $9.66 \%$ | $30.85 \%$ | $40.50 \%$ |
| Employed in other states | $0.35 \%$ | $0.51 \%$ | $0.86 \%$ |
| Gulf Countries | $0.59 \%$ | $5.75 \%$ | $6.34 \%$ |
| Europe | $0.09 \%$ | $0.22 \%$ | $0.31 \%$ |
| Other Foreign Countries | $0.28 \%$ | $0.44 \%$ | $0.72 \%$ |
| Not Applicable | $28.77 \%$ | $5.07 \%$ | $33.84 \%$ |
| No Data | $3.98 \%$ | $3.09 \%$ | $7.06 \%$ |
| Grand Total | $47.90 \%$ | $52.10 \%$ | $100.00 \%$ |

In the age group analysis, males have acquired a definite dominance over females. Except in the case of public sector and private service sector, males have domination in all age groups.

## Career Sectors/ employment positions

Table No. 44 discusses the situation of respondents in their careers and employment positions. A long list of 32 positions/careers as seen in the said Table is considered for the purpose of measuring the space occupied by the respondents in these positions. In general, the jobless/unemployed are the major section with $36.01 \%$, distantly followed by fishermen ( $15.10 \%$ ) and house managers ( $9.98 \%$ ). Some minor sections in this regard consist of wage labourers $(3.68 \%)$, the self-employed ( $2.45 \%$ ) and fish vendors ( $2.42 \%$ ). Alarmingly, it is noted that higher careers like teachers, engineers, doctors, IT Professionals, managers, gazette officers, etc are occupied by very small sections of people in the Archdiocese. (Chart No. 44)

Chart No. 44: Career Sectors/ employment positions

## Sex-wise distribution of Career positions of the age group 18-28 years

In the age group 18-28 years (Table No. 44a and 44i), fishermen (14.16\%) and house managers (10.90\%) and wage labourers (4.19\%) are the major categories or jobs. It is found that females dominate in employments such as medical Doctors, Advocates, Teachers, Nurses, clerks, nuns, house managers, Ex-service men, while males are employed more in areas like engineers, managers, accountants, IT professionals, peons, Class IV
employees, priests, police, jawan, media, artist, sports person, technically skilled jobs, artisans, drivers, fishermen, fish venders, wage labourers and pensioners. Except in the case of fishermen, house managers and wage labourers, the difference in percentage points between men and women is very small.

|  |  |  |  |

## Sex-wise distribution of Career position of the age group 29-35 years

In the age group 29-35 years (Table No. 44b and 44ii), major sections are the fishermen ( $24.06 \%$ ), house managers $(17.75 \%)$ and the unemployed ( $14.80 \%$. Work participation in other careers and positions and employments is deplorably low. Male participation is found more in a number of careers such as gazette officers, engineers, advocates, accountants, I T professionals, peons, priests, police, jawans, media persons, artists, sports persons, technically skilled jobs, unskilled jobs, artisans, drivers, fishers, wage labourers and pensioners. Females outnumber in certain jobs like doctors, teachers, nurses, clerks, nuns, fish vendors, house managers and ex-service women. There are more female unemployed or jobless persons than males. The difference in percentage points between men and women is very nominal, except in the case of fishermen, house managers and wage labourers.

## Sex-wise distribution of Career position of the age group 36-60 years

In the age group of 36-60 years, fishermen (25.77\%) (Table No.44c and 44iii), house managers (15.66\%) and wage labourers ( $6.14 \%$ ) are the first three categories of careers in terms of respondent participation. Other careers are nominally represented. Men are found outnumbering women in almost all careers except in the case of teachers, nurses, Class IV employees, nuns, house managers and the unemployed. There is equal number of men and women sports persons. It is again noted that except in the case of fishermen, house managers and wage labourers, the difference in percentage points between men and women is very small.

TableNo.44iii: Sex-wise distribution of Career position of the age group 36-60 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| Gazette Officer | $0.21 \%$ | $0.30 \%$ | $0.51 \%$ |

| Accountant | $0.16 \%$ | $0.53 \%$ | $0.69 \%$ |
| IT Professional | $0.05 \%$ | $0.48 \%$ | $0.52 \%$ |
| Nurse | $0.21 \%$ | $0.04 \%$ | $0.25 \%$ |
| Clerk | $0.49 \%$ | $0.59 \%$ | $1.08 \%$ |
| Peon | $0.13 \%$ | $0.19 \%$ | $0.32 \%$ |
| Class IV | $0.13 \%$ | $0.11 \%$ | $0.24 \%$ |
| Priest | $0.00 \%$ | $0.09 \%$ | $0.09 \%$ |
| Nun | $0.05 \%$ | $0.02 \%$ | $0.06 \%$ |
| Police | $0.02 \%$ | $0.23 \%$ | $0.24 \%$ |
| Jawan | $0.01 \%$ | $0.16 \%$ | $0.17 \%$ |
| Media Person | $0.01 \%$ | $0.03 \%$ | $0.03 \%$ |
| Artist | $0.02 \%$ | $0.05 \%$ | $0.07 \%$ |
| Sports person | $0.01 \%$ | $0.01 \%$ | $0.02 \%$ |
| Technically Skilled | $0.21 \%$ | $1.71 \%$ | $1.92 \%$ |
| Unskilled | $0.12 \%$ | $0.52 \%$ | $0.64 \%$ |
| Artisan | $0.04 \%$ | $0.09 \%$ | $0.13 \%$ |
| Driver | $0.04 \%$ | $1.44 \%$ | $1.48 \%$ |
| Fisherman | $1.31 \%$ | $24.46 \%$ | $25.77 \%$ |
| Fish Vending | $4.75 \%$ | $0.88 \%$ | $5.63 \%$ |
| Coolie worker | $1.28 \%$ | $4.86 \%$ | $6.14 \%$ |
| Self- Employed | $1.89 \%$ | $2.72 \%$ | $4.61 \%$ |
|  |  |  |  |

| House manager | $15.29 \%$ | $0.38 \%$ | $15.66 \%$ |
| :--- | :--- | :--- | :--- |
| Ex- Servicemen | $0.17 \%$ | $0.25 \%$ | $0.42 \%$ |
| Pensioner | $0.67 \%$ | $0.83 \%$ | $1.50 \%$ |
| Others | $4.13 \%$ | $2.90 \%$ | $7.04 \%$ |
| Jobless /Unemployed | $10.78 \%$ | $2.94 \%$ | $13.72 \%$ |
| No Data | $3.90 \%$ | $3.42 \%$ | $7.32 \%$ |
| Grand Total | $47.85 \%$ | $52.15 \%$ | $100.00 \%$ |

Fishermen, house managers and wage labourers are the largest sections in the community in all age groups. In the age group analysis, it is found that males dominate in all the three age groups in certain employments such as engineers, managers, accountants, IT Professionals, peons, priests, police, jawans, media persons, artists, technically skilled jobs, unskilled labour, artisans, drivers, fishers, wage labourers and pensioners. Females are found more in a few employments and jobs such as teachers, fish vendors and house managers. They are also more among the jobless. The nominal difference in percentage points is clearly visible.

## Diseases

Health is an important indicator of wellbeing and progress of individuals and communities. The survey examines the distribution of respondents according to their diseases. Table No. 45 reports the spread and size of such distribution. In general, a very large section (70.38\%) is reported free from all the listed diseases. Data show that rheumatic $(4.38 \%)$, BP $(3.85 \%)$, diabetes (3.55\%), allergy ( $1.99 \%$ ) and heart problems ( $1.88 \%$ ) are the major diseases among people of the Archdiocese. All the other listed diseases are found among the people but in smaller percentages of people. (Chart No. 45)

Chart No. 45: Diseases

## Sex-wise distribution of diseases in the age group of 0-6 years

The age group of 0-6 years consists of infants (Table No 45a 45i). A vast majority of people (84.76\%) in this age group is found free from the diseases under consideration. Female children outnumber males only in the case of leprosy, thyroid, varicose vein, rheumatic and mentally retardation. In all other diseases, more males are affected at this tender age. In the case of diabetes, cancer, BP, bone problems and psychic disorders, male and female
children are equally found. Dengue /Chicken guinea (2.38\%), Asthma (1.73\%) and allergy (1.32\%) are the major ailments found among the children.

## Sex-wise distribution of diseases in the age group of 7-15 years

The age group of 7-15 years consists of small children and adolescents (Table No 45b and 45ii). In this age group, a vast majority do not have any of the listed diseases ( $84.74 \%$ ). In this case, men are in an advantageous position than women. Considering in a gender perspective, more females are affected by smaller number of illnesses such as diabetes, HIVISTD, malaria, leprosy, thyroid and rheumatic. More males are affected by the rest of the diseases considered. In the case of cancer, varicose vein and psychic patients, men and women are equally affected.

## Sex-wise distribution of diseases in the age group of 16-35 years

The age group of 16-35 years consists of young men and women (Table No 45c and 45iii). In this age group also, a vast majority of people ( $80.99 \%$ ) do not have any of the listed diseases. Allergy (1.90\%), Rheumatic $(1.19 \%)$, bone diseases $(1.02 \%)$ and thyroid ( $0.95 \%$ ) are the diseases found in a comparatively greater extent among the people of this age group. However, their share is very small. More women are affected by diseases like heart problems, BP, HIVISTD, asthma, elephanticities, thyroid, varicose vein, rheumatic and allergy. More males are affected by other diseases in the list, though their percentage also is very small.

## Sex-wise distribution of diseases in the age group of 36-60 years

Among the members of the age group of $36-60$ years (Table No 45d and 45iv), it is found that $53.40 \%$ is free from any of the diseases under consideration. More and more people are getting affected by one or the other diseases, when their age increases. In this age group, Rheumatic (7.74\%), BP (6.64\%) and diabetes (6.13\%) are the major health problems. Females outnumber in the case of BP, HIVISTD, Dengue/CG, asthma, thyroid, bone diseases, varicose vein, rheumatic, allergy and psychic disorders, while males dominate in the case of heart problems, diabetes, cancer, jaundice, malaria, leprosy, skin diseases and elephanticities. In the case of mental retardation, both men and women are equal.

## Sex-wise distribution of diseases in the age group above $\mathbf{6 0}$ years

Among the members of the age group above 60 years (Table No 45e and 45 v ), it is found that majority of the people ( $68.41 \%$ ) are affected by one or the other of the diseases listed in the survey. Major health problems in this age group are Rheumatic (13.71\%), BP (13.34\%) and diabetes (12.43\%). Heart problems (5.555), Asthma (3.86\%) and bone problems ( $3.59 \%$ ) are also found in several people. In this age group, more women are affected by most of the diseases such as diabetes, BP, HIV/STD, malaria, dengue/CG, Elephanticities, thyroid, bone problems, varicose vein, rheumatic, allergy, psychic and mental retardation. More men are affected by other diseases. The difference in percentage points between men and women is very little.

| Others | 1127 | 1085 | 2212 | $4.30 \%$ | $4.14 \%$ | $8.44 \%$ |

In the age-wise and sex-wise analysis, men are found in an advantageous position in the matter of diseases. In all age groups, more females are affected by diseases than men. However, in the case of jaundice, T B and skin diseases, men are affected more in all the age groups. In the case of thyroid and rheumatic, more females are affected in all the age groups. While cancer is found equally among men and women in the first three age groups below 35 years, it is found more among males in the age groups above 36 years. Similarly, HIVISTD is found more among females in all the age groups above 7 years, while it is found more among males in the age group of 0-6 years.

## Bad habits

The survey tried to catch the trend in bad habits of the respondents. Table No. 46 contains the distribution pattern. In general, a large section of people ( $83.13 \%$ ) are reportedly free from any of the listed bad habits of drinking alcohol, smoking, betel leaf chewing, drugs and consumption of pan masala. Of the remaining people, the largest section (10.66\%) has the habit of alcohol consumption, followed by betel leaf chewers (6.37\%), smokers ( $2.55 \%$ ), pan masala users ( $1.45 \%$ ) and drug abusers ( $0.10 \%$ ). (Chart No. 46)

## Sex wise distribution of bad habits in the age group of $\mathbf{5 - 1 5}$ years

In the age group of 5-15 years (Table No 46a and 46i), even in this tender age, both boys and girls, though in a very minute measure, have all the bad habits as listed above. It is found that $99.32 \%$ of them are free from any bad habits. Boys outnumber in the case of alcohol consumption and use of pan masala, while more girls have the habit of drug use. Smoking and betel leaf chewing are found equally among boys and girls. The difference in percentage points between boys and girls are, however, very small.

| Drinking | 98 | 2524 | 2622 | $0.52 \%$ | $13.36 \%$ | $13.87 \%$ |
| Smoking | 26 | 892 | 918 | $0.14 \%$ | $4.72 \%$ | $4.86 \%$ |
| Betel Chewing | 606 | 1688 | 2294 | $3.21 \%$ | $8.93 \%$ | $12.14 \%$ |
| Drugs | 1 | 16 | 17 | $0.01 \%$ | $0.08 \%$ | $0.09 \%$ |
| Pan Masala | 11 | 60 | 71 | $0.06 \%$ | $0.32 \%$ | $0.38 \%$ |
| Not Applicable | 7725 | 5251 | 12976 | $40.88 \%$ | $27.79 \%$ | $68.66 \%$ |

In the age group and sex-wise analysis, it is found that males dominate in all the bad habits in all age groups. When it comes to senior citizens, almost one third of the people are affected by one or the other bad habits.

## Disabilities

The survey included the subject of disabilities to find out the size and type among the respondents. Data regarding 11 disabilities as given in Table No. 47 are collected in the survey. It is found that a very large section of people ( $91.86 \%$ ) does not have any disability. Among others, major disability is partial vision (2.44\%). Other disabilities found among small sections of people are reading difficulty $(0.79 \%)$, loss of the hand $(0.61 \%)$, lameness $(0.49 \%)$ and blindness ( $0.41 \%$ ). (Chart No. 47)

Chart No 47: Disabilities

## Involvement in Church and other organizations

Distribution of the respondents according to their membership/affiliation/ association with faith-based/ secular organizations and groups is tabled in Table No.48. It is found that majority of the people (65.45\%) do not have any social and faith-based organizational participation. Among the others, the largest section is associated with political organizations (7.33\%), followed by SHG (6.06\%) and BCC (6.04\%), fishermen forum (4.76\%), pious associations (3.70\%) and prayer groups (2.19\%). (Char No. 48)

Chart No. 48: Involvement in Church and other organizations

## Sex-wise involvement in faith-based and social organizations of the age group of 18-60 years

According to Table No. 48a and 48i, the largest section (8.43\%) is associated with SHGs, followed by those with BCCs $(7.61 \%)$, political organizations ( $6.85 \%$ ) and fishermen forum ( $6.48 \%$ ). Females outnumber in certain organizations and groups such as BCCs, SHGs, fish vendors forum, DCMS, KLCA, prayer group, pious associations, catechism, teachers, while males dominate in some other organizations and groups like fishermen forum, AA groups, KCSL, KCYM, sports associations, arts associations, trade unions and political organizations. In the case of SHGs and fishermen forum, the difference in percentage points is rather large.

Table No.48i: Sex-wise involvement in faith-based and social organizations of the age group of 18-60 years

| Values | F | M | Grand Total | $\mathbf{F}$ | $\mathbf{M}$ | Grand <br> Total |

## Sex-wise Involvement in Faith-based and social organizations among the members of the age group above $\mathbf{6 0}$ years

Among the members of the age group above 60 years (Table No 48b and 48ii), majority of the people (60.78\%) are not associated with any of the organizations and groups. Major sections of people are associated with BCCs ( $7.64 \%$ ), pious associations ( $7.24 \%$ ) and political organizations ( $7.09 \%$ ). Other major organizations and groups with which people are associated are SHGs (4.33\%), fishermen forum ( $4.26 \%$ ) and prayer groups ( $3.63 \%$ ). Females
dominate in organizations and groups such as SHGs, Vanitha vedis, Fish vending women's forum, DCMS, prayer groups, pious associations and catechism teachers' groups, while males outnumber in BCCs, fishermen forum, AA groups, KLCA, sports and arts associations, trade unions and politics.

Table No 48ii: Sex-wise Involvement in Faith-based and social organizations among the members of the age group above 60 years

## FAITH LIFE OF INDIVIDUALS

Three indicators are included in the survey to measure the faith life of the individual respondents. Participation in Holy Mass, participation in Catechism class and participation in the Sacrament of Reconciliation are selected for the purpose.

## Participation in Holy Mass

According to Table No.49, a large majority of the people participates in Holy Mass once in a week (70.33\%), followed by those who participate in it 2-3 days a week (10.62\%) and those who go for Mass daily (9.73\%). 2.56\% of people attend annual Holy Mass, while some persons (2.08\%) never go for Mass. (Chart No.49)

Chart No.49: Participation in Holy Mass

Across the Foranes, it is found that Thoothoor forane stands first in the case of those who participate in daily mass $(3.38 \%)$, followed by Pulluvila $(2.26 \%)$. In the case of those who attend Mass 2-3 days a week, Pulluvila forane is the topper ( $2.41 \%$ ), followed by Thoothoor (2.28\%) and Valiyathura (1.91\%).

## Sex-wise participation in Holy Mass in the age group between 5-18 years

In the age group between 5-18 years (Table No 49a and 49i), the majority ( $69.17 \%$ ) of people attend Mass once in a week. A smaller section (13.03\%) is daily participants of Holy Mass, while $12.22 \%$ go to Mass $2-3$ days a week. Females dominate in the case of those who daily go to Mass and those who go 2-3 days a week, while males are more in the case of those who attend Mass weekly once or yearly once and those who never attend Mass.

Table No.49i: Sex-wise participation in Holy Mass in the age group between 5-18 years

| Row Labels | $\mathbf{F}$ | $\mathbf{M}$ | Grand Total |
| :--- | :--- | :--- | :--- |
| Daily | $6.94 \%$ | $6.09 \%$ | $13.03 \%$ |
| 2-3 Days a week | $6.48 \%$ | $5.74 \%$ | $12.22 \%$ |
| Weekly | $32.79 \%$ | $36.38 \%$ | $69.17 \%$ |
| Yearly | $0.38 \%$ | $0.49 \%$ | $0.88 \%$ |

| No data | $1.98 \%$ | $1.99 \%$ | $3.97 \%$ |
| Grand Total | $48.88 \%$ | $51.12 \%$ | $100.00 \%$ |

## Sex-wise participation in Holy Mass in the age group between 19-60 years

In the age group between 19-60 years (Table No. 49b and 49ii), the largest section ( $72.34 \%$ ) consists of those who attend Mass once in a week, followed by those who participate daily ( $8.34 \%$ ). Females outnumber males in the case of daily Mass goers and those who attend Mass 2-3 days a week, while males dominate in the case of those who participate weekly once, yearly once and those who never attend.

Table No.49ii: Sex-wise participation in Holy Mass in the age group between 19-60 years

| Row Labels | Female | Male | Grand Total |
| :--- | :--- | :--- | :--- |
| Daily | $5.90 \%$ | $2.47 \%$ | $8.37 \%$ |
| 2-3 Days a week | $6.43 \%$ | $3.82 \%$ | $10.24 \%$ |
| Weekly | $32.56 \%$ | $39.78 \%$ | $72.34 \%$ |
| Yearly | $0.79 \%$ | $2.36 \%$ | $3.15 \%$ |

| 12 | $0.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| Grand Total | $48.11 \%$ | $51.89 \%$ | $100.00 \%$ |

## Sex-wise participation in Holy Mass in the age group between >60 years

In the age group above 60 years (Table No. 49c and 49iii), majority of the people ( $58.45 \%$ ) are weekly Mass goers, while the next larger section participates in Holy Mass daily (16.81\%). In this age group, females dominate those who attend Holy Mass daily, those who go for Mass 2-3 days a week and those who never go for Mass, while more males than females participate in Mass weekly once and yearly once.

Table No.49iii: Sex-wise participation in Holy Mass in the age group between $>60$ years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |

| Grand Total | $\mathbf{4 9 . 4 1 \%}$ | $\mathbf{5 0 . 5 9 \%}$ | $\mathbf{1 0 0 . 0 0} \%$ |

## Participation in catechism classes

Participation in catechism classes is a concern of the children and youth and so $75.48 \%$ of the total respondents are excluded from further analysis as they might be above or below the age of catechism students. A sizeable section does not provide any data on this aspect (11.95\%). Of the remaining, major section $(5.85 \%)$ is regular in catechism classes, while $1.71 \%$ occasionally participates and some people never participate. (Table No.50) (Chart No. 50)

Chart No. 50: Participation in catechism classes

## Sex-wise participation in Catechism classes among the members of the age group 5-15 years

According to Table No. 50a and 50i, a large majority of the children attend catechism classes (74\%). Some children go to catechism classes occasionally ( $5.42 \%$ ), while some never go to catechism classes ( $5.30 \%$ ). In this age group, some report that this question is not applicable to them (10.35\%). In all categories in this age group, boys dominate girls in the case of participation in catechism classes.

Table No.50i: Sex-wise participation in Catechism classes among the members of the age group 5-15 years

| Row Labels | Females | Males | Grand Total |
| :--- | :--- | :--- | :--- |
| Regular | $36.74 \%$ | $37.26 \%$ | $74.00 \%$ |
| Occasional | $2.35 \%$ | $3.07 \%$ | $5.42 \%$ |
| Never | $2.30 \%$ | $3.00 \%$ | $5.30 \%$ |
| Not Applicable | $4.95 \%$ | $5.40 \%$ | $10.35 \%$ |
| No data | $2.41 \%$ | $\mathbf{2 . 5 2 \%}$ | $4.92 \%$ |
| Grand Total | $\mathbf{4 8 . 7 5 \%}$ | $\mathbf{5 1 . 2 5} \%$ | $\mathbf{1 0 0 . 0 0} \%$ |

Sex-wise participation in Catechism classes among the members of the age group 16-25 years
It is reported that for the largest section of youth of 16-25 years (Table No 50b and 50ii), almost half the members ( $49.31 \%$ ), the largest section, said that it was not applicable to them. Of the remaining people, the major section ( $26.08 \%$ ) participates in catechism classes regularly. While a smaller section attend classes occasionally (7.50\%), a sizeable section never attend classes.

Table No.50ii: Sex-wise participation in Catechism classes among the members of the age group 16-25 years

| Row Labels | F | M | Grand Total |
| :--- | :--- | :--- | :--- |
| Regular | $13.84 \%$ | $12.24 \%$ | $26.08 \%$ |
| Occasional | $2.73 \%$ | $4.77 \%$ | $7.50 \%$ |
| Never | $4.30 \%$ | $6.48 \%$ | $10.78 \%$ |
| Not Applicable | $25.58 \%$ | $23.73 \%$ | $49.31 \%$ |
| No data | $3.18 \%$ | $3.15 \%$ | $6.33 \%$ |
| Grand Total | $49.63 \%$ | $50.37 \%$ | $100.00 \%$ |

## Participation in the Sacrament of Reconciliation

Similarly, Table No. 51 deals with sacrament of Confession and people's participation in it. Setting aside the children who had not taken first communion (25.48\%) and some people who did not provide information (11.86\%), it is found that the largest section ( $26.67 \%$ ) makes Confessions only once in a year. While a sizeable section (24.08\%) makes confessions occasionally, a smaller section makes monthly Confessions (5.16\%). Several people never make sacramental confessions ( $6.76 \%$ ).

Chart No.51: Participation in the Sacrament of Reconciliation

## Sex-wise participation in Confession among the members of the age group between 10-18 years

In this age group of 10-18 years (Table No 51a), the largest section (35.58\%) confesses only occasionally, followed by those who make it monthly ( $30.66 \%$ ) and those who make it yearly once ( $15.70 \%$ ). $2.01 \%$ never makes Confession. Females dominate those who make monthly confessions, while males outnumber in the case of those who make occasional and annual confessions. Males again outnumber in the case of those who never confess.

Chart No.51a: Sex-wise participation in Confession among the members of the age group between 10-18 years

## Sex-wise participation in Confession among the members of the age group between 19-60 years

In the age group of 19-60 years (Table No 51b), the largest section (41.26\%) makes occasional confessions, followed by those who confess yearly once (32.84\%), and those who make monthly confessions (13.49\%). $5.50 \%$ of people in this age group never makes sacramental confessions. Except in the case of those who never make confessions, females dominate in all other categories.

Chart No.51b: Sex-wise participation in Confession among the members of the age group between 19-60 years

## Sex-wise participation in Confession among the members of the age group above 60 years

In this age group above 60 years (Table No 51c), even among the seniors, the largest section ( $37.21 \%$ ) makes occasional confessions, followed by those who make confessions yearly once ( $28.71 \%$ ) and those who make it monthly once (17.35\%). Females dominate in the case of those who make occasional and monthly confessions, males outnumber in the case of those who make confessions once in a year and those never making it.

Chart No.51c: Sex-wise participation in Confession among the members of the age group above 60 years

In this chapter, only the observations reflected from the available data are narrated in a very simple and clear manner for any lay person to understand. This will help the reader to assess the situation without any bias. Tables and charts are added appropriately. In the next chapter, findings and discussions together with some recommendations are presented.

## CHAPTER 3

## FINDINGS AND RECOMMENDATIONS

In the second chapter we have described the existing situation of the families and individuals in the Latin Archdiocese of Trivandrum based on the data made available through a household census survey conducted in 2011. As mentioned earlier in this report, the survey covered 58501 families ${ }^{1}$ and 217821 individuals living in 8 foranes of the Archdiocese. Those families or individuals who have shifted to Pentecostal and other non-Catholic denominations are excluded from this survey.

## Population

The Archdiocesan population of $2,17,821$ is $0.65 \%$ of the total Kerala population of $3,34,06,061$ and $6.58 \%$ of the Trivandrum district population of $33,07,284$ (National Census 2011).

A summary of the demographical details of the Latin Archdiocese of Trivandrum

| Foranes |  | Fami- <br> lies | \% of total <br> Families | Individuals |  |  | \% of Total | Sex <br> Ratio | Family <br> Size |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | Anchuthengu |  |  | Femal | 10202 <br> $(59.56 \%)$ | 9585 <br> $(48.44 \%)$ | 19787 | $9.08 \%$ | 939.52 | 33.88

Pulluvila Forane is the biggest one in terms of its numbers (48986) and percentage share (22.49\%), followed by Thoothoor with 38791 ( $17.81 \%$ ) and Valiyathura with 32331 ( $14.81 \%$ ).

1 Family identified for the purpose of this survey is a unit consisting of husband and wife together with unmarried children. If one of the couple is no more and the other partner lives alone or lives with one of his/her children or relatives, that person is considered as a dependent on another family.

Sex Ratio is 939.85, which is lower than the Kerala ratio of 1084 females for 1000 males and Trivandrum District ratio of 1088/1000 and Indian sex ratio of 940/1000 (National Census 2011). This indicates the highly disadvantageous dimensions of gender in the Trivandrum Archdiocese Latin Catholic society.

The family size is 3.72 , which is also substantially lower than the Kerala levels (5) ${ }^{2}$. When compared to the families in south Kerala, families of Christian communities in Kerala and families in the OBCs in Kerala, the family size of the Latin Archdiocese is the smallest.

## Housing

Though a majority of the families have their own house ( $68.21 \%$ ), 12914 families are homeless ( $22.07 \%$ ) in the Archdiocese. Though a large number of families have concrete houses, several families live in huts (2.03\%), thatched ( $5.02 \%$ ) and sheet-roofed houses (13.11\%). Together they are $20.76 \%$ (11794). When they are added to the homeless families, it comes near to $42 \%$ (24708) which is a cause for concern. Majority of the families have smaller houses with $1-4$ rooms ( $52.15 \%$ ). In majority ( $55.24 \%$ ) of the houses, single families live alone, though there are several houses in which two (18.42\%), or more than two families ( $4.26 \%$ ) live. While large section of households accommodates 1-4 members, there are households having 5-8 members ( $29.04 \%$ ) and those having more than 8 members (4.10\%) ${ }^{3}$.

The picture stated above shows that several hundred families live without a house or live with a house which they would like to replace with a more livable and durable one. Housing is a major area where attention is to be given to address the problems of these families. Studies show that $95 \%$ of the families in Kerala have own houses. There are not much variations in this regard between classes of BPL and APL or backward and forward communities. The real reasons for many of the families for not having their own home need to be further examined. Based on this enquiry, the families who need external support and the type of support they need can be ascertained. From this stage, programs may be planned at the short term basis and long term basis, with the active participation of the communities, local bodies, Government departments and national and international non-governmental donor organizations.
Parish communities may be encouraged to get involved in this case with direct financial support and facilitation of local and external sponsorship for mobilizing resources. Saving schemes also may be thought of to help the homeless to save for house construction. Matching grants or interest free loans may become a practical support to go ahead with their dream of a home.

If some families are found financially capable of building their homes, these families may be supported with proper guidance and motivation.

## Land

In the Archdiocese, though majority of the families, that is, $61.15 \%$, have their own land, $20.16 \%$ of families are landless (11794). Among them, the largest section of families ( $48.21 \%$ ) has very small plots ( $1-5$ cents). Families having bigger area of land are comparatively small (17.58\%).

While most of families have their land registered in the name of the male adult members ( $32.62 \%$ ), smaller section of families either have their land registered in the name of the females (17.10\%) or jointly in the name of male and female partners ( $15.86 \%$ ).

The proportion of ownership of land among the families of the Archdiocese is also very low in comparison with the Kerala situation of land ownership, where $82.8 \%$ of the people have their own land! In the case of size of land owned by the Archdiocesan people, the situation is miserable with major sections owning below 15 cents of land,

[^1]while even the average land owned by the poorest sections in Kerala is 38.2 cents. ${ }^{4}$ On an average, a Christian family in Kerala owns 126.4 cents of land, backward communities in general own on an average 62.6 cents of land and Tribals own 138.7 cents per family.

The issue of landlessness is at the root of the problem of homelessness. Since land asset is the foundation for any progress for the families concerned, the issue requires high attention from all concerned stakeholders. It is recommended that the same approach suggested in the case of homelessness may be adopted to address this problem, too.

In a world clamouring for gender equality and equity, it is fair and just that family land is registered jointly in the name of both the partners. As the survey shows that the present realities are not favourable to gender equality, policies and strategies may be placed for encouraging joint registration of land and other immovable assets to promote gender balance.

## Energy consumption

A considerable majority ( $57.40 \%$ ) use traditional stove using fire wood, may be, together with other sources. This has two major negative impacts on the health of women and girl children and on environment. The survey clearly shows that the people in the Archdiocese rarely resort to non-conventional and renewable sources of energy. This has to be read with the Kerala situation of $48 \%$ of families using firewood as fuel for cooking. ${ }^{5}$

Therefore, it is advisable to plan programs to enhance awareness on environment and harmless sources of energy. It may also be possible to design some programs to link families with Government schemes to promote alternative sources of energy.

## Other economic conditions

The survey tried to assess the economic conditions of the families by understanding their position with regard to ownership of home appliances, vehicles, fishing assets, other occupational assets and trade and commerce. The findings are revealing.

In the case of home appliances, fan (67.32\%), mixey (60.10\%) and fridge (41.08\%) are the most popular home appliances among the families. It is found that one fifth of the families do not have any of the listed appliances (20.46\%).

In the case of vehicles, a large majority of the families (71.04\%) do not have any of the listed types of vehicles. Among the rest, two-wheeler owners are the largest section (17.65\%), againt the Kerala proportion of $22 \%$ (2004). In the case of fishing assets, a vast majority of families (88.73\%) do not possess any one of the listed fishing equipments.
In the case of other occupational equipments, a larger section of families ( $89.28 \%$ ) does not possess any other occupational equipment. Sewing machines (7\%), auto-rikshaws ( $1.65 \%$ ) and cameras ( $0.65 \%$ ) are owned by a small section of families.

A very vast majority of families ( $91.29 \%$ ) does not have any trade and commercial activities.
The above findings are clear indicators of very low level of financial status and asset base of the families in the Archdiocese.

In this context, it is important to plan policies, strategies and programs for enhancing the asset base and source of livelihood, in addition to the promotion of land and house ownership. Since these items enhance the quality of living to a great extent, and these do not require very high level of financial base, it may be easier to promote some saving schemes, income generating units and promotion of thrift among the families. Family budgeting is recommended here as one of the most effective and realistic solutions to promote savings and create financial discipline.

[^2]
## Agriculture

Vast majority of families ( $88.18 \%$ ) does not have any agricultural activities or cultivation of crops. This includes families who do not even grow a single vegetable in their premises.

Though in a fishing community, intense agricultural activities are not part of their culture and livelihood sources, it is important in present context that each family contributes towards the production of food for their use, at least in a small volume. The quality of available food in the market is grown using pesticides and other harmful chemicals, the health of the family can be protected to a certain extent by growing some of the food materials like vegetables, coconuts, eggs, meat, milk, etc. Some medicinal plants can also be added to this list. Though it is true that the families in the survey do not posses large plots of land, even a small household premise is sufficient to grow vegetables or rear some animals for milk or meat. Agriculture is important to cultivate a culture of tolerance, patience, planning, discipline and systematic life and work.

Therefore, it is strongly recommended that the families and individuals need to be oriented and encouraged towards agriculture, starting from their household premises. The Government has several schemes for the promotion of agriculture.

It is also advisable to encourage some of the capable and interested families to try commercial agriculture as a major source of livelihood.

## Spending Pattern

Families in the Archdiocese spend moderately for food, less than moderately for education and more than moderately for medical care. The shape of data points to a lack of budgeting habit according to pre-designed plan and set values and priorities among the people with regard to spending their hard earned money. Many families do not provide accurate information regarding how they spend and for what they spend. Spending patterns and prioritization are also related to the financial status of the families.

Lack of family budgeting may lead to this situation and so it is recommended that massive and intensive awareness and training programs may be planned and implemented in the communities to streamline the spending pattern of the families. This is expected to encourage saving habit also, which is closely related to spending habits. Since budgeting is primarily prioritizing, the recommended program will lead to the improvement of many other aspects of life like health and education.

## Debts

Majority of the families ( $69.01 \%$ ) has debts of some volume. Among those who have debts, the largest section of the families ( $29.47 \%$ ) have lowest category of debts (below Rs.50000/-), followed by those (20.86\%) having higher amounts of debts (6-10 lakhs).

Debts are blocks for regular progress. The fact that majority has some kind of debts is a matter of concern. Debts also indicate financial weakness of families and communities. It is suggested that this problem needs further probing as to the purpose of debts, the manner in which money borrowed is spent, categories of lenders, interest rates and other conditions of loans, etc.

Since this problem is related to financial discipline, it is suggested to exactly identify and give training on how to address their debts. Recommendations for creating financial discipline are applicable here also.

## Ration Cards

A vast majority ( $85.40 \%$ ) of the families have ration cards. This is a better situation. However, $14.60 \%$ families who do not have a ration card which is one of the most important entitlements of a family of citizens. They need to be encouraged to secure their ration cards. Social workers may be directed to help this category of families in the parishes.

## APL/BPL Registration

A simple majority of families are registered under the APL category ( $55.09 \%$ ), while only $22.77 \%$ are in the BPL category.

This statistics need to be checked through other sources to ascertain if all the APL and BPL families are categorized by set criteria or by some malpractices. This is necessary in the context of the survey findings that other economic indicators show that majority of the families in the Archdiocese is very poor.

## Medical Insurance

The survey shows that large majority of families ( $64.18 \%$ ) does not have any of the health insurance policies. Health insurance is a major social security measure in the present context of increasing morbidity among the people.

Massive awareness campaign may be initiated to promote reliable medical insurance schemes among the people. It is even possible to start Archdiocesan Insurance scheme under the Social Action Ministry of the Archdiocese. Alternatively, the existing program for the medical insurance may be strengthened to cover the families who do not have it.

## Sanitary Latrines

In the Archdiocese, large majority of the families ( $80.74 \%$ ) has attached toilets, against the Kerala State average of $91.95 \%$ (2004). However, a sizeable section depends on public toilets (10.55\%-6172), while a substantial section ( $5.89 \%-3446$ ) goes to open air for defecation.
The data gives a pointer that if effective programs are designed and implemented, it may be possible to declare the Archdiocese free of open air defecation by addressing the problem of $5.89 \%$ families. Local mobilization of resources at the community level, linkages with Panchayat and Government schemes and some sponsorship may work well in this regard.

## Source of Drinking Water

Water connection at home (28.15\%), bore well (20.29\%), own well (20.25\%), water from nearby houses (11.38\%) and public well ( $6.76 \%$ ) are the major sources of drinking water for the families in the Archdiocese. It is found that $4.57 \%$ of families purchase water for drinking (2674) at commercial rates.

While it is important to address the quality of drinking water from the above sources, the major issues under this subject is the plight of families purchasing drinking water daily from commercial suppliers at the price fixed by them without any official control. Data shows that, of the $4.57 \%$ of the families purchasing drinking water, $78.53 \%$ of them are seen in Kovalam Forane and in particular in a particular parish in the forane, Vizhinjam.
Supply of pure drinking water to all the citizens is the major responsibility of the local bodies and Governments. They may be pressurized to work out a practical and effective plan to provide drinking water to the people. The Archdiocesan influence and people's active participation in the advocacy programs may bring in success in this regard. This may rightly become politically sensitive and the solutions may come from that strategy.
At the same time, the people have a primary responsibility to ensure that they do not waste and pollute available water sources. Regular awareness programs through all possible routes are required to enhance awareness and responsibility among the people in this regard.

## Drainage and Waste disposal

It is worrying to note that a large section of people ( $40.21 \%$ ) does not have any place to drain their waste water. It implies that they just let go their waste water in the open space. This has to be read with the revelation that the largest section $(39.03 \%)$ dumps their solid waste into the open air and another large section throws away their waste into the water sources ( $32.41 \%$-18959), mostly sea and streams or unused wells and ponds. When their immediate environment is polluted, the nearby water sources are polluted.

This issue needs to be taken very seriously for all obvious reasons. The most important reason behind this situation is the lack of responsibility and civic sense among the people to keep water sources clean and pure. Governments and local bodies are criminally negligent in this regard.
Enhancing awareness, training and fixing responsibility with the people, may be linked to advocacy programs to invite the attention of the Government and local bodies.

## Education

Under this subject, the survey placed three indicators for review, such as study facilities available at home, parents' monitoring and community support to students. Almost half the number of families has students studying in schools or colleges or in other institutions. Largest section of families (34.21\%) has tables and chairs for the children to study at home. Substantial number of families has study time arranged for children ( $25.82 \%$ ) and study materials made available ( $23.06 \%$ ). This implies that a sizeable section does not care for their children's studies.
Though very large numbers of families ( $44.50 \%$ ) monitor the study of their children, there is a considerable number of families who attend to this aspect occasionally ( $7.77 \%$ ) or only during exam time ( $1.31 \%$ ) and who are unable to monitor.

Regarding community support to the children for their study, only very small section of families receives some kind of support. Excluding $50.80 \%$ of families where no one is applicable to this support, a large section ( $33.10 \%$ ) does not receive any support from the community.

While education is the most important aspect of sustainable development of the families and communities, it does not receive deserving attention from the stakeholders.
It is therefore recommended that unprecedented attention is required to address the problems in education sector among the community members. Many other points related to education are included in this survey, which will be dealt with in the coming pages. It is very important because education is closely and directly related to all other aspects of life and work like employment, income, land ownership, house ownership, and ownership of other assets, social status, gender balance, and even faith life. Integrated long term and short term programs are required to address the issues.

## Faith Life

Three important aspects are reviewed in the survey such as P O C Bible at home, family prayers and participation in BCC meetings. A very large section of families ( $91.61 \%$ ) has P O C Bible at home and only very small section does not have it. A vast majority of families ( $81.92 \%$ ) always make family prayers at home. A large majority of families participates in BCC meetings (71.74\%)
In this pleasant context, it is possible to make a goal for making $100 \%$ families with complete P O C Bible or Catholic bible, family prayer at home and participation in BCC meetings.

## Death within three years

In a vast majority of families ( $88.84 \%$ ) in the Archdiocese, no death occurred during the last three years. There are many reasons for death in the remaining families such as death due to deceases (3.54\%-2071), old age (3.34\%), normal death $(0.84 \%)$, accidents ( $0.75 \%-438$ ), infant death ( $0.54 \%$ ), suicide ( $0.34 \%-198$ ) and murder ( $0.05 \%-28$ ).
Though normal death and death due to old age can not be prevented by any means, it is possible to eliminate deaths due to accidents, infant death, suicide and murder.

## SECTION TWO : Individuals

## Population

The survey included 217821 persons in 58501 families in 8 Foranes in the Archdiocese of Trivandrum. There are more males ( $51.55 \%-112287$ ) than females $(48.45 \%-105534)$ in the Archdiocese. Sex ratio in the Archdiocese is 939.85. The family size is 3.72 .

The largest section of people in the Archdiocese belongs to the age group of 22-40 years with 73403 persons $(33.70 \%)$, followed by the age group of 41-60 years with 48490 ( $22.26 \%$ ). Children under the age group of 0-5 years are 20895 (9.59\%). Senior citizens in the age group above 60 years are only $8.19 \%$ (17842). This is an advantageous position. This means that the communities are young and productive. The category of senior citizens is comparatively small ( $8.10 \%$ ).

Therefore, it is important to direct productive sections to be involved in productive areas of life and work. Their education, employment, health and related issues are very important.

## Dependency Ratio

The productive and 'independent' age group (22-60 years) takes care of the dependent age group (0-21 and 60 and above). That is, 96130 persons ( $44.13 \%$ ) depend on 121893 persons ( $55.97 \%$ ). Thus, the dependency ratio is 0.78 . This ratio, when compare to the dependency ratio of Kerala ( 0.42 ), India ( 0.62 ), Bangladesh $(0.72 \%)$ is critically vulnerable.

## Blood Group

In general, majority of the population in the Archdiocese does not know their blood group (51.06\%). In the case of people in the age group of 18-45 years, almost half the population ( $48.27 \%$ ) does not know their blood group.
Blood donation is a laudable activity and the communities shall be encouraged to donate blood to the common pool and make available to those who need it in emergencies. Large numbers of people especially among those in the age group of 18-45 years are not aware of their blood group.

Therefore, awareness camps together with blood donation camps may be conducted in collaboration with department of health services and other stakeholders.

## Marital Status

In general, a large section (48.62\%) is found as married, while a smaller section (38.16\%) is unmarried. There are $3.76 \%$ of widows. At the same time, marital status of the people above 40 years shows that only $2.43 \%$ is unmarried while a large section (79.47\%) is married.

## Life Status

It is revealed that major categories are workers (26.06\%), students (22.16\%) and the unemployed (20.82\%) in the Archdiocese, while there are only $4.68 \%$ employed persons.

This is an indication of the low life profiles of the people. Therefore, there is a need to enhance the overall status of the individuals and communities. The issue again is related to education and skills as well as financial status. Plans also shall be related to the enhancement of education and skill development.

## Educational Qualifications

At the Archdiocesan level, the largest section of people have education up to the level of High School (20.74\%), followed by those who completed Upper Primary level (UP) (13.75\%) and those with Lower Primary level (LP)
$(11.93 \%)$. There are only a few persons who have reached higher levels. The literacy rate is $90.61 \%$, which is below the Kerala state average ( $93.91 \%$ ).

Since this is definitely a cause for concern to the individuals and communities, very urgent and intensive planning may be done to enhance the education levels. Only educated people will get more gainful employment and income, which alone will enhance their asset base including land and house and social status. It is noted that at the root of all negative situations in the communities, this low level of education is found. Lack of proper education is the crucial problem and programs to address this problem shall be planned and implemented at a priority base.

Further, the above analysis shows that males are more in lower levels than females in two different age groups. With regard to higher and technical education, females are more in the age group of 16-26 years, while males are in a more advantageous situation than females in the age group of $26-35$ years.

## Medium of Education

In general, majority chose Malayalam medium for their education (56.09\%), while only $15.73 \%$ of people opted for English, followed by those who took Tamil (12.68\%). English is the most preferred medium in the age group of 5-15 years, while Malayalam is the medium of instruction for two higher age groups.

## Subjects Opted for studies after 'Plus Two’

In the case of those who have gone above HSS, most of the persons preferred Science (3.97\%), Arts (2.77\%), Commerce ( $2.56 \%$ ), Literature ( $1.50 \%$ ) and Engineering ( $1.40 \%$ ). However, it is noted that a large majority of people ( $72.94 \%$ ) do not find the question applicable to them, may be because, they have not gone beyond 'Plus Two' level of education. A sizeable section does not provide any data on this ( $8.68 \%$ ).

Though the subjects selected have scope for employment and higher studies, their size is very small. Even smaller sections are in professional courses and technical education. More males are found to have opted for professional subjects and courses than females.
This subject is also related to the general educational level of the people. Education policy of the Archdiocese shall integrate this aspect of selecting subjects for study.

## Preferred Educational Institutions

State aided educational institutions (36.28\%), State unaided institutions (18.74\%) and State Government institutions $(16.83 \%)$ are the most preferred educational institutions. In all these categories, males are dominating. In the age group analysis also, State aided institutions are preferred by all the three age groups.
Therefore, it is important to think about the quality of learning and teaching in aided institutions, including those managed by the Archdiocese.

Programs and policies shall be made to enhance the academic excellence and character formation. Teachers training and refresher courses shall focus on these aspects. Since it is becoming clear that education is the only one subject which is closely related to all the important dimensions of the socio-economic development of the communities, no stone shall be left unturned in the process of enhancing the qualitative and quantitative aspects education.

Local communities need to be responsibly linked to the management of Schools in their localities.

## Employment Sectors

Data show that majority of the people is unemployed ( $55.14 \%$ ). Among others, the major section is the selfemployed in various sectors. It seems that the self-employed may include fishermen, fish vending women and some others in the unorganized sectors. Very small section is employed in State government organizations ( $2.71 \%$ ). The presence of the community in public sector organizations is nominal ( $0.67 \%$ ).

In the sex-wise analysis also, the largest sections are the self-employed people, distantly followed by those employed in Gulf countries in all age groups. In the age group analysis, males have acquired a definite dominance over females. Except in the case of public sector and private service sector, males have domination in all age groups.
The picture is far from desirable. In powerful and influential positions and employment sectors, Archdiocesan members are not at all a recognizable section.

Since this situation also is closely related to educational levels and standards, the education policy shall consider seriously the means and ways to promote education in general and higher and technical education in particular. As mentioned above, qualitative and quantitative aspects are very important.

## Career Sectors/ employment positions

When 32 jobs and careers are considered, the Archdiocesan people are found more in three low level jobs and employments such as fishermen ( $15.10 \%$ ) and house managers ( $9.98 \%$ ). Largest section is unemployed ( $36.01 \%$ ). Wage labourers ( $3.68 \%$ ), the self-employed ( $2.45 \%$ ) and fish vendors $(2.42 \%$ ) are found in large numbers.

Fishermen, house managers and wage labourers are the largest sections in the community in all age groups. In the age group analysis, it is found that males dominate in all the three age groups in certain employments such as engineers, managers, accountants, IT Professionals, peons, priests, police, jawans, media persons, artists, technically skilled jobs, unskilled labour, artisans, drivers, fishers, wage labourers and pensioners. Females are found more in a few employments and jobs such as teachers, fish vendors and house managers. They are also more among the jobless. The nominal difference in percentage points is clearly visible.
This situation should be revealing to all stakeholders. People under consideration are nowhere near the higher jobs and positions. The reasons behind the pertinent backwardness are gradually coming up in the survey results.

Since this aspect is important and is closely related to educational levels and standards, the focus again remains on the need to enhance education and skill development.

## Diseases

Though large majority of the population is free from the diseases listed in the survey, life style diseases like rheumatic ( $4.38 \%$ ), BP (3.85\%), diabetes (3.55\%), allergy (1.99\%) and heart problems (1.88\%) are found among some people of the Archdiocese.

It is specially noted that $0.12 \%$, that is, 262 persons are affected by HIVISTD in the Archdiocese. The fact that this figure is obtained in an open survey, it is reasonable to assume that the actual number of people affected by these diseases would be larger.

In the age-wise and sex-wise analysis, men are found in an advantageous position in the matter of diseases. In all age groups, more females are affected by diseases than men. However, in the case of jaundice, T B and skin diseases, men are affected more in all the age groups. In the case of thyroid and rheumatic, more females are affected in all the age groups. While cancer is found equally among men and women in the first three age groups below 35 years, it is found more among males in the age groups above 36 years. Similarly, HIV/STD is found more among females in all the age groups above 7 years, while it is found more among males in the age group of 0-6 years.
In the context of the findings, health services shall focus more on life style diseases and HIV/STD. It is also noted that even in challenging physical conditions, majority of the people is free from any of the diseases. Further examination of this fact may be useful in developing a health policy for the Archdiocese.

## Bad habits

In general, large section of people is ( $83.13 \%$ ) reportedly free from any of the listed bad habits such as drinking alcohol, smoking, betel leaf chewing, drugs and consumption of pan masala. Among those who have bad habits,
the ranking goes starting from alcoholics (10.66\%), betel leaf chewers (6.37\%), smokers ( $2.55 \%$ ), pan masala users ( $1.45 \%$ ) and drug abusers ( $0.10 \%$ ).

In the age group and sex-wise analysis, it is found that males dominate in all the bad habits in all age groups.
When it comes to senior citizens, almost one third of the people are affected by one or the other bad habits.
According to the data available, the situation is far from worry. If the habits are reported as real habits, (with addiction as the major ingredient), the available data may be reliable.

However, caution is invited to the fact that the listed bad habits are invading younger generations and females.
Health policy shall integrate these aspects and propose effective counseling and de-addiction programs made available at low cost to those who are in need.

## Disabilities

It is found that a very large section of people ( $91.86 \%$ ) does not have any disability. Among others, major disability is partial vision (2.44\%).

Community-based rehabilitation programs may be strengthened in favour of the disabled persons. A separate list of such people may be culled out from this survey and special projects may be planned and implemented with the local support.

## Involvement in Church and other organizations

Majority of the people ( $65.45 \%$ ) do not have any social and faith-based organizational participation. Among the others, the largest section is associated with political organizations (7.33\%), followed by SHGs ( $6.06 \%$ ) and BCCs ( $6.04 \%$ ), fishermen forum ( $4.76 \%$ ), pious associations ( $3.70 \%$ ) and prayer groups ( $2.19 \%$ ).

Since membership, association or affiliation of a person with any of the social or faith-based organizations is considered as a sign of civic sense, social contacts and proactive personality, the small percentage of persons with such associations is a case for concern.

Membership in local social and Church organizations shall be promoted through the parishes, since they are the nurseries for people to develop their capabilities. This promotion is more fruitful at the younger ages. However, their mentors need to be well oriented and strong positive personalities. Leadership and communication skills as well as other important soft skills can be promoted through these organizations from a young age.

## FAITH LIFE OF INDIVIDUALS

## Participation in Holy Mass

Large majority of the people participates in Holy Mass once in a week ( $70.33 \%$ ), followed by those who participate in it 2-3 days a week ( $10.62 \%$ ) and those who go for Mass daily ( $9.73 \%$ ). While more males are found faithful in attending weekly Holy Mass, more females are participating in daily Mass.

## Participation in catechism classes

Excluding a large section $(75.48 \%)$ of the total respondents who may be above or below the age of catechism students and a sizeable section that does not provide any data on this aspect, only a small portion of the remaining persons $(5.85 \%)$ is regular in catechism classes. However, in the age group analysis, it is found that large majority of the young people are regular in catechism classes during the earlier years ( $74.00 \%-5-15$ years) than in latter years (26.08\%)-16-25 years.
The data thus show that there are very large numbers standing outside the purview and benefits of catechism classes. Motivational programs and parental orientation may be strengthened to cover all children into catechism program.

## Participation in the Sacrament of Reconciliation

Most of the people who make confessions make them once in a year ( $26.67 \%$ ). Some others make it occasionally ( $24.08 \%$ ) and some never go for sacramental confessions ( $6.76 \%$ ).

This does not seem to be a desirable situation. Pastoral policies and programs may be fine-tuned towards addressing problems like this.

## Concluding remarks

At the end of the analysis of the entire data about 58501 families and 217821 individuals, most of the findings are eye-openers, while some are confirmations of the existing understanding of the situation. It is found at the outset that one fifth of the families are both homeless and landless, while majority of the families live in very small plots of land and in small houses. The family size is very small, that is, lower than the Kerala State average. Sex ratio is also explicitly low in comparison with Kerala State. The level of environmental awareness is not all desirable. Use of renewable and nonconventional energy sources is nominal.
The survey findings clearly show that the educational and employment conditions of the families and people are far from desirable. Parish communities covered in the survey are economically very poor. Though, in the health sector, people have seemingly a better status, it is important to note the increase in life style diseases and HIV/STD. Water availability and management is poor among the communities. Waste disposal and drainage systems lack proper direction. Sanitary latrines are not available to all households. Several families still go for open defecation.

Caution is demanded by the statistics with regard to bad habits among the young people and females. Civic sense and participation in secular and faith-based organizations is found very low. People in general are not interested in church related publications. Pastorally, families are found better in the possession of Bible, participation in Holy Mass and in BCCs, while individual members lag behind in participation in Holy Mass, catechism classes and sacramental confessions.

The situation of individual members of the Archdiocese is not always similar to the family situation. Large section of people belongs to the productive age group. Majority of the individuals do not know their blood group and their voluntary donation scope is limited. There are several hundred widows and people living together without proper marriage. Major sections of people are in very low levels of work and life. While seniors have educated in Malayalam medium, most of the younger people have been studying in English medium. Most of the people have chosen Science, Arts, Commerce and Literature as subjects for their study after 'Plus Two' levels. There are very small proportions of people in professional studies including IT field, medicine, engineering, management, etc. Most of the people have depended on aided educational institutions. Most popular employment sectors are that of fishermen, house managers and wage labourers. Most of the people do not have any diseases in general. However, life style diseases are on the increase, even among the younger generation. Most of the people are free from bad habits, while drinking, betel leaf chewing and smoking are the major bad habits among the older generations. The proportion of disabled people is small and the number of disabilities among them is also limited and seems of low seriousness.

People in the Archdiocese are not actively associating with social and faith-based organizations and their share of social capital is low.
Pastoral life of the individuals does not reflect a good picture. Most of the people attend weekly Mass. Not many children and young people are regularly attending catechism classes. The case of sacramental confessions needs to be improved much.

Now, for the first time in the history of the local Church, comprehensive information about its families and people is available with all minute facts and figures. This is more than enough to develop policies, plan programs and projects at all levels starting from the parish level to the Archdiocesan level. While doing this exercise, it is advisable to make it participatory and community based. It is important and good to involve experts to guide the methods of the exercise in view of duplication of work, overlapping results and reducing costs.

This is merely a survey report and not a research study. However, this report and the data available give ample scope for initiating innumerable number of research studies and discussions. Policies of the Archdiocese may be evolved through careful study of each and every aspect surveyed now.

 q 2る

[^0]:    1 There is a difference of 13 families ( $0.22 \%$ ), when separate forane totals are added together. This may have cause due to errors in data entry. The total of 8 foranes added together amounts to 58488.
    2 There is a difference of 31 persons $(0.14 \%)$, when separate forane totals are added together.

[^1]:    2 In earlier studies, the family size in south Kerala is 4.4 , while among Christians, it is 4.5 and among OBCs, it is 4.8. (KSSP 2004) 3 Single families living in single households are normally defined as nuclear families and as such their size is bigger than the other categories.

[^2]:    4 See KSSP 2004, p 53
    5 lbid, p 43
