## PREFACE

History always recalls National Census as one of the greatest achievements of any ruler who accomplishes it, precisely because it presupposes vision, systematic planning and sincere dream for sustainable development of his or her kingdom.

2012 was a milestone in the annals of the Latin Archdiocese of Trivandrum which celebrated its Platinum Jubilee that year. One of the important events which added colour and grandeur and substance was the socio-economic, pastoral and civic survey of the Archdiocesan population. Though the diocese was not new to such surveys, the present one was special with its coverage and depth. It was this bold decision and constant encouragement of Archbishop Soosa Pakiam that enabled us to fulfill such a satisfying, though hard and challenging, task with commendable output.

Preliminary discussions of the survey began in the beginning of 2011. There were many who enriched us to shape the survey format with solid support. The following ones deserve special mention of thanks: Fr. E.J. Thomas S J, Fr. Joye James S J, Dr. Irudayaraj, Dr. Charles Leon, Dr. Biju and Msgr. Eugene H. Pereira. It was also placed before the Diocesan Senate and other relevant Archdiocesan platforms, besides the directors of different ministries in the Archdiocese. A sample survey was carried out at Kochuthura, Nettayam and Thope during February – March, 2011. The format for data collection was presented in the Presbyterium held on 23rd August, 2011 along with the sample survey results. Suggestions were incorporated therein.

A Training of Trainers (ToT) was organized at the diocesan level on July 17th and 23rd 2011, for personnel such as the parish BCC coordinators, animators of various ministries and other parish representatives on the methodology of enumeration. They functioned as a resource team for training the enumerators at the villages. By the end of July, parish level training was completed. The field level survey was completed in five months starting from the month of August 2011. Some 2050 people were involved in the enumeration. From September 2011 onwards parishes began sending the completed survey forms. The commendable efforts of the parish priests, parish councils and other teams deserve a word of appreciation and thanks. Meanwhile, a new software was developed on VB.Net with Mysql for data entry and report generation. It is flexible enough to generate any combination of options. This parish/user-friendly software would not have been materialized but for the hard work and skills of Adv. Justus who deserves special thanks and it is joyfully recorded here.

Data entry which begun in November 2011 took almost eight months to complete. 39 people at different locations and times committed themselves to make it a reality. Though the names of all the members involved in the data entry are impossible to be mentioned here, the names of Mrs. Dayana, Mrs. Mercy, Miss. Jimmy Mole, Mr. Nandu, Mr. Sumesh, Bros. Ajith, Shijin, Immanuel, Marthoma and Lawrence can not go without mentioning. Their committed efforts are thankfully remembered here. Sr. Mary Vaz, the BCC office secretary, along with the animators and staff of BCC made all efforts needed to coordinate the entire process of data collection and entry. They together do deserve gracious thanks.

On 1st July 2013, the day of the Platinum Jubilee celebration, we could release the forane-wise family directory before the public which represented the source of this data base. After clearing errors the final data and its results were presented in the Presbyterium on 14th August, 2012 and priests were introduced to the use of the software. This introduction was given for the parish – forane representatives also.

The complete data were then handed over in November 2012 to ADHWANA, a State Level professional NGO, in order to bring out the report of the survey with the findings and recommendations. The volume in your hands with lot of information in tables and charts, along with analysis, findings and recommendations generated from the supplied

data is the result of sustained hard work of Dr. J. Mary John and his team of experts and staff. A big thanks to them. A special word of appreciation and thanks is due to SKETCH TRICKS for accomplishing the designing and printing works beautifully. We thankfully acknowledge the contributions of Mrs. Binu in drafting a brief outline of the forane background of Anjengo. We are indeed indebted to the Fr. Lenin Raj, the Secretary and Director, Trivandrum Social Service Society and to his staff in extending all possible supports throughout the process of survey, besides the financial assistance to carry out this task constraint- free.

Archdiocesan Synod, one of the great events of the Platinum Jubilee, discussed and suggested plans on various sectors and fields of activities. Further planning in detail, taking into account the ground realities of the parish communities needs to be done, yet. The plan will be SMART plan: Specific, Measurable, Achievable, Realistic and Time-bound. The survey and the report generated certainly will have its impact on that. The Report may serve as a historical data on our diocesan community and can form basis of comparison for future social analysis and planning, whenever necessary.

However, the findings of this survey shall better be used with constant and serious inputs from people's active participation at all levels of interventions- parish, forane and Archdiocesan. It is our modest expectation that it forms the basis for future planning.

We, the members of the Survey Team, take this opportunity to thank you, one and all for your share in making this a reality for the service of our valiant people who dare even the elements for sustenance and survival.

## FOREWORD

“To know thyself is the greatest knowledge”. The aims of “Latin Archdiocesan survey 2011” are: to know our Archdiocese in a better way; to know our strengths and weaknesses; to know the exact population; to situate ourselves with other communities; to find the areas of our development; to focus our ministries to the real needs of people. This is an eye opener to all members of our Archdiocese. The survey results reveal what we are and where we are today after 75 years of journey as a faith community rooted in Jesus and his principles.

“Latin Archdiocesan survey 2011” attempts also a study of each individual family and person in our Archdiocese. This effort taken in view of reaching substantiated inferences about our community has now reached to the present stage through expert guidance, participatory and collective action and thought, group discussions, well designed interview schedule, effective training sessions, tedious home- to- home data collection, tailor-made software preparation, patient data entry and intelligent data analysis-interpretation and high standard of organizing various factors.

This survey reports are arranged in two levels, namely Archdiocese-Forane level and Forane-Parish level. This is a very helpful tool for the decentralized planning in our Archdiocese which is a key principle of our first synod. Different ministries and commissions have to make use of this survey analysis for their entire planning of the ministry and could reflect in the annual plan and budget at least for the next 5 years. The forane which has regional preferences and priorities should make use of these survey findings for their long and short term planning of various ministries and concerns they face. As pastors and leaders of the community, they should make use of these results and analysis for their parish ministry. The parish councils, finance councils and other bodies in the parishes have to see their priorities and levels of different areas and should make efforts to improve them by planning and executing different programs for the target groups.

I sincerely appreciate this great task and all the persons who toiled to make this dream a reality. We are on our way to an improved situation not only in terms of our socio-economic progress but also in terms of our skills to understand the reality.

I love to state here that undertaking such an exercise should not be stopped with this one. At the completion of every tenth year, a similar exercise has a more relevant space in the process of updating the information. I once again appreciate each and every one behind this great achievement.

# THIRUVANANTHAPURAM LATIN ARCHDIOCESE. HISTORICAL BACKGROUND

## Introduction

Christianity claims its presence in Kerala since the 1<sup>st</sup> century itself. Its inception was supposed to be by 52 AD with the arrival of St. Thomas, the Apostle, in this land. However, a historical study of Christian community in Kerala forgetting the services of foreign missionaries, who sacrificed their lives to promote social justice among the people of this land, who were suppressed and depressed under the then prevailing untouchability and colour discriminations, may perhaps be incomplete.

## Origin of Christian Community

In the past, Quilon was a prominent and predominant commercial centre of Travancore. Even before the merchants from western countries came to Travancore for their trade and commerce, the missionaries from Europe visited Travancore to propagate the Good News of Jesus, the Christ. Marcopolo, a famous traveler from Venice, who visited Quilon in the year 1292 AD has engrossed that there was a Christian community in this land. The seeds of faith, sown by the Franciscans and Dominicans, which were confirmed and strengthened by St. Francis Xavier, the Jesuit, and his followers, resulted in the formation of Christian communities along the coastal area of the erstwhile Travancore.

Pope John XXII, by a Decree "ROMANUS PONTIFIX" established the Diocese of Quilon in the year 1329, which became the first diocese in India. The writings of St. Francis Xavier mentions places such as Vizhinjam, Karumkulam, Puthiyathura, Pulluvila, Kollamcode, Vallavila, Thoothoor, Puthenthura, Thengappattanam, Inayam, Midalam, Vaniyakkudi, Kulachal, Kadiyappattanam, Muttom, Pallom, Manakkudi. The areas from Kulachal in the south to Adimalathura in the north were under a vicariate as recorded by Fr. Valithano, a Jesuit Missionary. There are evidences that Christian communities were existing at Mampally and Roitora even prior to the arrival of Francis Xavier.

## Formation of Trivandrum Latin Diocese

By 17<sup>th</sup> century the Carmelite Missionaries landed in India. In 1898, when Rt. Rev. Dr. Aloysius Maria Benziger was the Bishop of Kollam, the Carmelite Missionaries from Belgium resorted at Travancore and concentrated on mission works. Their mission area covered the present dioceses of Kollam, Punalur, Thiruvananthapuram, Neyyattinkara and Kottar which were part of the Diocese of Kollam. In 1930 Kottar diocese came into existence. In 1937 Pope Pious XI by a Decree "IN ORA MALABARICA" established the Trivandrum Latin Diocese by bifurcating the Kollam Diocese. The revenue *Taluks* of Chirayinkeezh, Thiruvananthapuram, Nedumangad and Neyyattinkara were placed under the jurisdiction of Trivandrum diocese. In 1952 the coastal parishes from Pallithura to Erayimmanthura were de-linked from Cochin Diocese and attached to the Diocese of Trivandrum.

## Bishops on Service

On formation of Trivandrum Diocese Rt. Rev. Dr. Vincent Dereira, the then Bishop of Kollam was appointed as the

1<sup>st</sup> Bishop of Trivandrum Diocese. During his tenure the catholic population in the diocese increased to around three Lakhs and in the educational sector there were 63 primary schools, 28 U.P schools, 15 High Schools, 2 Training schools and 3 Colleges.

Rt. Rev. Dr. Peter Bernard Pereira, who followed Bishop Vincent Dereira was the first Bishop from the soil and his tenure was from October 1966 to June 1978. Bishop Pereria lighted the lamp for many social developmental activities in the diocese. One of such is Marianad Community Development Programme. Trivandrum Social Service Society, a registered social service society is a pioneering initiative of Bishop Pereira. The Indian Space Research Organisation at Thumba was made possible because of the visionary intervention of Bishop Pereira. It was during his time that the land base for the future development of Trivandrum diocese was created.

Bishop Peter Bernard Pereira was succeeded by Bishop Jacob Archaruparambil OFM Cap, who was in service from October 1979 to 1990. It was during his period that the historical event of Kottar Living Together took place in the Golden Jubilee year of the diocese which gave new outlook to the diocese as a Participatory Church and the Church as the People of God by inculcating the vision of II Vatican Council.

In the year 1990 Bishop Soosa Pakiam took charge of the diocese. Tremendous achievements both in the spiritual as well as social arenas have been made in the diocese during the past 23 years. Decentralization and participation were the basic principles adopted in every stage of administration in the Local Church.

### **Bifurcation of the Diocese and Elevation as Archdiocese**

In 1996 Trivandrum diocese was bifurcated and a new diocese came into being - Neyyatinkara Diocese. Thus the area of Thiruvananthapuram diocese was reduced to 686 sq. k.m. which encompassed the areas from Ayiroor of Chirayinkeezh Taluk in the north to Erayummanthurai of Vilavancode Taluk of Kanyakumari Dist in the south. A major portion of Trivandrum diocese is located along the coastal belt with six foranes, which extends to about 76 k.m in lenth. There are two foranes in the interior.

In the year 2004 Pope John Paul II was pleased to elevate Trivandrum diocese as an Archdiocese with Alappuzha, Kollam, Punalur and Neyyatinkara as its suffragent dioceses. Bishop Soosa Pakiam was elevated as the Archbishop of this ecclesiastical region.

### **Renewal Process in the Diocese**

The general observation is that the socio-economic, educational and political situation of the people of our diocese is not very impressive and the available statistics shows that they are far behind many of the other communities in Kerala. Diocese has adopted many strategies over the years to lift the community to the mainstream according to the need of the time. Especially community building that took place after the 'Kottar Living Together' and the structural and functional changes evolved in the diocese have contributed much to its growth.

There are several parishes (80) and sub-stations (43) working as the arms of the Archdiocese to implement, *inter alia*, the socio-economic-pastoral and educational activities with the people. Basic Christian Communities (BCCs) have been formed in all the parishes and sub- stations in order to enhance and sustain the active participation of the people and decentralization of the ministries. Pastoral ministry touches the pastoral and spiritual life of the people through the commissions of Bible, Catechism, Liturgy, Family Apostolate, Evangelization, Ecumenism and Dialogue.

In the educational sector there are 5 Higher Secondary Schools, 2 High Schools, 4 U.P Schools, 17 L.P Schools, 1 CBSC School and one Centre for Excellence, one Engineering College, one Nursing College, one ITC and one B.Ed College under the Archdiocesan management. Other than this there are 19 schools under the direct control of parish managements and 25 schools under the management of the religious and 4 schools under the Trusts of Latin Catholic lay people.

Social action ministry steered by Trivandrum Social Service Society has five departments such as (1) Capacity building, (2) Advocacy, Policy Lobbying and Net-working, (3) Socio-economic development and employment, (4) Health, environment and education and (5) Administration and Research. The activities are carried out through

various community based-organizations (forums) and institutions. There are 6 forums and 11 institutions under Social Action Ministry taking care of various target groups.

Other relevant activities of the Archdiocese are carried out through the Board for Clergy and Religious, Board for Temporalities, Board for Evangelization and Board for Laity. There are other autonomous ministries such as BCC, Youth Ministry, Media and Fisheries.

## **Conclusion**

The present survey is the first of its kind in terms of the preparations undertaken for execution, wide coverage of all Parishes and Foranes of the Archdiocese, inclusion of major socio-economic and pastoral subjects, the systematic conduct and team work and involvement of professional experts in various stages. The task and the results of this program are considered as one of the milestones in the annals of the archdiocese of Trivandrum. If this survey and its finding could be instrumental for various ministries to bring out certain remarkable changes in the growth of the People of God in our local church, that will certainly open up for a new horizon in the path of development and building up of the Kingdom of God.

## അഞ്ചുതെങ്ങ് ഫെറോന

തിരുവനന്തപുരം ജില്ലയുടെ വടക്ക് ഭാഗത്തുള്ള ചിറയിൻകീഴ്, വർക്കല എന്നീ താലൂക്കുകൾ ഉൾപ്പെട്ട പ്രദേശത്താണ് ഇന്നത്തെ അഞ്ചുതെങ്ങ് ഫെറോന. തിരുവനന്തപുരം നഗരകേന്ദ്രത്തിൽ നിന്ന് 34 കിലോമീറ്റർ അകലെ ചിറയിൻകീഴ് താലൂക്കും 52 കിലോമീറ്റർ അകലെ വർക്കല താലൂക്ക് സ്ഥിതി ചെയ്യുന്നു. തിരുവനന്തപുരം ജില്ലയിലെ ശാസ്തവട്ടം മുതൽ വടക്കേ അതിർത്തിയായ പാരിപ്പള്ളി, കിളിമാനൂർ വരെയുള്ള പ്രദേശങ്ങൾ ഈ ഫെറോനയുടെ ഭാഗമാണ്. ഇന്നത്തെ അഞ്ചുതെങ്ങ് ഫെറോനയിൽ അഞ്ചുതെങ്ങ്, മാമ്പള്ളി, പുത്തൂറ, താഴംപള്ളി, അരയതുരുത്തി, വെണ്ണിയോട്, മുങ്ങോട്, അയിരൂർ, എന്നീ എട്ട് ഇടവകകളും, വർക്കല, ആറ്റിങ്ങൽ എന്നീ രണ്ട് സബ്സ്റ്റേഷനുകളും ഉൾപ്പെടുന്നു. അതു കൂടാതെ അഞ്ചുതെങ്ങ് ഇടവകയിൽ ചമ്പാവ്, മണ്ണാകുളം എന്നീ സ്ഥലങ്ങളിൽ രണ്ട് ചാപ്പലുകളും സ്ഥിതി ചെയ്യുന്നു.

പോർട്ടുഗീസുകാരുടെ വരവിന് മുൻപ് തന്നെ തെക്കൻ തിരുവിതാംകൂറിൽ പ്രേക്ഷിത പ്രവർത്തനം നടത്തിയിരുന്ന ഫ്രാൻസിസ്കൻ - ഡൊമിനിക്കൻ സഭാ അംഗങ്ങളുടെ ഒരു പ്രധാന പ്രവർത്തന മേഖലയായിരുന്നു ഇന്നത്തെ അഞ്ചുതെങ്ങ് ഫെറോനയുടെ തീരപ്രദേശങ്ങൾ. ഈ പ്രദേശത്തെ പ്രേക്ഷിത പ്രവർത്തനങ്ങളുടെ കേന്ദ്രം മാമ്പള്ളിയായിരുന്നു. വി. ഫ്രാൻസിസ് സേവ്യറിന്റെ വരവിന് മുൻപ് തന്നെ ഇവിടെ പ്രേക്ഷിത പ്രവർത്തനം നടന്നിരുന്നുവെന്നും പരിശുദ്ധന്മാവിന്റെ നാമത്തിലുള്ള ഒരു ദൈവാലയമായിരുന്നുവെന്നതിനും തെളിവുകളുണ്ട് .

16-ാം നൂറ്റാറിന്റെ ആരംഭത്തിൽ ഗോവ രൂപതയുടെ നേരിട്ടുള്ള നിയന്ത്രണത്തിലായിരുന്നു തെക്കൻ കേരളത്തിലെ ആദ്യ ദൈവാലയങ്ങളിലൊന്നായിരുന്ന അഞ്ചുതെങ്ങ് ദൈവാലയം. ക്രിസ്തുമത വിശ്വാസം പ്രാദേശിക വൈദേശിക ശക്തികളാൽ തകർക്കപ്പെട്ട അവസരങ്ങളിൽ അഞ്ചുതെങ്ങിലെ ജനങ്ങൾ തങ്ങളുടെ ക്രൈസ്തവ വിശ്വാസം ദൃഢമായി കാത്തു സംരക്ഷിക്കുകയും ഗോവയിലെയും കൊച്ചിയിലെയും മെത്രാൻമാർക്ക് അവസാനംവരെ അഭയം നൽകി പരിപാലിക്കുകയും ചെയ്തു. 1569 തോടുകൂടി അഞ്ചുതെങ്ങ്, പുതുക്കുറിച്ച് മേഖലകളിൽ പുതിയ ദൈവാലയം നിർമ്മിച്ചതായി ചരിത്ര രേഖകളുണ്ട്.

1722 ൽ കൊച്ചി മെത്രാനായി നിയമിതനായ ഫ്രാൻസിസ് ദേവാസ് ഗേൺസാലോസ് എസ്.ജെ മാമ്പള്ളിയിലാണ് താമസിച്ചിരുന്നത്. ഇക്കാലത്ത് മാമ്പള്ളിയിലെ ജീർണ്ണിച്ച ദൈവാലയം പുനരുദ്ധരിച്ചു. 1745 ൽ കൊച്ചി മെത്രാനായി നിയമിതനായ ക്ലമന്റ് ജോസഫ് കോളാസാവോലെയിത്തു എസ്.ജെ. അഞ്ചുതെങ്ങിലെ വി.പത്രോസിന്റെ ദൈവാലയം കേന്ദ്രമാക്കി താമസം ആരംഭിച്ചു. 1946 ൽ അഞ്ചുതെങ്ങ് ഇടവക വിഭജിച്ച് പുത്തൂറ ഇടവകക്ക് രൂപം നൽകി.

വി. ഫ്രാൻസിസ് സേവ്യറിന്റെ കാലത്തുതന്നെ താഴംപള്ളി പ്രദേശത്ത് ഒരു വിശ്വാസ സമൂഹം രൂപപ്പെട്ടിരുന്നുവെന്ന് വിശ്വസിക്കുന്നു. ആദ്യകാലത്ത് ഇന്നത്തെ അരയതുരുത്തി ഉൾപ്പെടുന്ന താഴംപള്ളി ഇടവകയുടെ പ്രദേശങ്ങൾ അഞ്ചുതെങ്ങ് ഇടവകയിലെ വൈദികരുടെ നിയന്ത്രണത്തിലായിരുന്നു. അക്കാലത്ത് താഴംപള്ളി കടൽതീരത്തായിരുന്ന ദൈവാലയം കടലെടുത്തുപോയതിനെത്തുടർന്ന് 1889 ൽ പുളുത്തുരുത്തി

യിൽ മറ്റൊരു ദേവാലയം പണിതു. പിൽക്കാലത്ത് അരയതുരുത്തി ഉൾപ്പെടെയുള്ള താഴെപള്ളി ഇടവകയെ ഒരു സ്വതന്ത്ര ഇടവകയായും, അതിനു ശേഷം 2003 ൽ അരയതുരുത്തിയെ മറ്റൊരു സ്വതന്ത്ര ഇടവകയായും പ്രഖ്യാപിച്ചു.

തീരദേശത്ത് നിന്ന് മാറി അഞ്ചുതെങ്ങ് ഫെറോനയിൽ സ്ഥിതി ചെയ്യുന്ന മറ്റ് ഇടവകകളാണ് വെണ്ണിയോട്, മുങ്ങോട്, അയിരൂർ, വർക്കല, ആറ്റിങ്ങൽ എന്നിവ. വെണ്ണിയോട് ഭാഗത്ത് ക്രൈസ്തവ വിശ്വാസം വ്യപിച്ചത് ഏകദേശം 2 നൂറ്റാണ്ടുകൾക്ക് മുൻപ് മാത്രമാണെന്നാണ് ചരിത്ര രേഖകൾ സൂചിപ്പിക്കുന്നത്. ഏകദേശം 150 വർഷങ്ങൾക്ക് മുൻപ് ഒരു ഷെഡ് ആയി നിർമ്മിച്ച ദേവാലയം 1956 ൽ പൊളിച്ച് ഒരു പുതിയ ദേവാലനീർമ്മാണം ആരംഭിച്ചു. 1963 കാലഘട്ടങ്ങളിലാണ് വർക്കല പ്രദേശത്ത് ഒരു വിശ്വാസ സമൂഹത്തിന് തുടക്കം കുറിക്കുന്നത്. കേരളത്തിന്റെ മദ്ധ്യകാലങ്ങളിൽ വൈദേശിക മിഷനറിമാരിൽ നിന്നും വിശ്വാസം സ്ഥീകരിച്ച് തിരുവനന്തപുരം ജില്ലയിലെ നാവായികുളത്ത് രൂപംകൊണ്ട ക്രൈസ്തവ സമൂഹമാണ് പിന്നീട് വിശ്വാസത്തിന്റെ പേരിൽ പീഠനങ്ങൾ ഏൽക്കുകയും പ്രതിബന്ധങ്ങൾ നേരിടുകയും ചെയ്തപ്പോൾ മുങ്ങോട് പ്രദേശത്ത് വന്ന് താമസിക്കുകയും മുങ്ങോട് ഇടവകക്ക് രൂപം നൽകുകയും ചെയ്തത്.

കൊല്ലം രൂപതയിലെ ഇരവിപുരം മയ്യാട് ഇടവകയുടെ സബ്സ്റ്റേഷനായിരുന്നു ഹരിഹരപുരം എന്ന സ്ഥലത്ത് സ്ഥാപിതമായിരിക്കുന്ന ഇന്നത്തെ അയിരൂർ ഇടവക. 1840 കാലഘട്ടങ്ങളിൽ കായൽപുരം, ഭാഗത്തും പകശാല ഭാഗത്തും ചുറ്റുമുള്ള പ്രദേശങ്ങളിലും കൃഷി തൊഴിലായി സ്വീകരിച്ച ഏതാനും ക്രിസ്തീയ കുടുംബങ്ങളാണ് ഇന്നത്തെ അയിരൂർ ഇടവകയിലെ ആദ്യകാല ഇടവകാംഗങ്ങൾ. ഇവരുടെ ആരാധനക്കായി പകശാലയിൽ നിർമ്മിച്ചതാണ് അയിരൂരിലെ ആദ്യത്തെ പള്ളി. പിൽക്കാലത്താണ് ഇന്നു കാണുന്ന സ്ഥലത്ത് നിലവിലെ ദേവാലയം പണിതത്. 1913 ൽ അയിരൂർ ഇടവക സ്ഥാപിതമായി. 1937 ൽ കൊല്ലം രൂപത വിഭജിച്ച് തിരുവനന്തപുരം രൂപതക്ക് രൂപം നൽകിയപ്പോൾ അയിരൂർ ഇടവക തിരുവനന്തപുരം രൂപതയുടെ ഭാഗമായി. തിരുവനന്തപുരം രൂപതയുടെ പലഭാഗത്തു നിന്നും ജീവിതമാർഗ്ഗം തേടി വന്ന കത്തോലിക്കരുടെ ശ്രമഫലമായും കത്തോലിക്ക കുടുംബങ്ങളുടെ കൂട്ടായ്മയുടെ ഫലമായുമാണ് ആറ്റിങ്ങൽ ഇടവക രൂപീകരിക്കപ്പെട്ടത്.

മത്സ്യതൊഴിലാളികളും കായൽതൊഴിലാളികളും, കയർതൊഴിലാളികളും, കർഷകരും, കശുവി തൊഴിലാളികളും, ചുമട്ടുതൊഴിലാളികളും ഉൾപ്പെടുന്ന ഒരു വൈവിധ്യമാർന്ന ക്രൈസ്തവ- അക്രൈസ്തവ ജനസമൂഹമാണ് ഈ ഫെറോനയിലുള്ളത്. തിരുവിതാംകൂറിന്റെ ചരിത്രമുറങ്ങുന്ന ആറ്റിങ്ങൽ, വർക്കല, കിളിമാനൂർ എന്നീ പ്രദേശങ്ങൾ ഈ ഫെറോനയുടെ ഭാഗങ്ങളാണ്. വൈദേശികരായ പോർട്ടുഗീസുകാരുടെയും, ഡച്ചുകാരുടെയും, ബ്രിട്ടീഷുകാരുടെയും വ്യാപാര വ്യവസായങ്ങൾ നടന്നിരുന്ന ഒരു മേഖലകൂടിയാണിത്. അതിന്റെ സ്മാരകമായി ഇന്നും അഞ്ചുതെങ്ങിൽ സ്ഥിതിചെയ്യുന്ന അഞ്ചുതെങ്ങ് കോട്ട ചരിത്ര പ്രസിദ്ധമാണ്.

പരമ്പരാഗതമായി തികഞ്ഞ ക്രിസ്തുമത വിശ്വാസികളാണ് ഈ ഫെറോനയിലുള്ളത്. 1991 ൽ ബി.സിസി സ്ഥാപിതമാകുന്നതിനു മുൻപു വരെ കൈക്കാരായിരുന്നു ഇടവക വികാരിയുടെ നേതൃത്വത്തിൽ ഇടവക ഭരണം നടത്തി വന്നിരുന്നത്. അടിസ്ഥാന ക്രൈസ്തവസമൂഹങ്ങളുടെ ആവിർഭാവത്തിനുശേഷം സഭാവിശ്വാസികളുടെ വിശ്വാസ ജീവിതത്തിൽ അത്യാവഹാരിയായ വളർച്ചയാണുണ്ടായത്. നേതൃത്വപാടവം വളർത്താനും, വിദ്യാഭ്യാസപരമായും, സാമ്പത്തികമായും, സാമൂഹികമായും പിന്നാക്കം നിൽക്കുന്നവരെ കത്തി വേസഹായം നൽകാനും, വിശ്വാസജീവിതം കൂടുതൽ ആഴപ്പെടുത്താനും ഇത് സഹായകമായി.

ഫെറോനയിലെ വിശ്വാസികളുടെ ആത്മീയ വളർച്ചക്ക് ആക്കം കൂട്ടാനായി എല്ലാ ഇടവകകളിലും വിവിധ കാലങ്ങളിൽ കോൺവെന്റുകൾ സ്ഥാപിതമായി. മതബോധന രംഗത്തു പ്രവർത്തിക്കാൻ കൂടുതൽ അൽമാ

യർ സേവന മനോഭാവത്തോടെ മുന്നോട്ടു വരുന്നു. ഇവർക്കുവേണ്ടി പരിശീലനം ഇടവകതലത്തിലും ഫെറോന തലത്തിലും നൽകിവരുന്നു. സമൂഹത്തിന്റെ വളർച്ച വിദ്യാഭ്യാസത്തിലൂടെ മാത്രമേ സംജാതമാവുകയുള്ളൂ എന്നു മനസ്സിലാക്കി പള്ളിയോടു ചേർന്നു പള്ളിക്കൂടങ്ങൾ ക്രിസ്ത്യൻ മിഷണറിമാർ പു മൃതലേ സ്ഥാപിച്ചിട്ടുണ്ട്. ഈ അടുത്ത കാലത്തായി പല ഇടവകകളിലും നേഴ്സറികളും ഇംഗ്ലീഷ് മീഡിയം സ്കൂളുകളും സ്ഥാപിച്ചു. ഇന്ന് ഈ ഫെറോനയിലെ 8 ഇടവകകളിലും ക്രിസ്ത്യൻ വിദ്യാഭ്യാസ സ്ഥാപനങ്ങൾ (Aided & Unaided ) ഉണ്ട്. .

## CHAPTER 1

# INTRODUCTION

### Context

The Latin Catholic Archdiocese of Trivandrum was established in 1937. Half a century has elapsed under four Prelates. The Golden Jubilee Celebrations offered a good opportunity for reflection on the current status as well as future possibilities of the Diocese. Naturally the importance of developing socio-economic as well as pastoral profiles of the population, parishes, Foranes and the Archdiocese as a whole was keenly felt. After weighing the pros and cons as well as considering the modalities to be adopted, it was decided to do a comprehensive and integrated census survey, covering the entire families and individuals of the Archdiocese.

### Goal/Overall Objective of the Survey

The ultimate goal of the Census survey was to ensure that Archdiocesan, Forane and parish level socio-economic and pastoral planning processes are made more specific, measurable, achievable, realistic and time bound (SMART) and based on empirical data.

### Specific Objectives

- To collect/generate comprehensive and reliable data bearing on all aspects in the socio-economic and pastoral life of the families and individuals in the Archdiocese
- To prepare and bring out separate reports for each forane and a consolidated report of the entire Archdiocese, containing the findings of the survey.

### Data Base

All Latin Catholic families who were members of the Parishes belonging to the Latin Archdiocese of Trivandrum (hereinafter called Archdiocese) consisted of the data base for the survey.

### Source of data

The source of data used for this report was the census survey conducted by Trivandrum Social Service Society (TSSS) during the 2011-2012 period.

### Geographical Coverage

The survey tried to cover all the Latin Catholic families who were members of 115 Parishes in 8 Foranes in the Archdiocese. The names of Foranes and corresponding number of parishes covered in the survey are given in the table below:

### Foranes and number of parishes covered in the survey

Sl. No	Foranes	No of Parishes including sub-stations

4	Valiyathura	10
5	Pettah	19
6	Palayam	19
7	Puthukurichy	19
8	Anjengo	10
	Total	114

### Demographical Coverage

The Survey covered 58501 families and 217821 individuals with 112287 males (51.55%) 105534 females (48.45%) in 8 foranes.

### Sectoral Coverage

The survey covered several important and relevant sectors and subjects and collected data on families and their members. The following table shows the family-based and individual-based data collected on various areas and subjects.

### Data collection process

Having decided on the geographical, demographical, sectoral and subject-wise coverage, a specific interview schedule corresponding to the areas and subjects was framed by the Archdiocesan team as the main tool for collection of data. Keys and supporting notes were made and sufficient copies were printed. Simultaneously, investigators for data collection were identified by the Parishes at the BCC level under the guidance of the Archdiocesan survey team. Subsequently, trainings were conducted to impart necessary knowledge and skills to the enumerators identified for data collection. Under the direct monitoring of the Parish Priests, the enumerators collected data from the families at the BCC unit level in the parishes.

Data collection involved 2050 persons and took 6 months to cover the entire area. During the process, frequent visits and interactions were made by the survey team.

### Data processing

The data thus collected in printed schedules were sorted out and minor errors were rectified. The entire data were then entered into a tailor-made SOFT WARE so that the outcome of the survey could be directly accessed by the parish priests to understand the profile and situation of each and every family in the Parish. Subsequently, it was decided to prepare a consolidated survey report which could be of immense support for multi-level planning processes in the Archdiocese for a reasonable period of time.

Accordingly, data entry was completed with the support of a team of technical personnel and a directory of families was released based on it. Finally, the work of tabulation and analysis of data together with the task of report formulation at the Forane and diocesan levels was entrusted with a State level specialized agency, ADHWANA. After tabulation of the entire data at the Forane and diocesan levels, interpretation and analysis of the data were completed. Forane-wise reports were separately prepared for 8 Foranes and an Archdiocesan report was prepared at the end. During this process, series of discussions took place with the Survey Coordination Team.

## The Reports

Each report is organized into three chapters. This first chapter deals with context and methodology of the entire process of the census survey. The second chapter presents the data processed in interpretative narration with charts or tables, hinting on the findings and implications of the information. Where ever relevant, sex-wise and age-wise analysis was attempted. In the third chapter, a summary of findings, related conclusions and some recommendations are given. The recommendations are meant to provide a space for more thinking to address the problems reflected in the survey findings. However, it is for the concerned communities to collectively plan appropriate programs to address their issues in a meaningful manner.

In all cases, original tables are given in the Annexure, while charts and summary of some tables are included within the report at appropriate place.

## Limitations of the Survey

- Though it was planned to cover the entire families and all the parishes in 8 Foranes in the Archdiocese, the coverage is subject to further verification with other sources of information such as Parish records.
- The usual data collection errors crept into the data to a small extent. The enumerators were mostly raw persons without prior experience in the job.
- Data requirement on a large number of subjects was not fully responded in several sectors and no data was available on those subjects.
- It was also found that some of the data available were not tallying with other related data, may be, due to differences in understanding the questions from the part of the interviewers and respondents.
- Since there were no earlier reliable reports or statistics corresponding to the regions and subjects covered by this survey, the analysis could not be carried out by comparing or contrasting with the past situation.

## Scope of the Survey

- In spite of the above limitations, which one has to expect in any such large process, the present survey has brought forth a very high level of qualified and quantified information useful for planning in sectors and localities covered in the survey.
- It brought forth conclusions and recommendations which could be followed up by the Archdiocese in the near future through its various Ministries and Commissions.
- It provides reasonable insights for other dioceses to take up similar processes for planning.
- The tables annexed to this report at the end will help individual parishes to find their situation and plan their programs accordingly.

## Anjengo Forane

This volume is the Forane level Report of the Anjengo Forane. The Forane consisted of 10 Parishes located within Anjengo Grama Panchayat and surrounding areas. All the sectors and subjects mentioned above were covered in the survey. In the next chapter, the data on Anjengo Forane is presented with charts and tables at appropriate places.

## CHAPTER 2

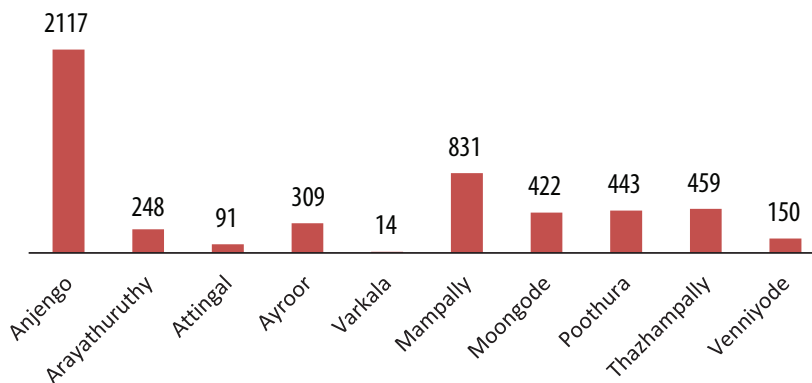

# DATA PRESENTATION AND ANALYSIS

### Introduction

Anchuthengu Forane is one of the 8 Foranes of the Latin Archdiocese of Trivandrum which has taken up the Socio-economic and pastoral survey of its families and people. In this chapter, the interpretation and analysis of the data collected from the parishes of the Forane are presented. There are two sections, one for family-based information and the other for individual-based information. The subjects narrated in the report are the same as those included in the interview schedule employed for data collection in the same order. Charts and tables containing facts and figures are inserted according to the need of the report in view of clarity and importance.

### SECTION ONE: Families

There were 5084 families in Anchuthengu forane which has 10 parishes. The biggest parish in terms of number of families is Anchuthengu Parish with 2117 families, followed by Mampally with 831 families, Thazhampally with 459 families, Poothura with 443 families and Moongode with 422 families. The smallest in the list is Varkala with only 14 families.

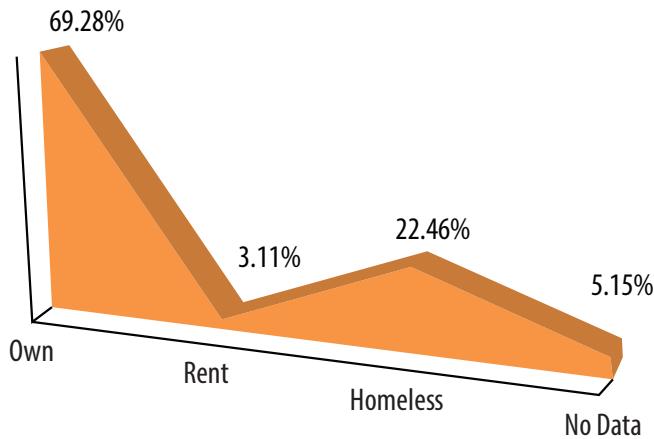

### Ownership of houses

A large majority of the families live in their own houses (69.28%), though a sizeable section is homeless (22.46%). Some are in rented houses (3.11%). Data are not available from some families (5.15%). **(Table No.1)**

**Chart No.1: Ownership of houses**

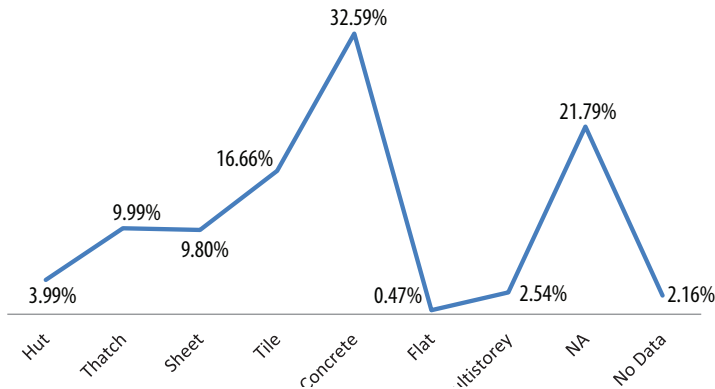

Across the parishes, Varkala tops the list of those who own their houses with 78.57%, followed by Arayathuruthy with 76.21%. Among the homeless, Anchuthengu is the first with 25.98%, followed by Poothura (22.57%) and Mampally (22.14%).

**Type or quality of houses**

Of those who have a house of their own, the largest section (32.59%) has concrete houses, followed by those having tiled houses (16.66%), sheet roofed houses (9.80%), thatched houses (9.99%) and huts (3.99%). There are a few families living in multistoried houses (2.54%). **(Table No.2)**

**Chart No.2: Type or quality of houses**

Looking at the parishes, among those who live in huts, Arayathuruthy tops in percentage (7.26%-18), followed by Anchuthengu (106) and Thazampally (23) each with 5.01%. In Varkala and Venniyode parishes, there are no huts. In the matter of thatched houses, Mampally tops with 15.16% (126) and in the matter of sheet-roofed houses, Venniyode stands highest with 23.33% (35). Varkala has the largest percentage of concrete houses (57.14%-8).

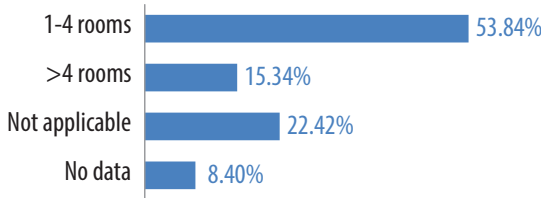

### Number of rooms in the houses

Majority of the houses (53.84%) has 1-4 rooms and a smaller percentage of houses (15.34%) have more than 4 rooms. Number of rooms in the house indicates the size of the house. **(Table No.3)**

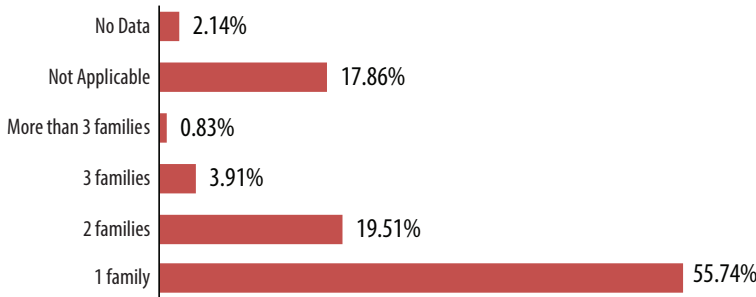

Chart No.3: Number of rooms in the houses

### Number of Families accommodated in a single house

Majority of the households (55.74%) consist of only one family. A sizeable number of households (19.51%) accommodate 2 families. In some cases, 3 families live together in a single house (3.91%). In a small number of households (0.83%), even more than 3 families live together. The families who stay with the owners may be relatives or siblings who have got married or who have no house of their own. **(Table No.4)**

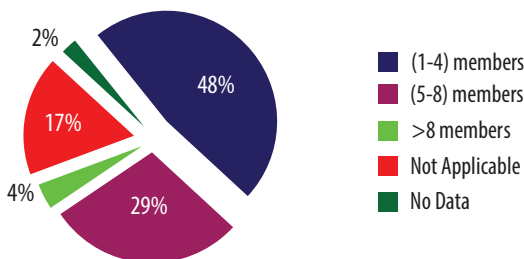

Chart No.4: Number of Families accommodated in a single house

### The accommodation pattern of individual members in houses

The largest section of households (48%) has only 1-4 members in them, followed by those households accommodating 5-8 members (29%) and those with more than 8 members (4%). **(Table No.5)**

Majority of the people chose state aided (28.95%) or state government (29.75%) educational institutions. A sizeable section (11.15%) studied in state unaided institutions, while a fewer persons opted for CBSE (3.81%) and ICSE (0.53%). (Table No.42)

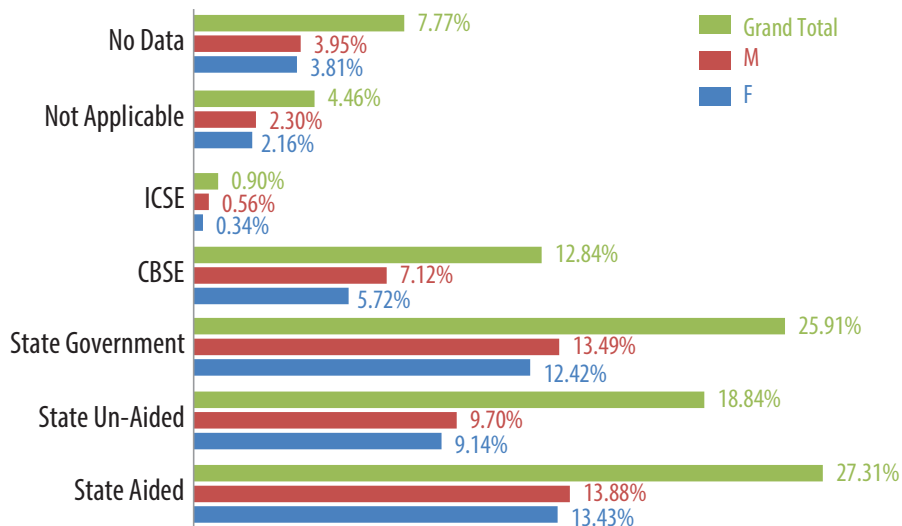

Chart No.42: Educational Institutions

## Sex-wise distribution of the educational institutions preferred by the age group of 5-15 years

Here, as in the general category, state aided (27.31%) and state government (25.91%) institutions were preferred by a majority of people for their education. In all categories of institutions, males outnumbered females. (Table No.42a)

Chart No.42a: Sex-wise distribution of the educational institutions preferred by the age group of 5-15 years

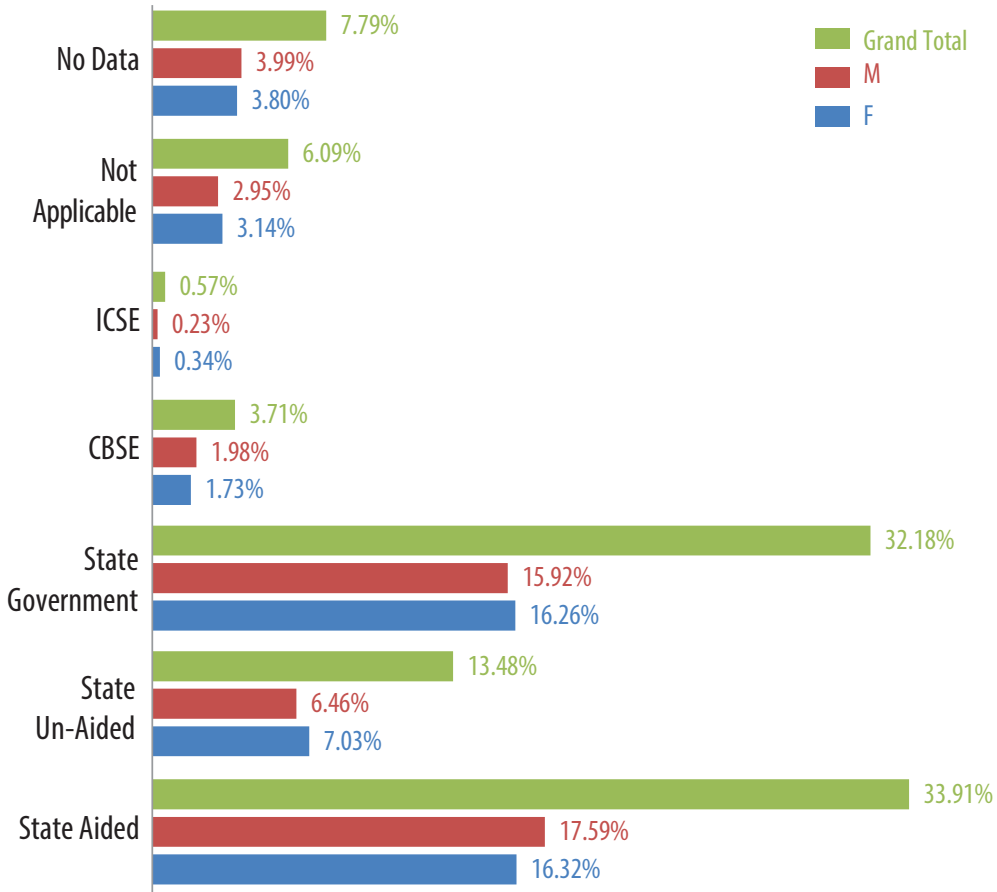

### Sex-wise distribution of the educational institutions preferred by the age group of 16-25 years

In this age group also, state aided and state government educational institutions were selected by majority of persons for their education. But, unlike in the previous age group, females stood higher than males in State unaided and state government institutions and in ICSE stream. (Table No.42b)

Chart No.42b: Sex-wise distribution of the educational institutions preferred by the age group of 16-25 years

### Sex-wise distribution of the educational institutions preferred by the age group of 26-35 years

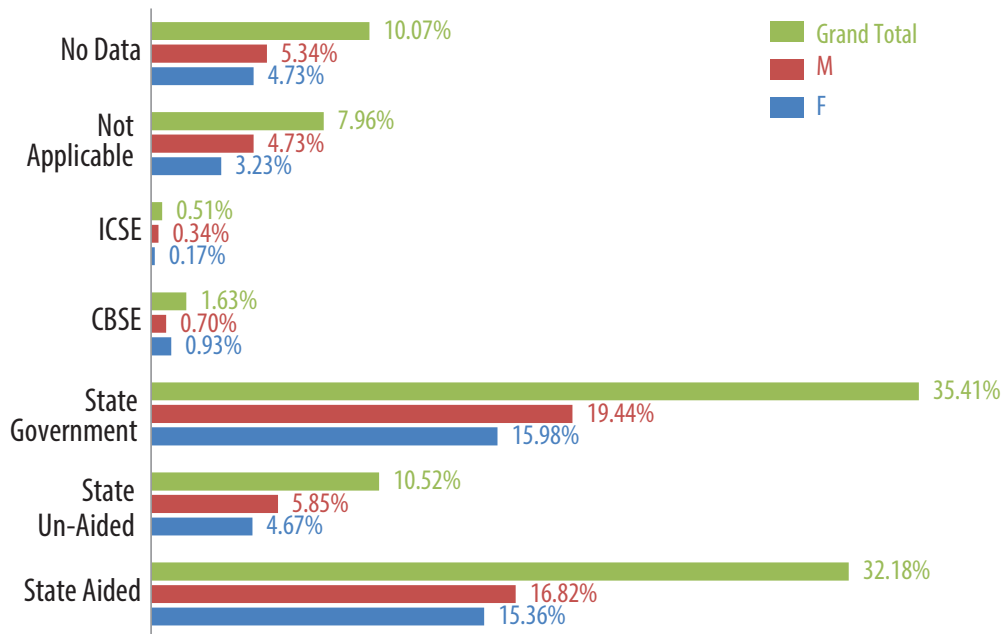

Again, majority of the people in the age group preferred state aided and state government educational institutions to others. Men dominated in all the categories except CBSE. (Table No.42c)

### Employment Sectors

Excluding the unemployed and so those not applicable to this subject (48.53%), the largest section (29%) were self-employed, followed by those employed in Gulf countries (4.58%), those employed in private non-service sector (2.60%) and state government direct (1.62%). A few others were employed in smaller numbers in other states, public sector other than state government, Europe and other foreign countries. **(Table No.43)**

**Chart No.43: Employment Sectors**

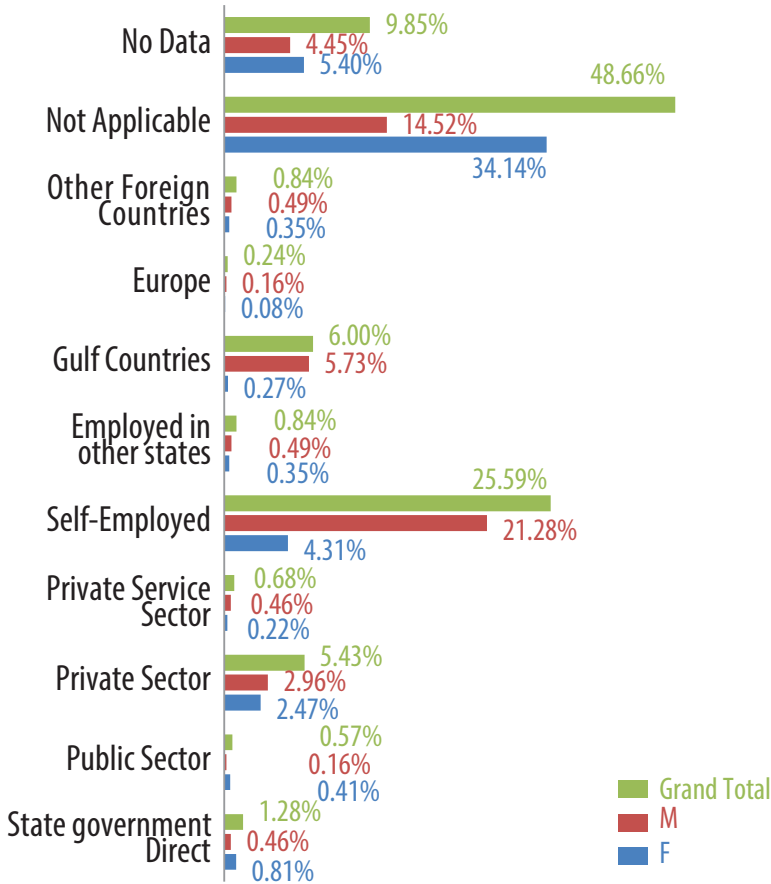

### Sex-wise distribution of employment sectors in the age group of 18-28 years

In this age group, a huge section (48.66%) reported that they were either unemployed and outside the purview of the listed categories. The major section was self-employed (25.59%), followed by those employed in Gulf countries (6%), private non-service sector (5.43%). Except in state government employments, it was males who outnumbered females in the matter of employment sectors. (Table No.43a)

Chart No.43a: Sex-wise distribution of employment sectors in the age group of 18-28 years

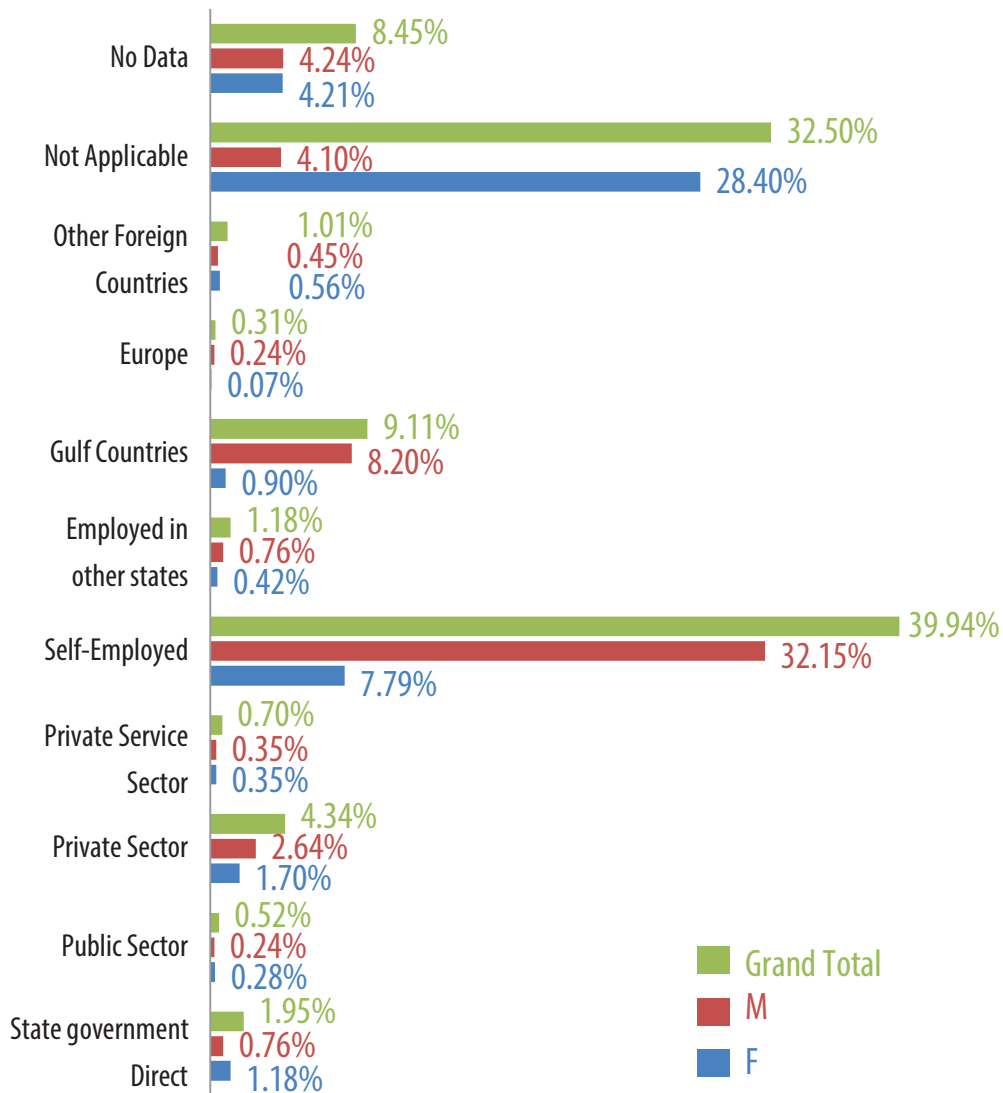

### Sex-wise distribution of employment sectors in the age group of 29-35 years

Excluding 32.50% of unemployed persons and 8.45% who did not provide any information regarding these aspects, the gender analysis show that males again ranked higher than females in number in private non-service sector, self employments, employed in other states, Gulf countries and Europe. (Table No.43b)

**Chart No.43b: Sex-wise distribution of employment sectors in the age group of 29-35 years**

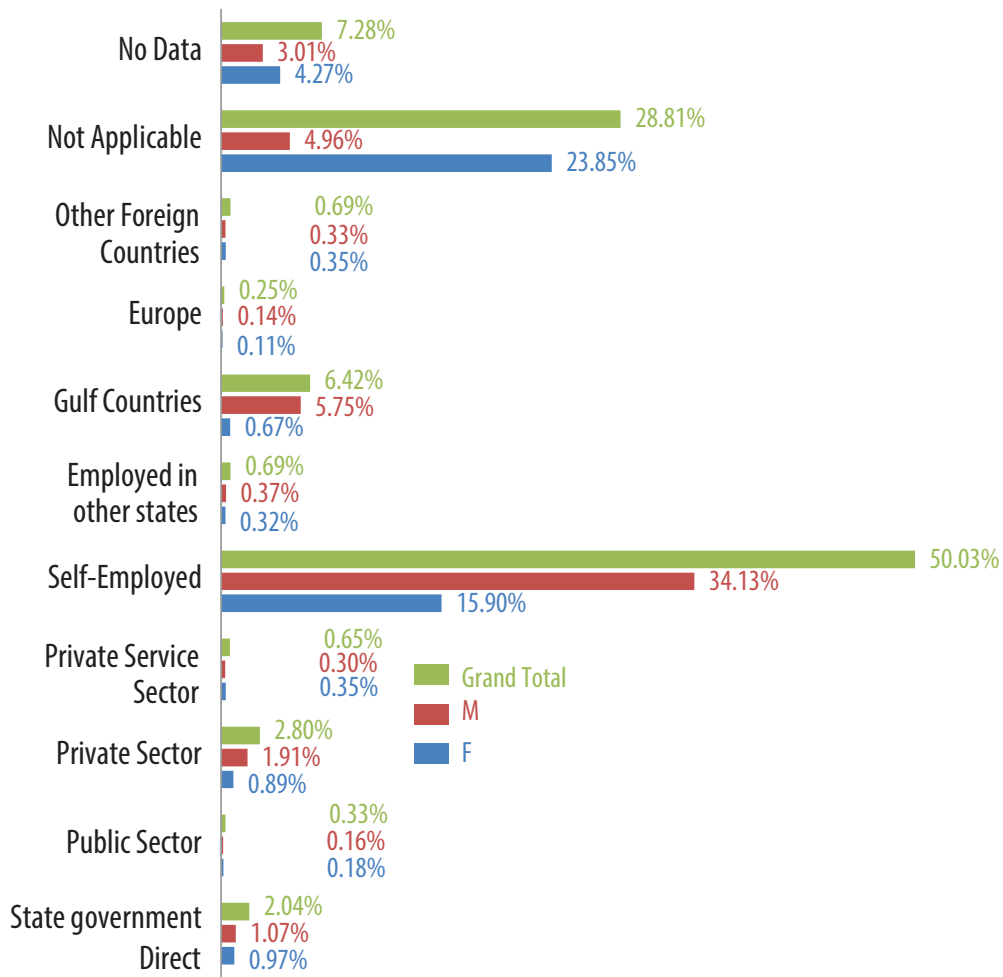

**Sex-wise distribution of employment sectors in the age group of 36-60 years**

In this age group, in most of the sectors of employment, the males dominated in number. Women were found more only in private sector employments and other foreign countries. Majority of the persons were self-employed (50.03%). (Table No.43c)

**Chart No.43c: Sex-wise distribution of employment sectors in the age group of 36-60 years**

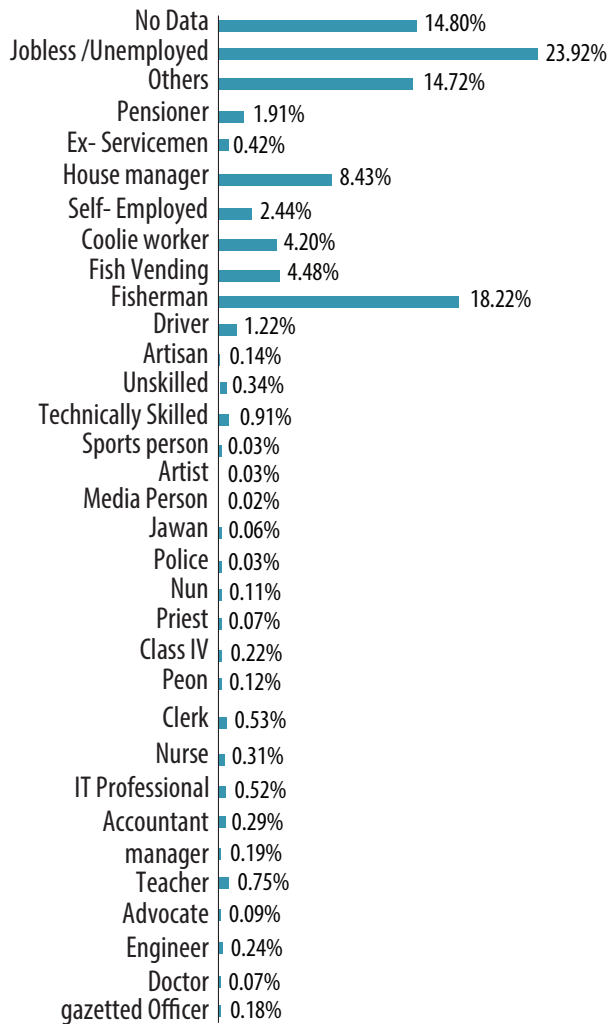

**Career sectors and positions**

32 career positions were included in the survey for finding the positions including the jobless in the region. In general, it was found that the largest section (23.92%) was jobless or unemployed, followed by fisherman (18.22%), house managers (8.43%), fish venders (4.48%) and wage labourers (4.20%). A few were employed as drivers (1.22%), teachers (0.75%), and IT professionals (0.52%). Gazette Officers, doctors, engineers and managers were rarely found here and there with an insignificant proportion. Even nurses and clerks were found in very small proportions. A sizeable section (14.80%) was employed outside the listed 32 positions. **(Table No.44)**

**Chart No.44: Career sectors and positions**

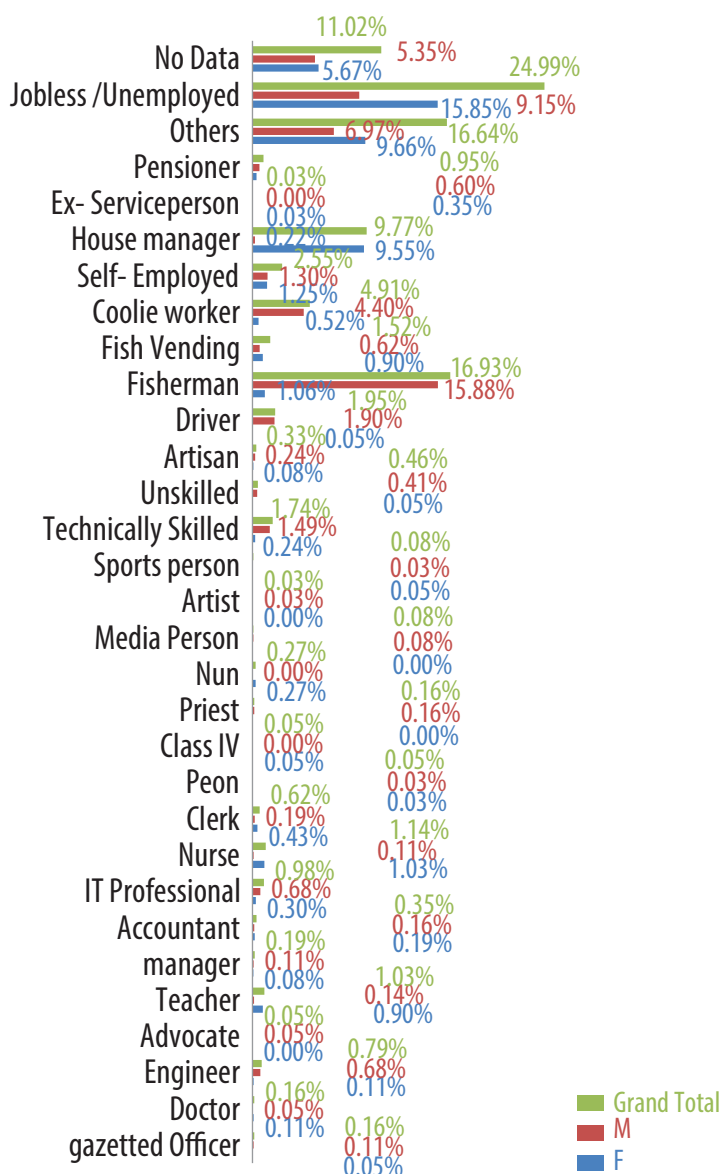

**Sex-wise distribution of Career positions of the age group 18-28 years**

Even in this younger age group, very few persons were employed in jobs like gazette officer, doctor, engineer, advocate, manager, accountant, IT professional, etc. Some people were employed in lower positions like drivers, clerks, nurses and Class IV. Major sections were found in the list of unemployed (24.99%), fishermen (16.93%), house managers (9.77%), wage labourers (4.91%) and the self-employed (2.55%). There were 16.64% of people in this age group who were employed outside the purview of the listed positions.

Across the sexes, women were more in the positions of doctors, teachers, accountants, nurses, clerks, Class IV employees, sports-related ones, fish vending, house management, ex-service persons and in 'other positions'. Male presence was recorded in connection with remaining positions. House management is now an unpaid domestic work of female persons in the households and not considered as a career or employment in common parlance. **(Table No.44a)**

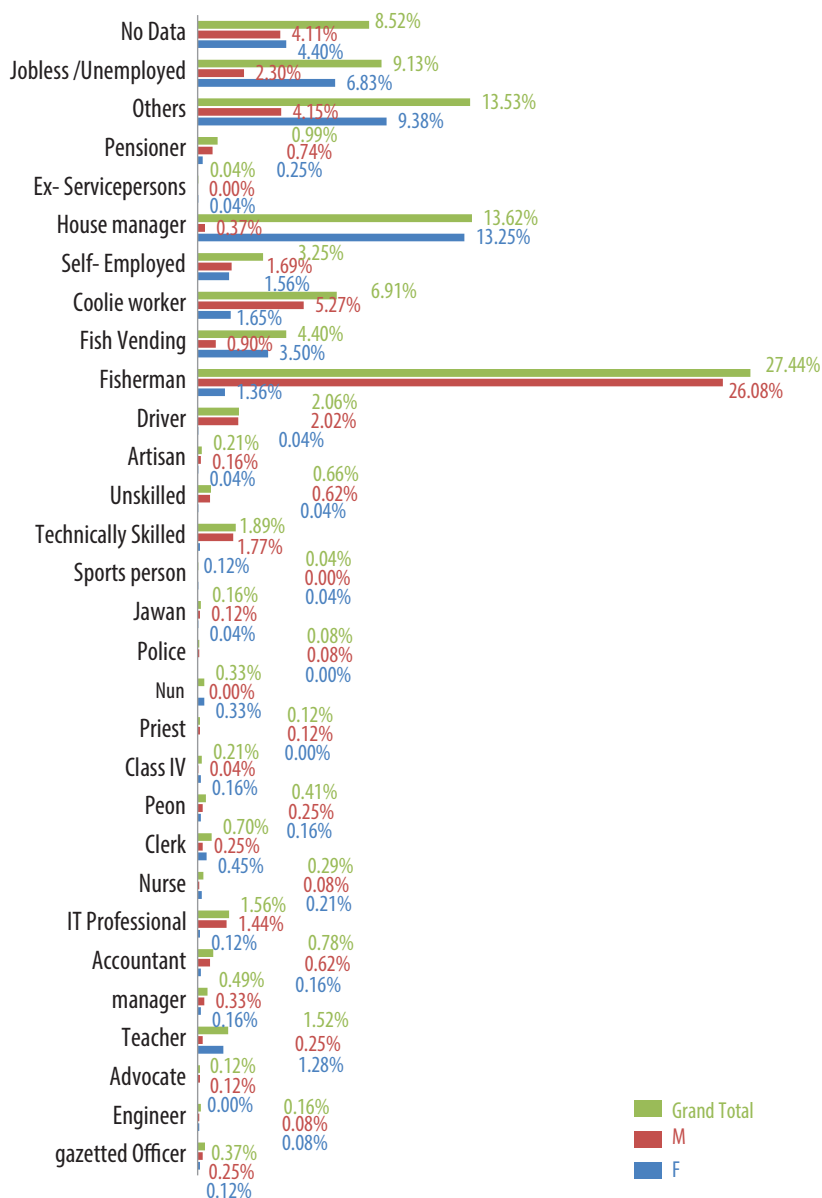

Chart No.44a: Sex-wise distribution of Career positions of the age group 18-28 years

**Sex-wise distribution of Career position of the age group 29-35 years**

Though, in this group, the number of jobless persons (9.13%) came down from that of the previous group, major sections were found grouped as fishermen (27.44%), house managers (13.62%) and wage labourers (6.91%). In the gender analysis, males were found more in the positions of gazette officers, advocates, managers, accountants, IT professionals, peons, technically skill persons, unskilled persons, artisans, drivers, fishermen, wage labourers, the self-employed, pensioners and other careers not listed in this survey. (Table No.44b)

**Chart No.44b: Sex-wise distribution of Career position of the age group 29-35 years**

**Sex-wise distribution of Career position of the age group 36-60 years**

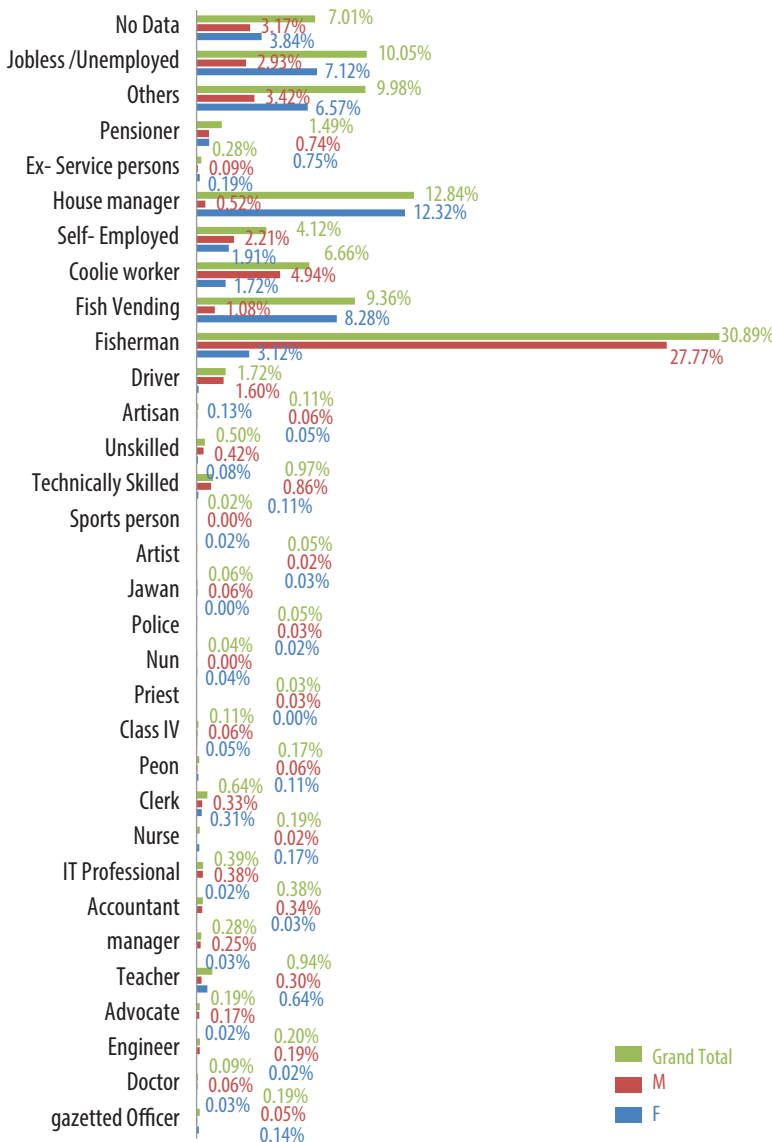

Here in this age group, the percentage of jobless persons remained low with 10.05%. But, most of the people were found engaged in the jobs of fishermen (30.89%), house managers (12.84%) and wage laborers (6.66%). These are not actually careers and employments in the real sense of the terms. They are in the unorganized sectors without any of the rights of the workers recognized by the Governments and international agencies. Some are employed in low positions and very few are employed in higher positions and careers and professions.

In the gender analysis, the males were found in higher numbers in the positions of doctors, engineers, advocates, managers, accountants, IT professionals, clerks, Class IV employees, technically skilled as well as unskilled persons, artisans, drivers, fishermen, wage labourers, self employments, pensioners, and in other unlisted positions. **(Table No.44c)**

In six jobs, in all the age groups, females outnumbered males: teachers, nurses, fish vending, house managers, ex-service persons, and in other excluded items in this survey. In ten jobs, the males were in more numbers than females: Advocates, managers, IT professionals, technically skilled persons, unskilled persons, artisans, drivers, fishermen, wage labourers and self-employed persons.

## Diseases

The population was positioned against 21 diseases as listed in the charts and tables. Majority reports (67.39%) that they are free from any of the listed diseases. Major diseases found among the people of the region are mainly life style diseases such as diabetic (4.65%), BP (4.32%), rheumatic (3.88%) and heart problems (2.30%). Other notable illnesses were bone problems (3.12%), allergy (2.44%) and thyroid (1.09%). Cancer, HIV/AIDS, jaundice, Malaria, TB, Leprosy, skin diseases and psychological disorders were found in smaller number of people. **(Table No.45)**

Chart No.45: Diseases

## Sex-wise distribution of diseases in the age group of 0-6 years

Among infants (0-6 years), naturally, only a few children (6.88%) have some of the listed illnesses. Allergy (1.72%) and Asthma (0.72%) were found in some children. Surprisingly, according to the data available, there were some children who had heart problems, diabetic, BP and rheumatic. In the gender considerations, 5 of the illnesses were

found more in females (Heart problems, diabetic, thyroid, bone diseases, allergy) while 4 of the diseases were found more in males (BP, Malaria, Asthma and skin diseases). **(Table No.45a and 45ai)**

**Chart No.48: Faith-based and social organizations**

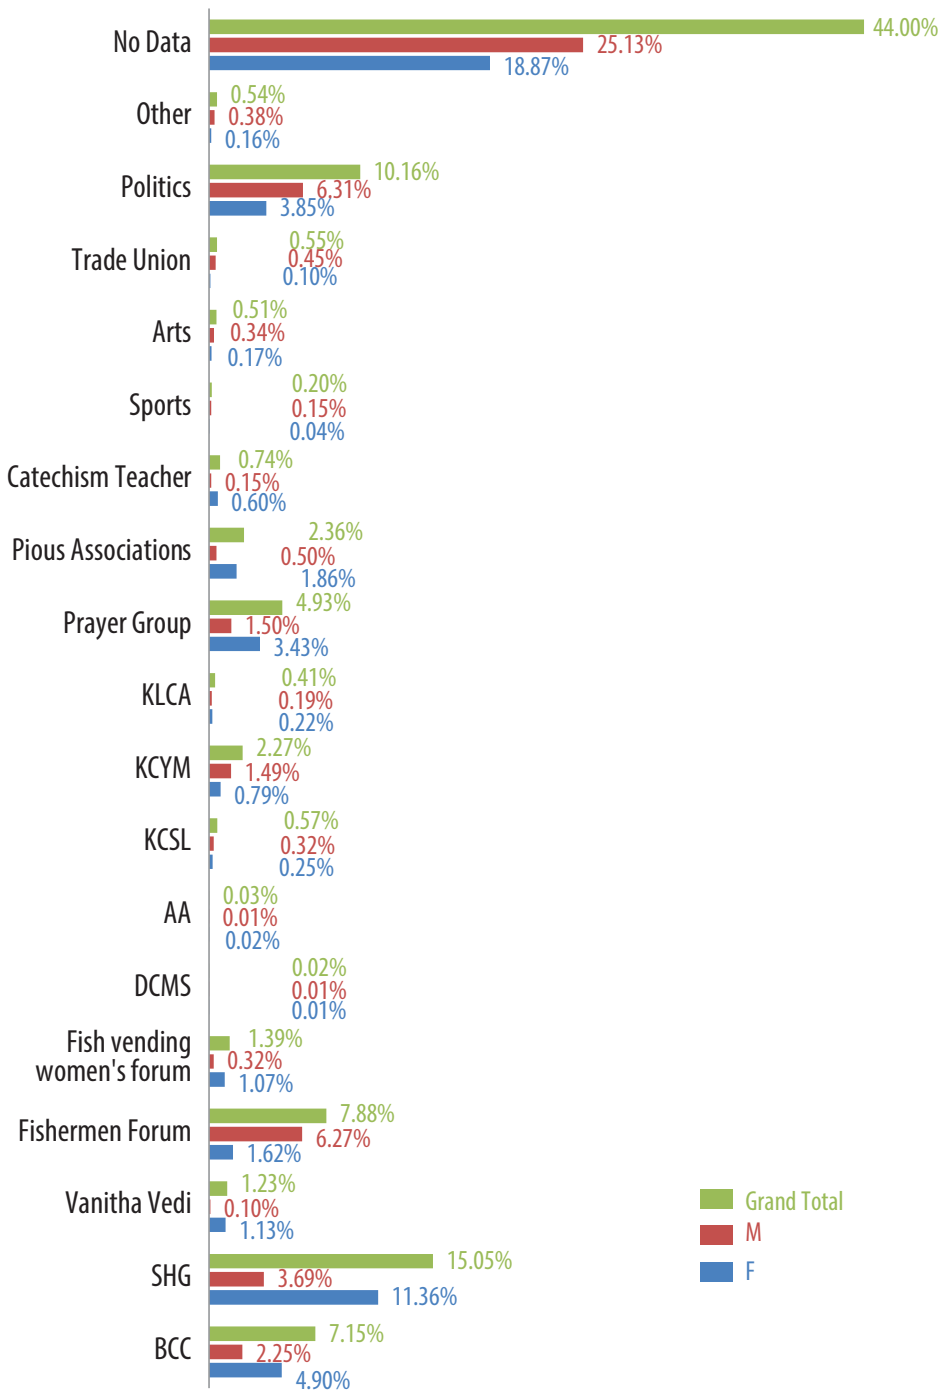

### Sex-wise involvement in faith-based and social organizations in the age group of 18-60 years

No data was available from 44% of the group. The largest section was associated with SHGs (15.05%), followed by political parties (10.16%), fishermen forum (7.88%) and BCC (7.15%). While females were found more in BCCs, SHGs, Vanitha Vedis, fish vending women's forum, KLCA, prayer groups, Pious associations and catechism teachers group, men outnumbered women in fishermen forum, KCSL, KCYM, sports and Arts clubs, trade unions and politics (**Table No.48a**).

**Chart No.48a: Sex-wise involvement in faith-based and social organizations in the age group of 18-60 years**

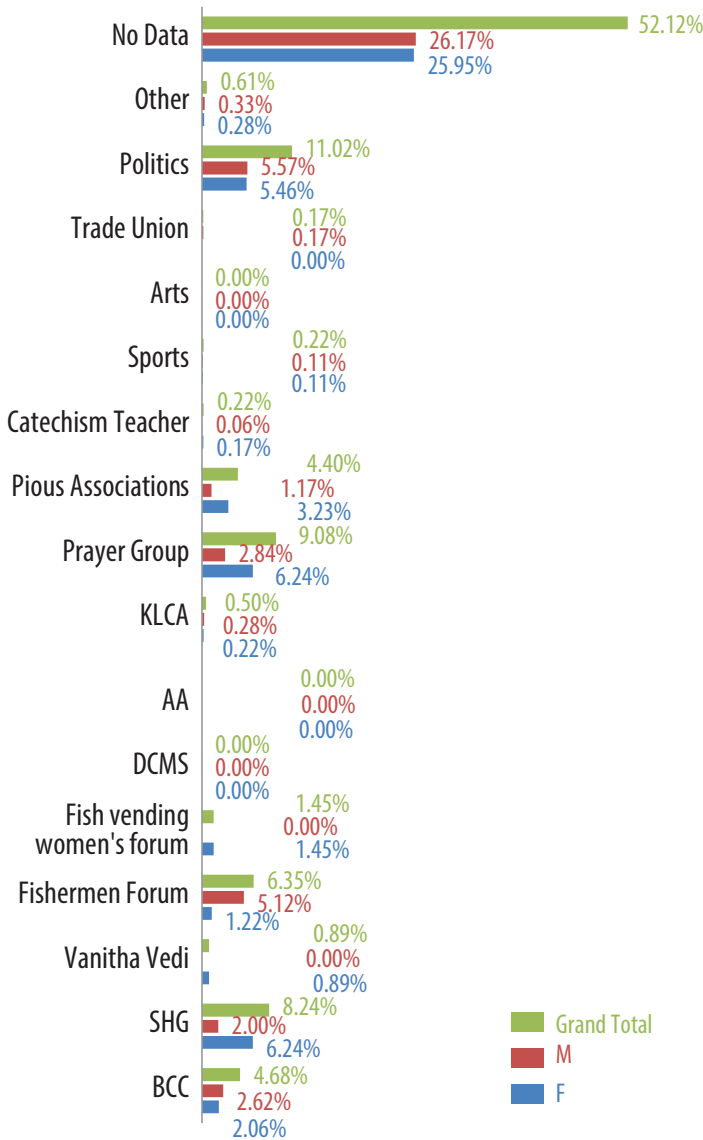

### Sex-wise involvement in Faith-based and social organizations among the members of the age group above 60 years

In the age group above 60 years, 52.12% provided no data. Among others, the largest section (11.02%) was in Politics, followed by those in prayer groups (9.08%), SHGs (8.24%), fishermen forum (6.35%), BCCs (4.68%) and pious associations (4.40%). Men and women were almost equal in politics. Females were more in prayer groups, pious associations, fish vending women's forum and SHGs. (Table No.48b)

## Participation in Holy Mass

A vast majority of the people (72.93%) was attending Holy Mass weekly, followed by those who participated in it 2-3 days a week (7.39%), those who went for Mass once a year (4.67%) and those who never went (3.21%). (Table No.49)

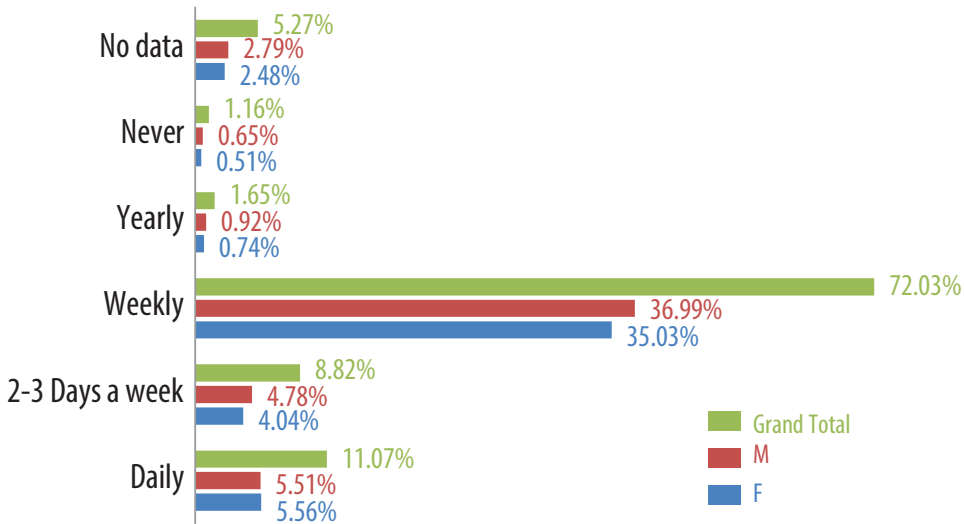

Chart No.49: Participation in Holy Mass

## Sex-wise participation in Holy Mass in the age group between 5-18 years

In this age group, the majority (72.03%) was regular for weekly Mass, followed by those who went for Mass daily (11.07%), those who participated in it 2-3 days a week (8.82%) and those cared for it only once a year (1.65%). In all these categories, females were dominating except among those who daily went for Mass. (Table No.49a)

Chart No.49a: Sex-wise participation in Holy Mass in the age group between 5-18 years

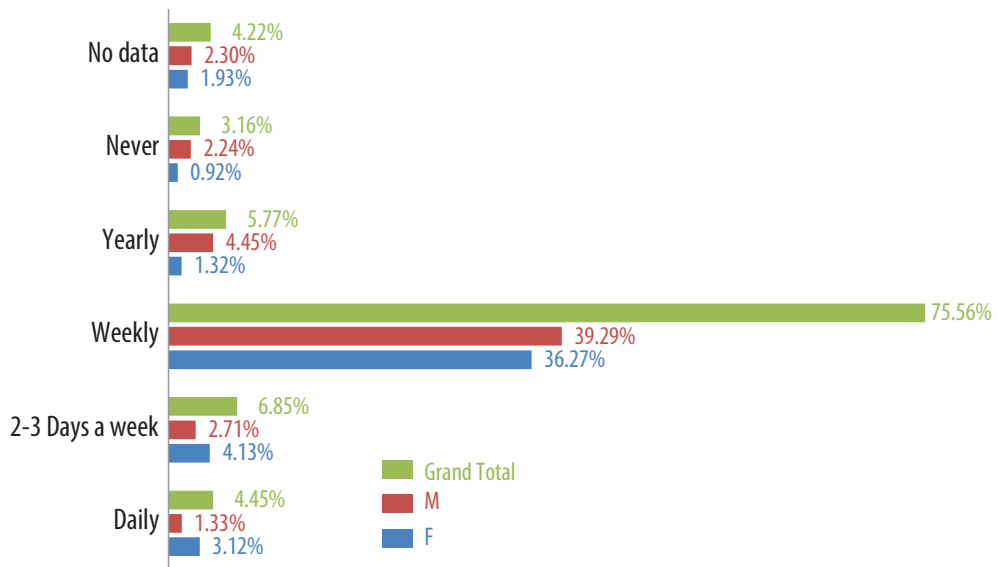

## Sex-wise participation in Holy Mass in the age group between 19-60 years

In this age group of grown up persons, more percentage (75.56%) took weekly Mass as a serious matter and attended it, while a smaller percentage (6.85%) went 2-3 days a week and 5.77% and 4.45% participated in yearly and daily Mass respectively. While more men were weekly and yearly Mass goers, more women went for daily Mass or 2-3 days a week. (Table No.49b)

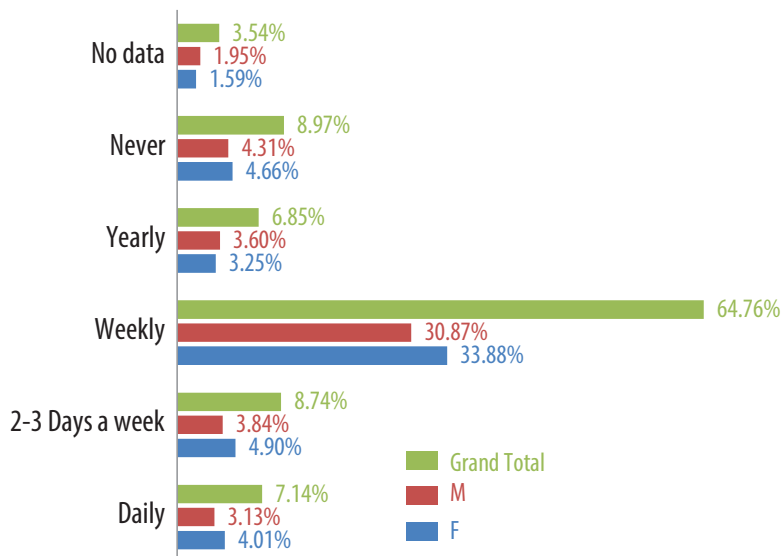

**Chart No.49b: Sex-wise participation in Holy Mass in the age group between 19-60 years**

**Sex-wise participation in Holy Mass in the age group above 60 years**

In this age group also, the majority were regular in weekly Mass. However, the next largest percentage (8.97%) never went for Mass. While some persons (8.74%) went for Mass two three days a week, some others (7.14%) preferred to go for daily Mass. 6.84% of people went for yearly Mass. In all categories, females were more in number. (Table No.49c)

**Chart No.49c: Sex-wise participation in Holy Mass in the age group above 60 years**

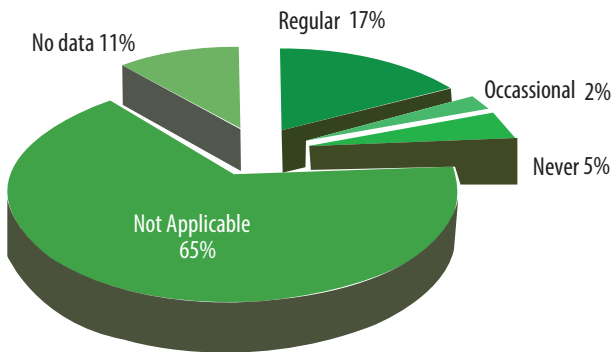

## Participation in Catechism classes

The case of 76% of the people who were either out of consideration or who did not provide any data is not analyzed here. Of the remaining, the largest section (17%) was regular in catechism classes, while 5% never went for the classes and 2% went only occasionally. **(Table No.50)**

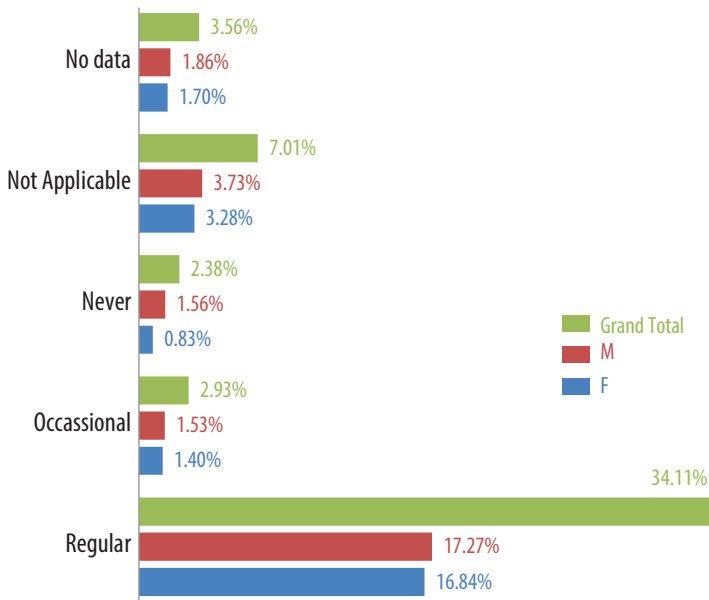

**Chart No.50: Participation in Catechism classes**

## Sex-wise participation in Catechism classes among the members of the age group 5-15 years

In this age group, the largest section (34.11%) regularly went for catechism classes, while 2.93% went occasionally, and 2.38% never went for it. In all the categories, boys attended more in the classes. **(Table No.50a)**

**Chart No.50a: Sex-wise participation in Catechism classes among the members of the age group 5-15 years**

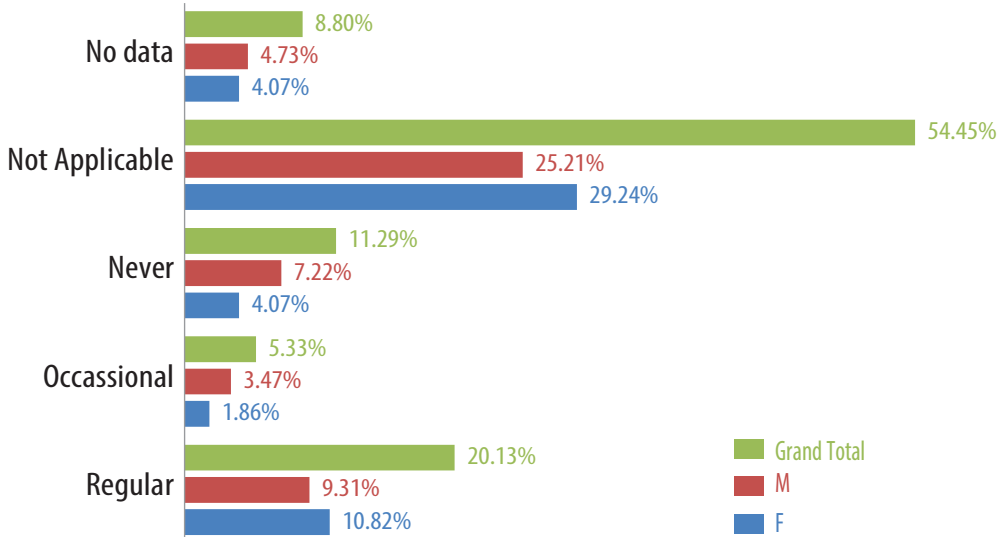

### Sex-wise participation in Catechism classes among the members of the age group 16-25 years

In this age group, the majority reported that they were out of purview of the case. While 20.13% regularly went for catechism classes, 11.29% never went for it. 5.33% went for the classes occasionally. Women were found more among regular participants. (Table No.50b)

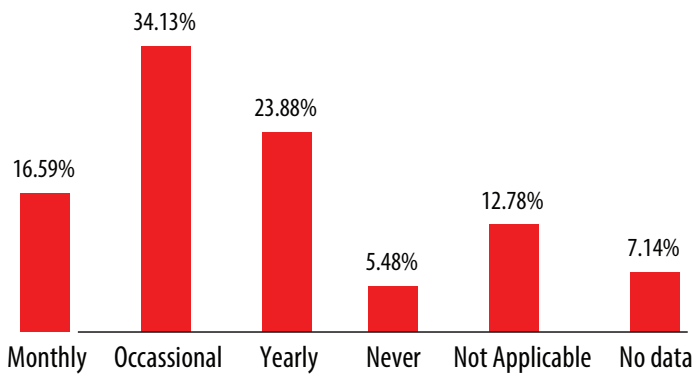

Chart No.50b: Sex-wise participation in Catechism classes among the members of the age group 16-25 years

### Participation in Confession

In general, the largest section (34.13%) made occasional confessions, while the next largest section (23.88%) made yearly confession and 16.53% went for monthly confessions. Some people (5.48%) never made sacramental confession in their life time. (Table No.51)

Chart No.51: Participation in Confession

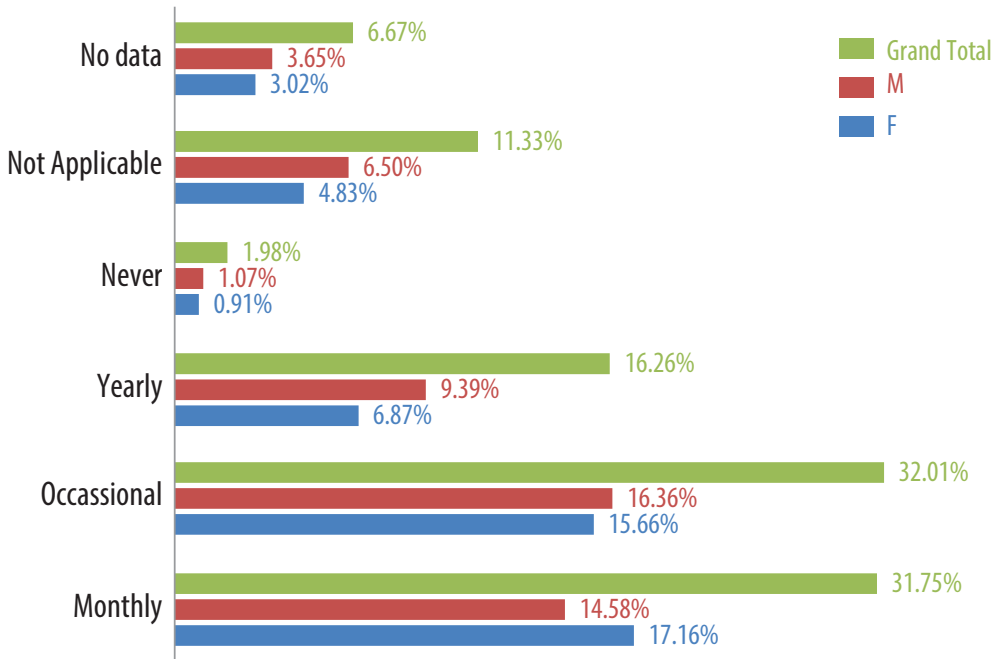

### Sex-wise participation in Confession among the members of the age group between 10-18 years

Those who made occasional confessions (32.01%) were the largest section, followed by those who made monthly confessions (31.75%) and yearly confessions (16.26%). A small section never went for confessions in this age group of children/youth. In all categories except monthly confessions, males stood ahead of females. (Table No.51a)

Chart No.51a: Sex-wise participation in Confession among the members of the age group between 10-18 years

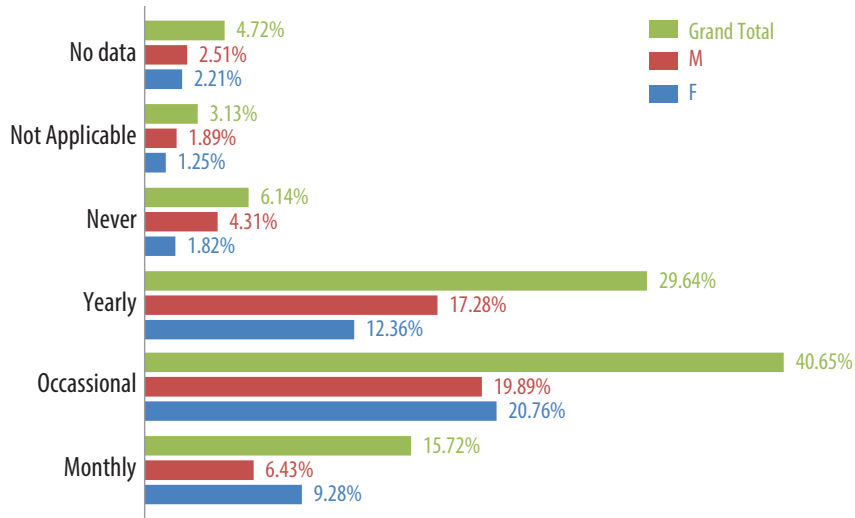

### Sex-wise participation in Confession among the members of the age group between 19-60 years

Here again, the largest section (40.65%) made occasional confessions, while the next largest groups, 29.64% and 15.72% made it yearly and monthly confessions respectively. 6.14% never made confessions. Women outnumbered men only in the case of monthly and occasional confessions. (Table No.51b)

Chart No.51b: Sex-wise participation in Confession among the members of the age group between 19-60 years

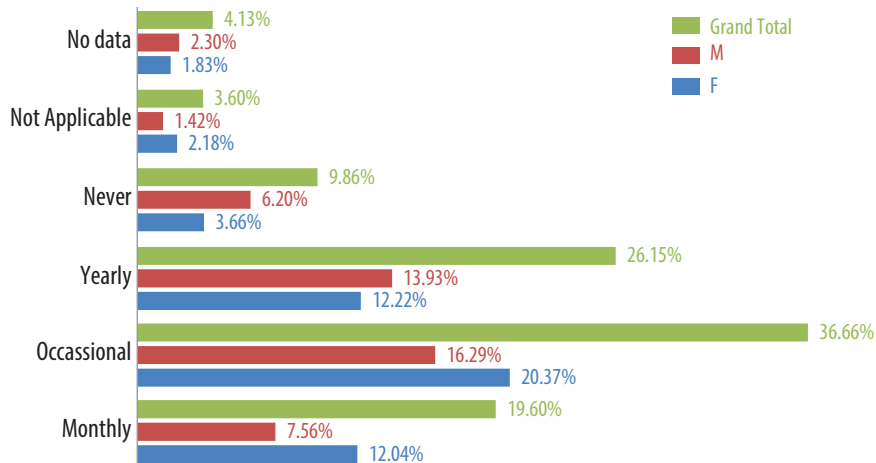

### Sex-wise participation in Confession among the members of the age group above 60 years

In this age group of elders, the largest section (36.66%) made occasional confessions. The next largest section (26.15%) made yearly confessions. The size of population who made monthly confessions (19.60%) was found comparatively smaller. 9.86% of persons never went for confessions. Women outnumbered men in the case of monthly and occasional confessions. (Table No.51c)

Chart No.51c: Sex-wise participation in Confession among the members of the age group above 60 years

The above analysis of the situation in Anchuthengu Forane in terms of numbers and percentages lead us to draw some conclusions. Such conclusions and some recommendations flowing from them, together with the findings are presented in the next chapter.

## CHAPTER 3

# SUMMARY OF FINDINGS AND RECOMMENDATIONS

This third chapter of the Forane level survey report is meant to summarize the findings and suggest recommendations for further planning and action. In this chapter, the important findings are immediately followed by general suggestions and recommendations for action and follow up. However, at the outset, it is highly recommended that a long term perspective plan or a short term concrete plan may be attempted only through a participatory and collective decision making process involving the local stakeholders such as various players at the parish, forane and diocesan levels.

There were 5084 families in Anchuthengu forane which has 10 parishes. The biggest parish in terms of number of families is Anchuthengu Parish with 2117 families. The smallest in the list is Varkala with only 14 families.

### Housing

In Anchuthengu Forane, a sizeable section is homeless (22.46%), though majority of the families (69.28%) live in their own houses. There are a substantial percentage of families (23.78%) living in thatched and sheet roofed houses and in huts. These are expected to be replaced by livable good houses in future. Majority of the families live in smaller houses with 1-4 rooms. Around one fourth of the families (24.25%) lives with some other family or families in a single house. The figures indicate that around one fourth of the number of households have to accommodate more than 4 members. Considering the family size of the region (3.89), more than 4 members may be those belonging to another family. The data give a hint on where the homeless families live, until they own a house of their own.

- Long term housing and house maintenance projects may be planned at the Parish, Forane and Arch-diocesan levels. Local sponsors may be approached for the purpose in view of the lack of external resources for housing.
- Government linkages may be built up for tapping their resources available through various housing schemes for the poor. Grama Panchayats have resources for such programs.
- Corporate resources may be also explored from big private companies and firms.

### Land

A substantial section of families (17%) were found landless, though majority of the families had their own land (62%). The several families, however, possessed small plots of land below 16 cents. Though there were several instances of joint ownership of land by the male and female members of the families, there was a gender bias in favour of men. 27.25% of the families registered their land in the name of the male adults, while only 17.92% families had their land in the name of the female adult member.

- Landlessness is a basic social and economic problem which should be addressed on a long term basis through some kind of thrift and credit schemes, promoting family budgeting, saving habit of the people and strengthening the SHG network.
- The problems of landlessness and homelessness are immediately related to sustainable and better income sources for the families, such as income from regular employment or business. Employment is linked with education and skills, while business is related to skills and investments. Since, as we have seen in the previous chapter, the people are very poor in economic status and educational status, there is an urgent need to plan long term programs for uplifting the community in the matter of employment and education.

## Energy Consumption

74.02% still used ordinary stove with fire wood together with other means in Anchuthengu Forane. Very small portion of families used non-conventional and renewable sources of energy, indicating the low awareness about the need for the higher use of environment friendly sources.

- Effective awareness campaigns and promotion activities in favour of non-conventional and renewable sources of energy can be taken up in a mission mode.
- Intensive and urgent work is to be done to eliminate traditional stoves in a phased manner.

## Other Economic indicators

The survey inquired the situation regarding the ownership of certain basic assets for economic and domestic activities such as home appliances, own vehicles, fishing equipments and other equipments for livelihood, trade and commerce and agriculture. It was found that the families in the forane were very poor in their ownership. This indicates their poor present economic status and low possibility of future growth.

This again points to the lack of permanent reasonable income and savings for creating assets for domestic use and livelihood. Permanent reasonable income is expected to come from permanent and sustainable employment or business or self-employment. In the absence of such sources, the economic situation is poor.

- To address this issue, it is important to create facilities and skills for employment generation and skill development. This is again related to the formal and academic education of the people. Providing better education and skills is the ultimate solution to the sustainable enhancement of income. Long term and short term programs will be useful in this regard with active people's participation.

## Media, Publications and communication

Less than one fifth of the families subscribed to daily news papers (16.62%), while most of the people used TV (61.21%). People did not show much interest to know church related news. Only very small percentage of families subscribed to church publications like Jeevanum Velichavum and Jeevanadam.

- Promotion of news paper reading is an important area to be attended to enhance civic awareness and public involvement in matters of social importance.

## Spending Patterns

In the forane, the largest section of the families spent between Rs.2000-3000 for food expenses per month (47.62%), less than Rs.2000/- for education per month(27.34%) and between Rs.500/- and Rs.1000/- per month (45.99%). This indicates that the families spent moderately for food, very low for education and moderately for medical care.

- Spending for higher education of the children need to be encouraged among the people.
- Family budgeting is another area to be promoted.

### **Debts**

A large majority of families (74%) in Anchuthengu Forane report that they have debts. Large number of families had higher debts above one lakh.

- The solution lies in the life style of the people and is directly linked to the saving habits, income, regular employment and thrift. These areas need to be made vibrant and vital in people's financial planning. More awareness is required in the area of planning their income.

### **Ration Cards**

Though large percentage of families possessed ration cards, a sizeable section still did not have this important entitlement.

- Local level efforts are required to motivate the families to make efforts to take ration cards.
- Plans may be made to achieve 100% families possessing ration cards within a particular time span in the parish or forane levels.

### **Registration as APL or BPL**

Though most of the families are very poor without assets and regular income and employment, majority had APL cards. This needs to be looked into to find out whether the deserving families got BPL registration.

- People need to be more alert and vigilant against the exploitation and corruption prevailing in this regard. It is also required to give sufficient information on how to register them as BPL families at the appropriate time. Orientation programs for the purpose may be useful periodically.

### **Extent of Medical insurance**

Majority of the families did not have medical insurance (52%) at the forane level. Almost half the population does not have it. Insurance is considered as an important social security measures.

- People need to be provided with sufficient information regarding the schemes available in the insurance market.
- They should also be oriented to make use of the free and cheap government sponsored insurance schemes.

### **Sanitary Latrines**

Though a good majority (76.16%) of the families has attached toilets, 625 families (12.29%) use open air for defecation and several families (9.19%) use public toilets.

- This is a social health issue and need to be urgently addressed with the help of some schemes or of the community themselves.

## Source of water

Most of the people use piped water through safe connections in the village or at home. However, a few families use public well. This information, however, does not confirm the availability through out the year.

- Water quality is a case for concern and greater awareness on water quality need to be created among the people.
- In the region, in view of the water-borne diseases breaking out frequently, water purification at source and water testing functions may be regularized with the help of local bodies. Public advocacy is necessary for such achievements.

## Drainage

A good majority of the families (66.40%) do not have any drainage system attached to their houses for disposing waste water

- Greater awareness and program support need to be extended to the needy families.
- Local bodies need to be alerted on this aspect.

## Waste Disposal

Alarmingly, it was found that a very large number of families (48.11%) dump their solid waste into the water sources such as sea or rivulet.

- Urgent campaign mode activities shall be planned to address this issue on a short term and long term basis.
- Since most of the areas are surrounded by water, people need to be specially made aware of the consequences of dumping waste into water bodies.

## Education support

Almost half the number of families where there were students had tables and chairs to their children for study (28.70%), set apart a time for study (23.72%) and arranged study materials (23.29%). This means that an equal size of families did not bother to care for the children's education either due to negligence or poverty. However, it was found that the largest section of families (44.41%) always monitored the studies of their wards at home and school. Only a few families received community support by way of guidance, financial support, monitoring support and free tuition.

- Community support needs to be enhanced and sustained.
- Dropout issues needs to be settled with innovative projects and programs.
- Entry of these category into organized sectors need to be facilitated with additional skill development programs
- Higher education needs to be focused for more students who pass Xth class

## Pastoral Questions

A vast majority of the families (94.69%) have POC Bible at their homes. A large majority (86.90%) prayed regularly. A large majority of families (70.24%) consistently participated in BCC meetings.

- On the whole the situation is not bad. However, regular monitoring is required to sustain and enhance pastoral participation of the communities.

### **Occurrence of death**

While 26 persons committed suicide (0.51%), 2 persons were murdered (0.04%). A bigger number died due to accidents (0.85%-43).

- Though intense probing is required to find out the situation of suicide, murders and accidents, it is advocated that facilities for counseling, control of criminal elements and greater awareness of traffic rules may be put in place.
- The above programs may be taken up at the parish or forane levels in collaboration with other concerned agencies.

### **Population**

There were a total of 19787 persons with 10202 males (51.56%) and 9585 (48.44%) and 5084 families in Anchuthengu Forane. Sex ratio in the region is 939.52. This indicates gender bias against women in numbers and is much below the Kerala level of 1084 women for 1000 men. (2011) The size of the families on an average is 3.89.

People belonging to the age group of 22-60 accounted for 57% of the population. This section is the most productive in terms of income earners and supporters of the other members of the family including children and aged persons.

When we consider the rest of the population mostly depending on this section, the dependency ratio is very high.

- People belonging to the age group of 22-60 are a vital human resource and need to be strengthened with additional skills and education.
- The children and the aged are also very important resources which need to be fostered with innovative programs to make use of their contributions to the society.
- Further probing is required on the low sex ratio among the people belonging to Catholic background.

### **Blood Group**

Half the population (50.23%) did not know their blood group. The persons in the age group of 18-45 years, who are eligible to donate blood, are 46.08% of the total population. In this group, people who did not know their blood group decreased to 21.36%. O+ group is the most popular.

- There is an urgent need to conduct blood testing camps to identify potential donors and their blood group.
- A just blood donation system to support the poor and needy sections is a necessity and shall be promoted.
- Higher awareness needs to be built up among the people especially among the youth.

### **Marital Status**

Considering the total population, almost half the number of people was married (49.23%). But, among the persons in the marriageable age group, say for example, those in the age group above 40 years, if someone remains unmarried, it is good to probe his/her circumstances. Those who are living together (1.69%) without proper marriage constitute a matter for concern.

- Cases of such people may be attended with a humane approach for regularization.
- People who remain unmarried after 40 years of age need to be subjected for further study.

### **Life Status**

The highest percentage of people constituted the workers (30.81%), the unemployed (16.68%) and the students (16.23%). This also indicates that the people in the Forane were economically and socially backward. Very few people are found in higher status of life. This is related to employment, education and income levels.

- Suggestions given above for the promotion of employment, education and income levels are applicable in this regard since they are closely connected as causes and effects.

### **Educational Qualifications**

The largest section of people (22.77%) had only High School level of education, followed by those having Upper Primary (17.76%), Lower Primary (14.10%) and Higher Secondary (8.54%). Though there are some people with higher education, their number is comparatively very low.

This clearly indicates educational backwardness leading to social and economic backwardness among the forane community. This level of education is insufficient for getting a job in the competitive job market or for getting admitted for employable courses. Majority of them become dropouts not only from their studies but also from their lives. They eventually become wage labourers, fish workers, or permanently unemployed. Some find ways to reach Gulf Countries or other states to do hard work for meager remuneration undergoing disproportionate sufferings.

- Long term, mission mode of programs is required to enhance the educational levels of the majority of the people. This is the core problem since all the other problems are causally related to this one.

### **Medium of Instruction**

When the general population is considered, very large section (72.65%) was found to have opted for Malayalam medium for their education. Smaller section of persons went for English medium (10.05%). Across the age groups, while the older generation went for Malayalam, several younger ones showed more liking for English medium. In the matter of choice of medium of instruction, boys outnumbered girls in the selection of both languages.

- In the context of the current discussions in Kerala in favour of Malayalam, the Archdiocese has to make a policy for its population with regard to medium of instruction. More discussions are needed on this issue with all stakeholder groups.

### **Subjects for study**

It was clearly found that in Anchuthengu Forane, very small percentage of people (8.66%) was able to cross the landmark of Xth class, leaving 86.46% of people who were either out of coverage or who could not give any information regarding this aspect. In general, among others, more people selected science (2.96%), arts (2.27%), commerce (1.85%) and literature (1.58%). Across the various age groups, females preferred general subjects like literature, arts, science, medicine, certificate courses and other professional courses, while males chose more job oriented subjects like commerce, management, fine arts, engineering, ITI trades and diploma.

Though all the subjects chosen for study are relevant and modern and have scope for job opportunities, the size of population in higher education and quality education is thin. Quality and quantity matter rather than a particular subject.

- The interesting finding that girls went for general subjects and boys took up job oriented courses needs to be probed further in a perspective of gender equality.
- More and more discussions are required to evolve programs for enhancing the quality of education in general and in our institutions in particular and for promoting more and more students in higher education in all subjects of study.

### **Educational Institutions**

In general and across the age groups, majority of the people chose state aided (28.95%) or state government (29.75%) educational institutions. It was men who dominated in the above institutions as well as in CBSE and ICSE courses.

A gender preference is seen in favour of boys, when we consider the fact that unaided private institutions are preferred by the richer and more elite classes in Kerala.

- The Department of Education in the Archdiocese shall design specific programs to enhance the quality of education to help the students compete in all fields of career and life.
- Quite a big number of people from all age groups opt for state aided educational institutions. This demands more responsibility from the part of the corporate educational managements to attend to the matter of quality of teaching and learning.

### **Employment Sectors**

The largest section (29%) was self-employed, followed by those employed in Gulf countries (4.58%), those employed in private non-service sector (2.60%) and state government direct (1.62%). This trend was visible across the age groups. In most of the instances, males were dominating in self-employment, Gulf employment and in private non-service sector, but not in State Government Direct employments.

- The people of the Forane, like those in other Foranes, are nowhere near the desirable employment sectors. This has a connection with their education and experience. With low levels of education, it is impossible to climb up on the ladder of higher employment sectors. Long term policies are required to address the issue.

### **Career sectors and positions**

It was alarming to find that the first five careers the people work in were that of fisherman (18.22%), house managers (8.43%), fish venders (4.48%) and wage labourers (4.20%). Adding to this, the jobless (23.92%) constituted the largest section of the people. very few persons were employed in jobs like gazette officer, doctor, engineer, advocate, manager, accountant, IT professional, etc.

Not many were employed in higher positions or professions, either public or private. Positively, the percentage of IT professional and technically skilled positions increased from the previous general situation. However, it can be noted that several hundred young persons were found in most of the unorganized sectors indicating low and irregular wages, lack of entitlements, lack of promotions and low quality of working conditions.

In younger age groups, more females work as gazette officers, advocates, managers, accountants and IT professionals, while in older age groups, the males were found in higher numbers in the positions of doctors, engineers, advocates, managers, accountants, IT professionals.

The unemployed women when they got married became house managers without making any substantial change in their employment status or income levels. Whether house management without financial remuneration can be considered a career is a matter for further reflection.

Majority of the people are working in lower careers. When the career positions are considered, the people are placed at the bottom levels, attracting low status and low wages or no wages.

- The situation invites one's serious thought and long term planning to address the issues related with very low career status among the communities in the Forane.

## Diseases

In general, majority (67.39%) was free from any of the listed diseases. Across the age groups also, this was true. Major diseases found among the people of the region were mainly life style diseases such as diabetic (4.65%), BP (4.32%), rheumatic (3.88%) and heart problems (2.30%).

Females were more vulnerable to most of the diseases across the age groups.

- Greater awareness on life style diseases may help people to keep themselves away from illnesses. Money spent on treatment and medicines will have to be saved for more productive purposes.
- However, given the general personal and public situations in most of the areas covered in the survey, the fact that vast majority of the people were free from diseases across the age groups and sexes, needs further probing.

## Bad Habits

In general, vast majority of the people (83.73%) had no bad habits. Of the rest, the largest section (9.90%) had drinking habit, while smaller numbers had betel leaf chewing (5.55%), smoking (3.56%), pan masala (1.93%) and drug abuse (0.05%).

Among children, some of the serious bad habits were found starting with drinking, though in a few instances. Among the adolescents, youth, adults and senior citizens, drinking was found as the most popular bad habit. Higher the age, more addicted the people were to bad habits.

Males were affected more by these bad habits.

- Since the number of affected persons is significantly high, there is a need to plan integrated or holistic programs to address the patients and their families on a long term basis.
- The existing facilities and services need to be fine tuned to the needs of the patients.
- Though the percentage of people affected by the bad habits is small, there is a need to address the issues related to alcoholism, betel leaf chewing and tobacco consumption.
- Youngsters need to be attended specially with programs leading them away from such bad habits.
- Orientation and motivation programs shall start from the school levels. Periodical seminars and discussions could be planned in all our High Schools and Higher Secondary Schools.
- A special team could be set up with sufficient training or a group of the existing team to reach out the services of the De-addiction centre to more areas, even beyond the Archdiocesan operational area.

## Disabilities

Very small percentage of people had some kind of minor disabilities like partial vision and reading difficulty across the age groups without any gender bias.

## **Faith-based and social organizations**

In general, majority of the people (54.15%) were not associated with any of the faith-based or social organizations, indicating their limited exposure to diverse cultures and interactions. However, the largest section was associated with political parties as members or supporters, in general and across the age groups. Other major organizations were SHGs, BCCs, Fishermen forum and pious associations. More women were associated with social and faith-based organizations than men.

- It is important for the citizens to get associated with social/faith-based organizations because they are the nurseries to cultivate better human values and higher social spirits.
- They are the major platforms where social capital – trust, net works and shared values – is formed to benefit their members and associates. Social capital is as important as the economic capital, and sometimes more important and so it must be promoted.

## **Participation in Holy Mass**

A good majority (70.15%) used to go for weekly Holy Mass across the age groups with a higher presence of men. Except in the case of weekly participation in the Holy Mass, women were found in more numbers going for daily Mass and 2-3 days in a week.

- In this age of modernity and market values, there are many people who want to go for Holy Mass. Though there are some who do not bother in this regard, it is important to sustain the spirit and faith of those who frequent for Holy Mass.

## **Participation in Catechism classes**

Catechism classes were meant for the young people. Only about half the number of persons who are bound to attend regular catechism classes actually attended them in their parishes. This is also the case with people in the age group of 16-25. However, the younger ones were more regular in catechism classes. In the younger years, more boys were regular, while the girls improved when they grew up.

- As a faith-community, it is an important area where sustained presence and participation of the young generation need to be ensured along their childhood, adolescence and youth.
- Special and interesting programs shall be planned to attract the youth in catechism classes. Classes need to be facilitated by the trained and skilled teachers.

## **Participation in the Sacrament of Reconciliation**

In the matter of confession, only a small minority made monthly confessions, while the largest section went for confessions occasionally, in general and across the age groups. Women were found more faithful to confessions across the age groups and in the three categories.

Confession is a sacrament which is highly needed in this age of lack of scrupulosity.
