## PREFACE

History always recalls National Census as one of the greatest achievements of any ruler who accomplishes it, precisely because it presupposes vision, systematic planning and sincere dream for sustainable development of his or her kingdom.

2012 was a milestone in the annals of the Latin Archdiocese of Trivandrum which celebrated its Platinum Jubilee that year. One of the important events which added colour and grandeur and substance was the socio-economic, pastoral and civic survey of the Archdiocesan population. Though the diocese was not new to such surveys, the present one was special with its coverage and depth. It was this bold decision and constant encouragement of Archbishop Soosa Pakiam that enabled us to fulfill such a satisfying, though hard and challenging, task with commendable output.
Preliminary discussions of the survey began in the beginning of 2011. There were many who enriched us to shape the survey format with solid support. The following ones deserve special mention of thanks: Fr. E.J. Thomas S J, Fr. Joye James S J, Dr. Irudayaraj, Dr. Charles Leon, Dr. Biju and Msgr. Eugine H. Pereira. It was also placed before the Diocesan Senate and other relevant Archdiocesan platforms, besides the directors of different ministries in the Archdiocese. A sample survey was carried out at Kochuthura, Nettayam and Thope during February - March, 2011. The format for data collection was presented in the Presbyterium held on 23rd August, 2011 along with the sample survey results. Suggestions were incorporated therein.

A Training of Trainers (ToT) was organized at the diocesan level on July 17th and 23rd 2011, for personnel such as the parish BCC coordinators, animators of various ministries and other parish representatives on the methodology of enumeration. They functioned as a resource team for training the enumerators at the villages. By the end of July, parish level training was completed. The field level survey was completed in five months starting from the month of August 2011. Some 2050 people were involved in the enumeration. From September 2011 onwards parishes began sending the completed survey forms. The commendable efforts of the parish priests, parish councils and other teams deserve a word of appreciation and thanks. Meanwhile, a new software was developed on VB. Net with Mysql for data entry and report generation. It is flexible enough to generate any combination of options. This parish/user-friendly software would not have been materialized but for the hard work and skills of Adv. Justus who deserves special thanks and it is joyfully recorded here.

Data entry which begun in November 2011 took almost eight months to complete. 39 people at different locations and times committed themselves to make it a reality. Though the names of all the members involved in the data entry are impossible to be mentioned here, the names of Mrs. Dayana, Mrs. Mercy, Miss. Jimmy Mole, Mr. Nandu, Mr. Sumesh, Bros. Ajith, Shijin, Immanuel, Marthoma and Lawrence can not go without mentioning. Their committed efforts are thankfully remembered here. Sr. Mary Vaz, the BCC office secretary, along with the animators and staff of BCC made all efforts needed to coordinate the entire process of data collection and entry. They together do deserve gracious thanks.

On 1st July 2013, the day of the Platinum Jubilee celebration, we could release the forane-wise family directory before the public which represented the source of this data base. After clearing errors the final data and its results were presented in the Presbytarium on 14th August, 2012 and priests were introduced to the use of the software. This introduction was given for the parish - forane representatives also.

The complete data were then handed over in November 2012 to ADHWANA, a State Level professional NGO, in order to bring out the report of the survey with the findings and recommendations. The volume in your hands with lot of information in tables and charts, along with analysis, findings and recommendations generated from the supplied
data is the result of sustained hard work of Dr. J. Mary John and his team of experts and staff. A big thanks to them. A special word of appreciation and thanks is due to SKETCH TRICKS for accomplishing the designing and printing works beautifully. We thankfully acknowledge the contributions of Mr. Peter Kattikadu in drafting a brief outline of the forane background of Pettah. We are indeed indebted to the Fr. Lenin Raj, the Secretary and Director, Trivandrum Social Service Society and to his staff in extending all possible supports throughout the process of survey, besides the financial assistance to carry out this task constraint- free.
Archdiocesan Synod, one of the great events of the Platinum Jubilee, discussed and suggested plans on various sectors and fields of activities. Further planning in detail, taking into account the ground realities of the parish communities needs to be done, yet. The plan will be SMART plan: Specific, Measurable, Achievable, Realistic and Time-bound. The survey and the report generated certainly will have its impact on that. The Report may serve as a historical data on our diocesan community and can form basis of comparison for future social analysis and planning, whenever necessary.
However, the findings of this survey shall better be used with constant and serious inputs from people's active participation at all levels of interventions- parish, forane and Archdiocesan. It is our modest expectation that it forms the basis for future planning.
We, the members of the Survey Team, take this opportunity to thank you, one and all for your share in making this a reality for the service of our valiant people who dare even the elements for sustenance and survival.

## Survey Coordination Team

## FOREWORD

"To know thyself is the greatest knowledge". The aims of "Latin Archdiocesan survey 2011" are: to know our Archdiocese in a better way; to know our strengths and weaknesses; to know the exact population; to situate ourselves with other communities; to find the areas of our development; to focus our ministries to the real needs of people. This is an eye opener to all members of our Archdiocese. The survey results reveal what we are and where we are today after 75 years of journey as a faith community rooted in Jesus and his principles.
"Latin Archdiocesan survey 2011" attempts also a study of each individual family and person in our Archdiocese. This effort taken in view of reaching substantiated inferences about our community has now reached to the present stage through expert guidance, participatory and collective action and thought, group discussions, well designed interview schedule, effective training sessions, tedious home- to- home data collection, tailor-made software preparation, patient data entry and intelligent data analysis-interpretation and high standard of organizing various factors.

This survey reports are arranged in two levels, namely Archdiocese-Forane level and Forane-Parish level. This is a very helpful tool for the decentralized planning in our Archdiocese which is a key principle of our first synod. Different ministries and commissions have to make use of this survey analysis for their entire planning of the ministry and could reflect in the annual plan and budget at least for the next 5 years. The forane which has regional preferences and priorities should make use of these survey findings for their long and short term planning of various ministries and concerns they face. As pastors and leaders of the community, they should make use of these results and analysis for their parish ministry. The parish councils, finance councils and other bodies in the parishes have to see their priorities and levels of different areas and should make efforts to improve them by planning and executing different programs for the target groups.

I sincerely appreciate this great task and all the persons who toiled to make this dream a reality. We are on our way to an improved situation not only in terms of our socio-economic progress but also in terms of our skills to understand the reality.

I love to state here that undertaking such an exercise should not be stopped with this one. At the completion of every tenth year, a similar exercise has a more relevant space in the process of updating the information. I once again appreciate each and every one behind this great achievement.

SOOSA PAKIAM M.

## PARISHES IN PETTAH FORANE

Latin Archdiocese of Trivandrum

## THIRUVANANTHAPURAM LATIN ARCHDIOCESE. HISTORICAL BACKGROUND

## Introduction

Christianity claims its presence in Kerala since the $1^{\text {st }}$ century itself. Its inception was supposed to be by 52 AD with the arrival of St. Thomas, the Apostle, in this land. However, a historical study of Christian community in Kerala forgetting the services of foreign missionaries, who sacrificed their lives to promote social justice among the people of this land, who were suppressed and depressed under the then prevailing untouchability and colour discriminations, may perhaps be incomplete.

## Origin of Christian Community

In the past, Quilon was a prominent and predominant commercial centre of Travancore. Even before the merchants from western countries came to Travancore for their trade and commerce, the missionaries from Europe visited Travancore to propagate the Good News of Jesus, the Christ. Marcopolo, a famous traveler from Venice, who visited Quilon in the year 1292 AD has engrossed that there was a Christian community in this land. The seeds of faith, sown by the Franciscans and Dominicans, which were confirmed and strengthened by St. Francis Xavier, the Jesuit, and his followers, resulted in the formation of Christian communities along the coastal area of the erstwhile Travancore.

Pope John XXII, by a Decree "ROMANUS PONTIFIX" established the Diocese of Quilon in the year 1329, which became the first diocese in India. The writings of St. Francis Xavier mentions places such as Vizhinjam, Karumkulam, Puthiyathura, Pulluvila, Kollamcode, Vallavila, Thoothoor, Puthenthura, Thengappattanam, Inayam, Midalam, Vaniyakkudi, Kulachal, Kadiyappattanam, Muttom, Pallom, Manakkudi. The areas from Kulachal in the south to Adimalathura in the north were under a vicariate as recorded by Fr. Valithano, a Jesuit Missionary. There are evidences that Christian communities were existing at Mampally and Roitora even prior to the arrival of Francis Xavier.

## Formation of Trivandrum Latin Diocese

By $17^{\text {th }}$ century the Carmelite Missionaries landed in India. In 1898 , when Rt. Rev. Dr. Aloysious Maria Benziger was the Bishop of Kollam, the Carmelite Missionaries from Belgium resorted at Travancore and concentrated on mission works. Their mission area covered the present dioceses of Kollam, Punalur, Thiruvananthapuram, Neyyatinkara and Kottar which were part of the Diocese of Kollam. In 1930 Kottar diocese came into existence. In 1937 Pope Pious XI by a Decree "IN ORA MALABARICA" established the Trivandrum Latin Diocese by bifurcating the Kollam Diocese. The revenue Taluks of Chirayinkeezh, Thiruvananthapuram, Nedumangad and Neyyattinkara were placed under the jurisdiction of Trivandrum diocese. In 1952 the coastal parishes from Pallithura to Erayimmanthura were de-linked from Cochin Diocese and attached to the Diocese of Trivandrum.

## Bishops on Service

On formation of Trivandrum Diocese Rt. Rev. Dr. Vincent Dereira, the then Bishop of Kollam was appointed as the

#### Abstract

$1^{\text {st }}$ Bishop of Trivandrum Diocese. During his tenure the catholic population in the diocese increased to around three Lakhs and in the educational sector there were 63 primary schools, 28 U.P schools, 15 High Schools, 2 Training schools and 3 Colleges. Rt. Rev. Dr. Peter Bernard Pereira, who followed Bishop Vincent Dereira was the first Bishop from the soil and his tenure was from October 1966 to June 1978. Bishop Pereria lighted the lamp for many social developmental activities in the diocese. One of such is Marianad Community Development Programme. Trivandrum Social Service Society, a registered social service society is a pioneering initiative of Bishop Pereira. The Indian Space Research Organisation at Thumba was made possible because of the visionary intervention of Bishop Pereira. It was during his time that the land base for the future development of Trivandrum diocese was created.

Bishop Peter Bernard Pereira was succeeded by Bishop Jacob Archaruparambil OFM Cap, who was in service from October 1979 to 1990. It was during his period that the historical event of Kottar Living Together took place in the Golden Jubilee year of the diocese which gave new outlook to the diocese as a Participatory Church and the Church as the People of God by inculcating the vision of II Vatican Council. In the year 1990 Bishop Soosa Pakiam took charge of the diocese. Tremendous achievements both in the spiritual as well as social arenas have been made in the diocese during the past 23 years. Decentralization and participation were the basic principles adopted in every stage of administration in the Local Church.

## Bifurcation of the Diocese and Elevation as Archdiocese

In 1996 Trivandrum diocese was bifurcated and a new diocese came into being - Neyyatinkara Diocese. Thus the area of Thiruvananthapuram diocese was reduced to 686 sq. k.m. which encompassed the areas from Ayiroor of Chirayinkeezh Taluk in the north to Erayummanthurai of Vilavancode Taluk of Kanyakumari Dist in the south. A major portion of Trivandrum diocese is located along the coastal belt with six foranes, which extends to about 76 k.m in lenth. There are two foranes in the interior.

In the year 2004 Pope John Paul II was pleased to elevate Trivandrum diocese as an Archdiocese with Alappuzha, Kollam, Punalur and Neyyatinkara as its suffragent dioceses. Bishop Soosa Pakiam was elevated as the Archbishop of this ecclesiastical region.

## Renewal Process in the Diocese

The general observation is that the socio-economic, educational and political situation of the people of our diocese is not very impressive and the available statistics shows that they are far behind many of the other communities in Kerala. Diocese has adopted many strategies over the years to lift the community to the mainstream according to the need of the time. Especially community building that took place after the 'Kottar Living Together' and the structural and functional changes evolved in the diocese have contributed much to its growth.
There are several parishes (80) and sub-stations (43) working as the arms of the Archdiocese to implement, inter alia, the socio-economic-pastoral and educational activities with the people. Basic Christian Communities (BCCs) have been formed in all the parishes and sub- stations in order to enhance and sustain the active participation of the people and decentralization of the ministries. Pastoral ministry touches the pastoral and spiritual life of the people through the commissions of Bible, Catechism, Liturgy, Family Apostolate, Evangalization, Ecumenism and Dialogue.
In the educational sector there are 5 Higher Secondary Schools, 2 High Schools, 4 U.P Schools, 17 L.P Schools, 1 CBSC School and one Centre for Excellence, one Engineering College, one Nursing College, one ITC and one B.Ed College under the Archdiocesan management. Other than this there are 19 schools under the direct control of parish managements and 25 schools under the management of the religious and 4 schools under the Trusts of Latin Catholic lay people.

Social action ministry steered by Trivandrum Social Service Society has five departments such as (1) Capacity building, (2) Advocacy, Policy Lobbying and Net-working, (3) Socio-economic development and employment, (4) Health, environment and education and (5) Administration and Research. The activities are carried out through
various community based-organizations (forums) and institutions. There are 6 forums and 11 institutions under Social Action Ministry taking care of various target groups.

Other relevant activities of the Archdiocese are carried out through the Board for Clergy and Religious, Board for Temporalities, Board for Evangelization and Board for Laity. There are other autonomous ministries such as BCC, Youth Ministry, Media and Fisheries.

## Conclusion

The present survey is the first of its kind in terms of the preparations undertaken for execution, wide coverage of all Parishes and Foranes of the Archdiocese, inclusion of major socio-economic and pastoral subjects, the systematic conduct and team work and involvement of professional experts in various stages. The task and the results of this program are considered as one of the milestones in the annals of the archdiocese of Trivandrum. If this survey and its finding could be instrumental for various ministries to bring out certain remarkable changes in the growth of the People of God in our local church, that will certainly open up for a new horizon in the path of development and building up of the Kingdom of God.

## PETTAH FORANE A BACKGROUND SKETCH

Present Pettah forane was part of Palayam forane until it was formed as a new forane in 1995. And then St. Anne's church which was one of the oldest churches in the diocese was elevated as the forane church and Fr. Charles Leon the then parish priest of St. Annes' church became the first Forane Vicar of the Forane. Most of the area of pettah forane are mission area and since it is attached to Trivandrum city many Catholics migrated from other part of the diocese and state to this side for employment and education of their children.

Boundaries: South - Vanchiyour, Pattoor, Moolavilakam road. West - Enchackal, Kazhakootam road. North - Kariyavattam, Thundthil road \& Chathavila. East - Pettah, Medical College, Kesavadasapuram, NCC road.

The parishes in the forane: St. Annes Church-Pettah, Holy Cross Church- Muttada, Pious X Church Kumarapuram, St. Mary's Church-Pongumoodu, Little Flower Church- Monvila, Our Lady of Lourdes Church Thundathil are the six major parishes in the forane. Along with that there are four other parishes where priests are residing, they are Christ the King Church-Kariavattom, St. Antony's Church-Njandoorkonam, St. Christopher churchPangapara, St. Joseph's Church-Vikas Nagar. Other than these there are eight substations; they are Nithya Sahaya Matha Church-Kunninpuram, Sacred Heart Church- Mangattukonam, Immaculate Conception Church-Pullukadu, Little Flower Church-Pushpagiri, Vimala Hrudaya Church-Avukulam, St. Joseph's Church Chengottukonam, Velankanni Matha Church- Cheruvakkal, Little Flower Church-Kusavarkkal. Appart from these there three mass centers such as St. Joseph's-Karaly, St. Jude's- Anayara, St. Joseph's Mannanthala. Thus, altogether there are 21 stations which cater to the spiritual needs of the people.

Though it has got a vast geographical area, catholic population is comparatively very less. There are only 8876 faithful in the forane in 2485 families and they form 107 BCC units. Perhaps mission activities in the past were not that effective or people may not have felt the need of embracing Christianity in these areas, However the presence of Syro Malankara rite in a larger extent and Syro Malabar rite in a limited extend is found here. Similarly other Christian denominations also had deep routed presence in this area.

Religious Houses: There are four men and nine women religious houses in the forane. They are 1.Pallotine fathers in Monvila and Sreekariam, 2. Jesuit fathers in Sreekariam, 3. Redemporists fathers in Muttada, 4. Sisters of St. Ann, Trichi Provincial House- Muttada, 5. Holy Cross Sisters in Pettah, 6. CCR sisters in Kumarapuram, 5. Vimalahrudaya sisters in Kumarapuram, 7.Oblate Sisters of Sacred Heart of Jesus in Kumarapuram, 8. Congregation of Apostolic Carmelite Pongumoodu, 9.Daughters of the Heart of Mary (DHM), Monvila, 10. Sisters Adoris, Karyavattom, 11. Fransiscan Missionary sisters, Thundathil.

## Diocesan and Religious Institutions:

There are certain diocesan and religious institutions within the boundaries of the Forane. They are St. Ann's Malayalam \& English medium LP School, Pettah; Malayalam medium LPS \& St. Joseph's English medium High School, Muttada; Layola School and Layola College, Sreekariyam. There are a few training and rehabilitation centres situated in this Forane. They are: Layola Extension Services (LES) (Training Center), Maria Rani Center (Pallotins) (Animation Center), Nirmalalayam Rehabilitation centre for women; Sadhana Rehabilitation Centre for mentally challenged men and Snehasramam (Jail Ministry).

Major Government Institutions: Being part of Trivandrum city this forane is also blessed with many of the National and State institutions. Some of them are Trivandrum Medical Collage and Engineering college, Sree Chithra Medical Centre, Regional Cancer Centre, Centre for Earth Science, Centre for Development Studies, University Campus-Kariavattom, National Institute for Speech and Hearing, Lakshmi Bhai National College of Physical Education, etc.

Conclusion: Development of the mission areas is the major concern of the forane. Most of the churches in the mission areas are in dilapidated condition. Renovation/construction of one church a year in the mission area is a target of the forane since two years. Established parishes have taken initiative to support the mission parishes. Special attention is given to the Dalits and the poor. Area of education is given priority. In the contest of Archdiocesan Synod, the Diocese gives special support to the mission areas through the newly formed Ministry for Laity.

## CHAPTER 1

## INTRODUCTION

## Context

The Latin Catholic Archdiocese of Trivandrum was established in 1937. Half a century has elapsed under four Prelates. The Golden Jubilee Celebrations offered a good opportunity for reflection on the current status as well as future possibilities of the Diocese. Naturally the importance of developing socio-economic as well as pastoral profiles of the population, parishes, Foranes and the Archdiocese as a whole was keenly felt. After weighing the pros and cons as well as considering the modalities to be adopted, it was decided to do a comprehensive and integrated census survey, covering the entire families and individuals of the Archdiocese.

## Goal/Overall Objective of the Survey

The ultimate goal of the Census survey was to ensure that Archdiocesan, Forane and parish level socio-economic and pastoral planning processes are made more specific, measurable, achievable, realistic and time bound (SMART) and based on empirical data.

## Specific Objectives

- To collect/generate comprehensive and reliable data bearing on all aspects in the socio-economic and pastoral life of the families and individuals in the Archdiocese
- To prepare and bring out separate reports for each forane and a consolidated report of the entire Archdiocese, containing the findings of the survey.

## Data Base

All Latin Catholic families who were members of the Parishes belonging to the Latin Archdiocese of Trivandrum (hereinafter called Archdiocese) consisted of the data base for the survey

## Source of data

The source of data used for this report was the census survey conducted by Trivandrum Social Service Society (TSSS) during the 2011-2012 period.

## Geographical Coverage

The survey tried to cover all the Latin Catholic families who were members of 115 Parishes in 8 Foranes in the Archdiocese. The names of Foranes and corresponding number of parishes covered in the survey are given in the table below:

Foranes and number of parishes covered in the survey

| SI. No | Foranes | No of Parishes including <br> sub-stations |
| :--- | :--- | :--- |
| 1 | Thoothoor | 8 |
| 2 | Pulluvila | 15 |
| 3 | Kovalam | 14 |
| 4 | Valiyathura | 10 |
| 5 | Pettah | 19 |
| 6 | Palayam | 19 |
| 7 | Puthukurichy | 19 |
| 8 | Anchuthengu | 10 |
|  | Total | 114 |

## Demographical Coverage

The Survey covered 58501 families and 217821 individuals with 112287 males (51.55\%) 105534 females ( $48.45 \%$ ) in 8 foranes.

## Sectoral Coverage

The survey covered several important and relevant sectors and subjects and collected data on families and their members. The following table shows the family-based and individual-based data collected on various areas and subjects.

Areas and subjects covered by the Survey

| Sectors | Subjects |
| :--- | :--- |
| A. Family-based data |  |
|  | Ownership of House |
|  | Type or Quality of House |
|  | Number of rooms in the house |
|  | Number of families living in the house |
|  | Number of members living in the house |
|  | Ownership/possession/ occupation of land |
|  | Area of own land |
|  | Gender distribution of land ownership |
| Energy consumption |  |

| Other assets ownership | Ownership of home appliances |
| :---: | :---: |
|  | Ownership of vehicles |
|  | Subscription to media and publications |
|  | Fishing equipments |
|  | Other work equipments |
|  | Commerce and industry |
|  | Agriculture |
|  | Family Expenditure |
|  | Debts |
| Possession of ration cards |  |
| APL/BPL |  |
| Coverage of Health Insurance |  |
| Sanitation facilities |  |
| Water for domestic use | Source |
|  | Drainage |
| Solid waste disposal | Destination |
| Children's Education | Study facilities |
|  | Parents' monitoring |
|  | Community support to education |
| Faith/Parish life | Availability of POC Bible |
|  | Family prayer |
|  | Participation in BCCs |
| Occurrence of Death |  |
| B. Data on individual members in the family |  |
| Sex distribution |  |
| Relation ship |  |
| Blood group |  |
| Marital status |  |
| Stages in life |  |

| Education | Levels |
| :---: | :---: |
|  | Medium of study |
|  | Subjects studied |
|  | Type of educational institutions accessed for studies |
| Employment and labour | Area of employment and labour |
|  | Positions in employment and labour |
| Health | Diseases |
|  | Bad habits |
|  | Disabilities |
| Involvement in Church/ Civil society organizations |  |
| Faith life | Participation in Holy Mass |
|  | Catechism |
|  | Sacrament of Reconciliation |

## Data collection process

Having decided on the geographical, demographical, sectoral and subject-wise coverage, a specific interview schedule corresponding to the areas and subjects was framed by the Archdiocesan team as the main tool for collection of data. Keys and supporting notes were made and sufficient copies were printed. Simultaneously, investigators for data collection were identified by the Parishes at the BCC level under the guidance of the Archdiocesan survey team. Subsequently, trainings were conducted to impart necessary knowledge and skills to the enumerators identified for data collection. Under the direct monitoring of the Parish Priests, the enumerators collected data from the families at the BCC unit level in the parishes.

Data collection involved 2050 persons and took 6 months to cover the entire area. During the process, frequent visits and interactions were made by the survey team.

## Data processing

The data thus collected in printed schedules were sorted out and minor errors were rectified. The entire data were then entered into a tailor-made SOFT WARE so that the outcome of the survey could be directly accessed by the parish priests to understand the profile and situation of each and every family in the Parish. Subsequently, it was decided to prepare a consolidated survey report which could be of immense support for multi-level planning processes in the Archdiocese for a reasonable period of time.
Accordingly, data entry was completed with the support of a team of technical personnel and a directory of families was released based on it. Finally, the work of tabulation and analysis of data together with the task of report formulation at the Forane and diocesan levels was entrusted with a State level specialized agency, ADHWANA. After tabulation of the entire data at the Forane and diocesan levels, interpretation and analysis of the data were completed. Forane-wise reports were separately prepared for 8 Foranes and an Archdiocesan report was prepared at the end. During this process, series of discussions took place with the Survey Coordination Team.

## The Reports

Each report is organized into three chapters. This first chapter deals with context and methodology of the entire process of the census survey. The second chapter presents the data processed in interpretative narration with charts or tables, hinting on the findings and implications of the information. Where ever relevant, sex-wise and age-wise analysis was attempted. In the third chapter, a summary of findings, related conclusions and some recommendations are given. The recommendations are meant to provide a space for more thinking to address the problems reflected in the survey findings. However, it is for the concerned communities to collectively plan appropriate programs to address their issues in a meaningful manner.

In all cases, original tables are given in the Annexure, while charts and summary of some tables are included within the report at appropriate place.

## Limitations of the Survey

- Though it was planned to cover the entire families and all the parishes in 8 Foranes in the Archdiocese, the coverage is subject to further verification with other sources of information such as Parish records.
- The usual data collection errors crept into the data to a small extent. The enumerators were mostly raw persons without prior experience in the job.
- Data requirement on a large number of subjects was not fully responded in several sectors and no data was available on those subjects.
- It was also found that some of the data available were not tallying with other related data, may be, due to differences in understanding the questions from the part of the interviewers and respondents.
- Since there were no earlier reliable reports or statistics corresponding to the regions and subjects covered by this survey, the analysis could not be carried out by comparing or contrasting with the past situation.

## Scope of the Survey

- In spite of the above limitations, which one has to expect in any such large process, the present survey has brought forth a very high level of qualified and quantified information useful for planning in sectors and localities covered in the survey
- It brought forth conclusions and recommendations which could be followed up by the Archdiocese in the near future through its various Ministries and Commissions.
- It provides reasonable insights for other dioceses to take up similar processes for planning
- The tables annexed to this report at the end will help individual parishes to find their situation and plan their programs accordingly.

## Pettah Forane

This volume is the Forane level Report of the Pettah Forane. Pettah Forane consists of 19 Parishes located within the Trivandrum Municipal Corporation area and some of the surrounding locations. The languages spoken in the region are Malayalam and English. All the sectors and subjects mentioned above were covered in the survey. In the next chapter, the data on Pettah Forane is presented with graphics and charts at appropriate places.

## Chapter 2

## PRESENTATION OF DATA

The tabulated and processed data on Pettah Forane are presented in this chapter, under various sectors and subjects. First section deals with family-based information, while second section presents the situations regarding individual members in the families.

## SECTION ONE : Families

The survey covered 2485 families from 19 parishes in Pettah Forane. This is \% of the total number of families covered by the survey in the Archdiocese. In the Forane, the largest number (694) and percentage ( $27.93 \%$ ) of respondent families lives in Pettah Parish, while the next largest number of families (501) was found in Muttada Parish $(20.16 \%)$ followed by Kumarapuram with 179 families ( $07.20 \%$ ). Chengottukonam had the smallest number of respondent families (8) in the Foronate (0.32\%).

Family-wise distribution of parishes (\%)

## Family-wise distribution of parishes (Nos)

## HOUSING

## Ownership of houses

Ownership of a house by a family is considered as the most basic asset for progress next only to land ownership and so the important indicator for sustainable development, socio-economic status, socio-cultural rootedness, identity and long standing relationships with the environment. The subjects covered in housing sector were ownership of houses, type or quality of houses, number of rooms in the house and number of families living in a house.

Table No 1 deals with ownership of houses. The concept of ownership in this survey included real ownership, possession or occupation of a house. 'The homeless' was defined as those who did not have their own house and so lived with parents, siblings, relatives or friends. In Pettah Forane, though a good majority of families (69.01\%) owned their houses, $11.63 \%$ (289) of families were found to be homeless and 299 families ( $12.03 \%$ ) lived in rented houses in the Foronate. Whether the families living in rented houses had a house elsewhere or not was not made clear by the data. If these families did not have a house elsewhere, the total number of the homeless may increase substantially (Chart No.1)

When compared with the general housing situation in Kerala where 95\% of families have their own houses (KSSP3,2006, p.40), the percentage of families with own houses in Pettah Forane is much low.

Chart No. 1 : Ownership of houses

Across the parishes, the largest percentage of families with own houses were found in Thundathil (94.68\%), followed by Vikas Nagar (79.17\%) and Monvila (78.13\%). The highest percentage of homeless families lived in Karali with $30.43 \%$ (7), followed by Pullukad with $23.53 \%$ (4) and Kushavarkal with $21.54 \%$ (14).

## Type or quality of houses

Table No. 2 presents the type or quality of houses owned by the families who reported that they had their 'own' houses. Those families who had own houses or rented houses alone were covered here. As per the data available from Pettah forane, the largest section of families in the Foronate lived in concrete houses (46.6\%) and a fairly good percentage lived in multi-storied houses (16.10\%). $12.47 \%$ of families lived in tiled houses; a substantial percentage of families ( $7.44 \%$ ) lived in sheet-roofed houses. Families who lived in huts ( $0.20 \%$ ) or thatched ( $1.29 \%$ ) houses were found in very insignificant numbers in the Pettah Forane. Only 5 families were living in huts in the Forane. $8.93 \%$ of families deserve attention in this regard. (See Chart No 2)

The above figures when contrasted with the Kerala situation differ in certain areas. While $47.3 \%$ of houses in Kerala were roofed with tiles, only $14.47 \%$ of houses in Pettah Forane were tiled. However, there was not much difference in the case of concrete houses between Pettah (46.60\%) and Kerala (43.3\%).

## Chart No 2 : Type or quality of houses

## Number of rooms in the houses

An analysis of the number of rooms in the houses surveyed in the Foronate is given in Table No. 3 to measure the size of the houses. Kitchen inside the house was counted as room. Sit out, car porch, toilet and bathroom and kitchen outside the house were not considered rooms. Accordingly, $48.49 \%$ (1205) of families lived in houses having 1-4 rooms and a smaller, but substantial percentage ( $33.40 \%$ ) of families lived in houses with 5-8 rooms. $11.91 \%$ of families lived in houses with more than 8 rooms. (See Chart No.3)

Chart No. 3 : Number of rooms in the houses

## Number of Families accommodated in a single house

Table No. 4 presents the number of families accommodated in a single house. Marriage was considered as a base for family. The data were collected by the real owner of the house where more than one family lived.

Majority of the houses (70.50\%) accommodated single families or the so-called nuclear families. It was found that $11.79 \%$ house holds accommodated at two families each per house. A smaller number of families (2.94\%) lived with two other families in a single house. 28 families ( $1.13 \%$ ) shared a house with more than three families.

The highest percentage of 'one family-one-house pattern' (the so-called nuclear families) were found in Avukulam parish ( $85.71 \%$ ). Minimum percentage of such families was found in Pushpagiri parish with 60 houses ( $60.53 \%$ ).

Chart No. 4 : Number of Families accommodated in a single house

## The accommodation pattern of individual members in houses

The accommodation pattern of individual members of families in the available houses is reflected in Table No.5. The largest section, that is, 1591 houses ( $64 \%$ ) had only $1-4$ members living in it, while $21 \%$ (514) houses accommodated 5-8 members. More than 8 members were accommodated in $2 \%$ ( 52 ) of the total houses.

This meant that a substantial number of families lived in a congested manner in houses without enough number of rooms. The personal and or family privacy were at risk in this context. The data did not make it clear if these members belonged to a single family or more than one family. It might have had members of two or three families living in the same house.

Chart No. 5 : The accommodation pattern of individual members in houses

## Housing at a glance

The above mentioned 5 tables and charts together give a summary of the housing situation in Pettah Forane. A total
of 2485 respondent families lived in 2331 houses, assuming that no family lived on the street.
This increased the vulnerability of the 289 homeless families (11.63\%) because at any moment they could be forced to get out of the home they lived.

Forane level aggregates showed that there were grey areas to be attended with regard to housing. There were families living very uncomfortably in huts, thatched and sheet-roofed houses $(8.93 \%-222)$ in this fast growing urban area, though majority had good and durable houses.

Though almost $50 \%$ of the houses had $1-4$ rooms, $11.91 \%$ of houses had more than 8 rooms. A considerable percentage of houses ( $33.40 \%$ ) had 5-8 rooms. Largest section lived in moderate and small houses.
On the whole, largest sections of families both in the Forane level ( $70.50 \%$ ) and in the Parish level were found sharing 'one family-one-house pattern'.

The largest section, that is, 1591 houses (64\%) had only 1-4 members living in it, while $21 \%$ (514) houses accommodated 5-8 members.
The homeless families and families living in rented houses amounted to a significant 23.66 percentage (588). When considered together, the issue becomes serious and big.

## LAND

This sub-section deals with ownership, possession or occupation of land by the families, area-wise distribution of land and sex-wise distribution of ownership/possession/occupation of land in Pettah Foronate.

## Ownership/ Possession or Occupation of various nature of Land

According to the data given in Table No.6, of the 2485 families, only 1891 families ( $76.10 \%$ ) had their 'own' land, excluding those families who lived under tenancy ('Kudikidappu') land (1.25\%), Puramboke land ( $0.04 \%$ ), church-owned land ( $0.04 \%$ ) and lease ( $0.52 \%$ ). The Forane had 468 (18.83\%) landless families.

Chart No. 6 : Ownership/ Possession and Occupation of various nature of Land

Among the Parishes, Karali was found to have the largest percentage ( $30.43 \%-7$ ) of landless families, followed by Kushavarkal (29.23\% - 19), Kumarapuram (25.07\%-46), Pushpagiri (24.56\% -28) and Pangappara (20.51\%-16).
A close link can be found between homelessness and landlessness pointing to the cause-effect relationship.

## Land Area-wise distribution of families

Table No. 7 reports the distribution of land among families who had some type of land under their ownership/ possession/ occupation, including tenancy, church-owned and puramboke. It was found that among the families who owned land, the largest section of families in the Foranate (923) had only $1-5$ cents of land (37.14\%). While
$23.50 \%$ (584) of families owned $5-10$ cents, a small percentage of families ( $7.81 \%$ ) had land between $10-15$ cents and $7.81 \%$ (194) more than 16 cents of land. There was a lack of information regarding 93 ( $3.74 \%$ ) families.

Chart No. 7 : Land Area-wise distribution of families

Across the parishes, Avukulam had the largest percentage of families with 1-5 cents of land ( $60.71 \%$ ), followed by Kushavarkal ( $58.46 \%$ ). It was Chengottukonam where there was the largest percentage of families ( $37.50 \%-7$ ) having more than 16 cents. Chengottukonam was the smallest parish in the survey in Pettah Forane with smallest number of families (8). It was noted that in Pettah Parish alone there were 34 families with more than 16 cents.

Families with larger areas of land assets were limited to a small percentage pointing to the weak asset base of the families in the Forane. Those who owned land possessed only small plots. This limited their scope of livelihood through agriculture.

## Sex-wise distribution of land

Table No. 8 speaks about the sex-wise distribution of land ownership/ possession/ occupation. With regard to $34.81 \%$ (865) of total respondent families, control over land was vested with male adult members, while only $22.70 \%$ (564) families reported that their land was registered in the name of female adult members. A considerable number of families, that is, 449 ( $18.07 \%$ ) families said that the land was 'owned' jointly by the male and female adult members, most probably husband and wife.

A difference of 12.11 percentage points was visible between male and female ownership of land in favour of male. Females were in a disadvantaged position.

Chart No. 8 : Sex-wise distribution of land

Male, 34.81\%

As far as the individual Parishes in the Foranate were concerned, Pettah parish had the largest number of families with land both under the ownership of the male persons (232-33.43\%) and female persons (116-16.71\%).

## Landlessness at a glance

A good number of families ( $468-18.83 \%$ ) still were found without a piece of land, pointing to a cause for concern.
Among those who said that they had some kind of land, the majority ( $56.27 \%$ ) had only the minimum size of land ( $0-5$ cents).

The gender bias in favour of males was clear from the data on land ownership at the Parish level also. Land, the most basic asset for sustainable development, remained a matter of concern in the Foronate of Pettah.

## ENERGY CONSUMPTION

## Energy consumption for cooking

The survey inquired about the source of energy used for cooking and other purposes by the families in the Forane and examined the percentage of families using one or more of the sources like smokeless stoves, traditional stoves, LPG, Biogas, Solar energy and electricity. The use of various types of energy sources were considered in the survey as indicators of awareness about energy conservation and its sources, impact of use of a particular source of energy on climate change and sustainable development and impact on family expenditure and level of economic status of the family.
Table No. 9 reveals that majority of the families (1964) in the Forane used LPG (79.03\%). It was alarming to note that as high as $35.45 \%$ (881) families still used traditional stove using firewood, may be together with gas. Latest studies show almost the same size of people (35\%) using firewood and gas for cooking in Kerala. The data shows that 1527 (61.44\%) families used more than one source. Smokeless stove was partially depended on by a very small proportion ( $3.01 \%$ ) of families. Very insignificant percentage and number of families (18) used biogas ( $0.72 \%$ ) and solar sources ( $0.56 \%$ ). A considerable portion of families (1135-45.67\%) used electricity together with other means. $86(3.56 \%)$ families did not use any of the above sources and further probing was required to find out what source of energy they used for cooking.

Chart No. 9 : Energy consumption for cooking

In the Parish level, Pettah parish had the highest number and percentage of families using LPG (581-29.58\%), followed by Muttada (443-22.56\%) and Kumarapuram (-160-8.15\%). In the case of traditional stove, it was Muttada Parish where the highest number and percentage of families used it (137-15.55\%) together with other sources, followed by Pettah (132-14.98\%).

Use of non-conventional and renewable energy sources was found very limited among families even in the urban Pettah Foronate.

The use-pattern of different energy sources showed that the level of awareness about energy and its sources, impact on climate change and sustainable development and impact on family expenditure was very low or that the people did not care about the source of energy.

## ECONOMIC CONDITIONS

In the survey an additional effort was taken to measure the economic conditions of the families in the foronate by certain indicators such as ownership of home appliances, vehicles, subscription of media, publications and communication gadgets, equipments for fishing and other occupations, commercial and industrial assets.

## Home appliances

Ownership of one or more of the home appliances was related to the economic position of the families. Table No 10 deals with the use of home appliances by the families in Pettah Foronate. Mixey was found as the most popular home appliance used by the majority of families ( $81.81 \%$ ), followed by Fan ( $81.13 \%$ ), Fridge ( $68.93 \%$ ) and C D Player (42.62\%). It was found that computer was used by more families ( $35.21 \%$ ) than those who used tape recorders $(22.74 \%)$. 11.15\% of families (277) were found using or owning Air Conditioners at home. It was found that in Pettah Foronate, $8.09 \%$ (201) of families did not own any of the above home appliances. Majority of the families owned necessary home appliances such as mixey, fan and fridge.

Across the Parishes, the largest number and percentage of families using computer (267-30.51\%) was in Pettah parish, followed by Muttada (243-27.77\%).

Since ownership and use of modern and more home appliances in a house is an indicator of a better economic status of the families, a considerable percentage and number of $(8.09 \%-201)$ of families did not have even a fan, is a case for concern.

Chart No. 10 : Home appliances

## Ownership of Vehicles

Ownership of vehicles is another important indicator of economic status of the families. Surprisingly, it was found that a very large percentage (40.16\%) of families did not own even a bicycle in this urban forane. Among those who owned any one of the vehicles, the largest section, that is, $43.30 \%$, owned two wheelers, followed by those who owned four wheelers ( $27.85 \%$ ) and those who had bicycles (10.66\%) (Table No.11)

Chart No. 11 : Ownership of Vehicles

In the Parish level analysis, it was noted that Pettah Parish stood higher in the case of two wheelers (290-26.95\%) and four wheelers $(212-30.64 \%)$ and bicycles (265-10.66\%). Muttada Parish stood the next in these cases. Contrastingly, Pettah (274-27.45\%) and Muttada (153-15.33\%) parishes stood first and second respectively in the case of families having none of the above vehicles.
The data thus reflected the uneven economic status of the society, while the percentage of the richer sections increased with an increase in the percentage of the poor, when we consider ownership of vehicles as an important indicator of financial status.

## Media and Publications

The use of and subscription to various visual and print media programs is an indication of financial position, involvement in public affairs, level of civic sense and thirst for knowledge.
Table No. 12 presents the data regarding the ownership/use of and subscription to media and publications. List of items specified for investigation in the survey included news papers, 'Jeevanum Velichavum' (the Archdiocesan monthly), 'Jeevanadam' ( weekly publication of KRLCC) promoted by the Latin Catholic Church in Kerala, other publications, television, land phone, mobile and internet.
In Pettah Forane, it was found that television was the most popular medium used by majority of families ( $73.80 \%$ ), followed by mobile phones $(71.19 \%)$. News papers ( $61.21 \%$ ) were the next largest source of information and entertainment used by the families in the Foranate. A substantial percentage of surveyed families (12.76\%) did not have any of the above media/publications/source of information, not even a news paper, and in contrast, more percentage of families had internet connection (19.20\%). It was noted that only a small percentage of families subscribed to Jeevanadam (6.04\%) and Jeevanum Velichavum (14.41\%).

Chart No. 12 : Media and Publications

Pettah and Muttada parishes were found using the media and publications taken together in higher numbers and percentages among the parishes in the Pettah forane.
The data showed that the influence of electronic media over the print media in urban centers was found very high. The Church publications have not yet influenced the families in the foronate.

## Ownership of Fishing Assets

Being a forane with non-fishing occupations, none of the families owned any of the listed fishing assets and so further analysis was irrelevant in this regard (Table No.13).

## Other Occupational Equipments

Regarding the ownership of other equipments as assets for livelihood, besides fishing equipments, a number of items were considered by the survey as given in Table No.14.

A vast majority of the families ( $84.95 \%$ ) in the foronate did not own any of the items listed in the said table of other assets and equipments used for livelihood. Of the remaining, the largest percentage of $9.22 \%$ (229) families possessed sewing machine, followed by those who had auto-rikshaw ( $2.54 \%$ ) and cameras ( $2.45 \%$ ) and only a very insignificant numbers of families had one or the other equipments listed in the survey.

Chart No. 14 : Other occupational Equipments

While the ownership of other equipments as assets were also considered as indicators of economic strength and
source of livelihood, the families in the foronate were found to be having a very low share in this regard. All these 'other equipments' were included in the study as means of livelihood or business.

## Trade and Commerce

Table No. 15 presents data on proprietorship or ownership of firms, businesses or self-employment units in Pettah Foronate. The data shockingly revealed that the families were very poor in possessing trade and commerce. A vast majority of the families, that is, $90.38 \%$ (2246) did not have any one of the firms or shops or industry or self-employment units. Among others, only $4.35 \%$ (108) had some kind of self-employment units. This also revealed another fact that majority of the people who owned sewing machines were not making use of it for income generation for livelihood. Very small number of families had shops ( $1.13 \%$ ) or petty shops $(0.72 \%)$.

Chart No. 15 : Trade and Commerce

The findings regarding the items considered in the survey for measuring the financial conditions of the respondent families show that the Forane's major income sources did not flow from the assets they owned in higher size such as televisions and mobile phones, mixey or fan. The forane was found very poor in the ownership of other assets for livelihood.

## Agriculture and Livestock

Agriculture as reported here excluded fishing and included popular crops found in southern Kerala. Agriculture Table No. 16 provided the details regarding the distribution of families having various crops. Obvious findings have come out of the data regarding agriculture and livestock in Pettah Forane. $90.02 \%$ did not have any of the listed or other items. The largest percentage of families (4.99\%) had coconuts, followed by plantains (3.14\%), vegetables $(1.81 \%)$ and flowers $(1.33 \%)$. Other items considered were paddy, rubber, cash crops, tapioca, pischiculture, cattle and poultry. It is evident that not many families went for commercial or regular agricultural activities.

Chart No. 16 : Agriculture and Livestock

The data showed that very few families were interested even in kitchen gardening and mini poultry farms which might be highly viable in the region. Their lack of interest may not be causally related to lack of awareness of the benefits of kitchen gardening or egg making or similar things, since they had better facilities of information and exposure. The situation points to the negligence or lack of interest.

## Spending Pattern (Monthly Expenses for food)

A family's monthly expenses for food, education and health care were considered pointers to the financial position of the family and priorities in spending by the family. These are basic needs and one can not escape from such expenses.

Table No.17a contained details of the expenses for food. Three categories were made for the sake of analysis: families who spent less than Rs.2000/- and families who spent between Rs.2000/- and Rs.3000/- and those who spent more than Rs.3000/-per month for food alone. In Pettah forane, majority of the families (49.74\%) spent more than Rs.3000/- per month and $33.32 \%$ spent between Rs.2000/- and Rs.3000/- and $7.65 \%$ spent less than Rs.2000/- per month for food.

Chart No. 17a : Spending Pattern (Monthly Expenses for food)

A substantial percentage of families lived on meager level of food input impacting on their health and pointing to their weaker financial status. In this urban region, the figures are revealing to show that there are more than one third of the total families living on meager food intake inviting serious health and nutrition concerns.

## Monthly Expenses for Education

This sub-section speaks about how families in Pettah foronate spent for education of their children. Three categories were made for the sake of analysis: families who spent less than Rs.2000/- and families who spent between Rs.2000/- and Rs.3000/- and those who spent more than Rs.3000/-per month for education alone (Table No.17b).

Barring $48.49 \%$ of families who might not have any expenditure for education, the largest percentage of remaining families (18.23\%) spent less than Rs.2000/- for education. While none spent more than Rs.3000/-, 12.39\% had to spend between Rs.2000/- and Rs.3000/-. The spending for education as detailed in the table was an indicator that most of the families' expenditure on education was not very high.

Chart No. 17b: Monthly Expenses for Education

## Monthly Expenses for medical care

Health was another important area where families made spending regularly. Here, too, three categories were marked for analysis: families who spent less than Rs.500/- per month and those who spent between Rs.500/- and Rs.1000/- and those who spent more than Rs.1000/- per month. According to Table 17c, the largest section of families, that is, $41.53 \%$ spent between Rs.500/- and Rs.1000/- per month for medical care, while $33.88 \%$ spent more than Rs.1000/- per month and only a small section spent less than Rs.500/- per month for medical care and treatment for the family.

Chart No. 17c : Monthly Expenses for medical care

Medical care regularly carried away substantial portion of the income of the families. Majority of the families spent more money for medical treatment.

## Monthly expenses for other items

Other expenses included all other expenses than those for food, education and health. The data showed that families did not keep an account of things they spent on many of the other regular items. No data was available from $19.40 \%$ of families in the foronate. $35.13 \%$ of families spent between Rs.500/- and Rs.1000/- and a sizeable section spent more than Rs.1000/- per month for other expenses (Table No.17d).

Chart No.17d : Monthly expenses for other items

The shape of data points to a lack of budgeting habit among the people. Many families could not provide accurate information regarding how they spent and for what they spent. Spending patterns and prioritization were also related to the financial status of the families.

## Debts

Debt was another important indicator of economic status of families. Table No. 18 and No. 19 dealt with debts incurred by the families and their size. A slight majority ( $55.41 \%-1377$ ) of the families was indebted to one or the other way, while $44.59 \%$ (1108) reported that they did not have any debt.

Chart No. 18 : Debts

## Current size of debts

Among those who had debts, the largest section of families (44.14\%) had a debt up to Rs.50000/-, followed by those having Rs.3-6 lakhs (15.13\%) and those having a debt of Rs.50000-1 lakh (13\%). A smaller section (3.94\%) of families reported that they had a debt of more than Rs. 10 Lakhs (Table No.19)

Chart No. 19 : Current size of debts

In the case of individual parishes in the Foronate, Pongummodu had higher percentage of families with more than 10 lakhs as debt (7.74\%). When number of such families was considered, it was Pettah parish that had 29 families indebted for more than 10 lakhs.

## Possession of Ration Cards

Table No. 20 presents the status of ration card holding by the families. Ration card is one of the basic entitlements of a citizen and family of citizens. As per the data available, in Pettah Forane, a good majority of families ( $80.82 \%$ ) did possess ration cards (2058). But, those who did not have a ration card amounted to 427 families (17.18\%).

Chart No. 20 : Possession of Ration Cards

In the Parish-wise analysis, Kariyavattom had the largest percentage of families without a ration card (26.39\%), followed by Pettah (25.94\%), Mangattukonam (19.44\%) and Karali (17.39\%).

## APL and BPL Families

An enquiry was also made to understand the size of families holding or not holding rations cards marked with APL and BPL status. Table No. 21 has the findings. A majority of the families had APL cards (67.3\%), while $15.1 \%$ had BPL cards. $17.6 \%$ (438) of families reported that they did not know their status because they did not hold a ration card, yet.

Chart No. 21 : APL and BPL Families

## Extent of Medical Insurance

Medical insurance is a social security measure intended to support the families financially in times of health needs and health crisis and is an important criteria for economic wellbeing. However, Table No. 22 reported that a good majority of families $(72.03 \%)$ did not have a health insurance policy at the time of data collection. Only a small percentage of families $(27.97 \%)$ had medical insurance. Among those who did not have a medical insurance in Pettah Forane, $68.04 \%$ belonged to APL section and $18.27 \%$ belonged to BPL families.

Chart No. 22 : Extent of Medical Insurance

Majority was deprived of one of the major social security measures available to them at reasonably low costs. The reasons point to negligence and lack of interest in things like this.

## Availability of Toilets (Sanitary Latrines)

Toilets used for sanitation was considered as an indicator of basic needs, health status, personal and family privacy and civic sense. Table No. 23 dealt with this aspect. In Pettah forane, the data showed that 2369 families ( $95.33 \%$ ) had toilets attached to their homes and only $1.73 \%$ of families (43) used public toilets. It was disturbing to note that 14 families used open space for defecation in this urban region. $2.37 \%$ did not provide any information regarding this.

However, the situation in this regard is better than that of the state of Kerala where only $91.9 \%$ used toilets for defecation.

Chart No. 23 : Availability of Toilets (Sanitary Latrines)

Since the number of families without a toilet is very small, the forane can address the issue with some community support to the concerned families.

## Source of Water for domestic use

Source of water for domestic purposes including drinking was included in the survey as an important indicator for wellbeing and healthy life. According to Table No.24, the largest section of families, that is, $62.98 \%$ (1565) in Pettah Forane had through household payable water connection (piped water), while $36.22 \%$ ( 900 ) depended on own well, may be, together with other sources. $3.66 \%$ of families drew water from nearby houses also. 72 (2.90\%) families used public tap (pipe) installed on the road sides. Very negligible percentage of families had other sources of water.

The above sources of water were considered as sources of different quality levels and as such had their impact on the health and wellbeing of the users. It needs to be probed further to ascertain the quality of the water available for drinking and other domestic purposes.

Chart No. 24 : Source of Water for domestic use

## Domestic Drainage Systems

Survey looked into the manner in which the families managed their liquid and solid waste. This aspect had an
influence on the health and hygiene of the families and their neighborhoods. Table No. 25 described the distribution of drainage types.

Majority of the families (58.83\%) used arranged pits to drain waste and used water, while $24.86 \%$ (618) had some kind of drainage system attached to their house. However, a substantial percentage of families ( $15.13 \%$ ) did not use any of the above types.

Chart No. 25 : Domestic Drainage Systems

Further enquires are required to know what $15.13 \%$ of families have been doing with their solid waste and waste liquid substances.

## Solid waste disposal

The manner in which families disposed their solid waste was examined by the survey because this was an important indicator of health and hygiene and civic sense. Table No. 26 revealed that the majority of the families ( $56.30 \%$ ) deposited their solid waste in their premises. It was noted that $26.28 \%$ (653) utilized the collection system prevalent in the area. A smaller percentage of families (10.58\%) used public bins for depositing their solid waste. As per the data it was heartening to note that a very negligible percentage of respondent families $(0.44 \%-11)$ dumped their solid waste into some of the water sources.

Chart No. 26 : Solid waste disposal

The data clearly revealed that there was good awareness among the families about the need and importance of proper disposal of waste.

## EDUCATION

## Education support given to children

Education was a major area of focus in the survey. Various aspects dealing with education of the children were examined such as study facilities at home, parents' monitoring and community support to students. Tables No.27, No. 28 and No. 29 dealt with these aspects respectively. The survey enquired if the students had tables and chairs, proper study time at home and text books.
Barring 1105 (44.47\%) families where presumably there was no one studying, $48.05 \%$ (1194) of families provided tables and chairs to their children for study. $36.22 \%(900)$ of the families reported that there was a proper time for study at home. The data showed that $35.65 \%$ had study materials including text books and note books and other instruments made available to them from the beginning of the courses. Only $2.29 \%$ did not have any of these facilities.

Chart No. 27 : Study facilities at home

Table No. 28 measured the duration of time spent by the parents for monitoring their children's study. Barring 1038 families ( $41.77 \%$ ) where there were no children studying, the largest section ( $47.48 \%$ ) of families reported that they always cared for their children's study. Only $5.39 \%$ said that they occasionally monitored their children's study.

Chart No. 28 : Parental monitoring of children's study

Table No. 29 dealt with the types of community support made available to children for their study. The possibilities of financial assistance, provision of study facilities, supervisory attention, free tuition and guidance were examined as supports from the community including parishes.

The largest section $(30.10 \%)$ said that they did not receive any of the above mentioned supports from the community. A few families (5.39\%) reported that they received financial assistance from the community. $4.35 \%$ of the families said that they received guidance for their children's study.

Chart No. 29 : Types of community support

The picture drawn from the data available was encouraging except with regard to the volume and type of community support. While education was the most important base for the sustainable progress of any family or community, lack of proper community support in a Catholic context is a case for concern in Pettah Forane.

## FAITH LIFE

The next three tables dealt with various aspects of faith life of the families in Pettah foronate.

## Possession of POC Bible

Table No. 30 reported that a vast majority of the families ( $97.18 \%$ ) had P O C Bible in their homes (2415).

Chart No. 30 : Families possessing POC Bible

## Participation in Family Prayer

According to Table No.31, $91.03 \%$ (2262) of the families always had family prayer, while $4.35 \%$ (108) prayed together with the families occasionally. It was found, however, that $2.45 \%$ (61) families never had family prayer.

Chart No. 31 : Participation in Family Prayer

Family Participation in B C C Meetings

Chart No. 32 : Family Participation in B C C Meetings

Table No. 32 provides the information that a simple majority of families (57.46\%) always participated in Basic Christian Community (BCC) meetings, while $29.54 \%$ occasionally participated in the meetings of BCCs. But, $9.94 \%$ (247) of the families never went for BCC meetings.

On the whole, the data provided on faith life of the families in Pettah foronate showed that majority of the families were faithful to their prayer life, possessed Bible and participated in the meetings of Basic Christian Communities.
Periodical updating of the present data alone will help one to measure if the trend persisted or declined or increased with regard to various aspects of faith life.

## Death within three years

Mortality status of the people in a particular country or region is of great relevance in calculating the longevity or
health of its people. According to Table No.33, no one died during the three years prior to the survey in $89.58 \%$ of the families (2226) in Pettah foronate. Death did occur in a few families due to reasons such as old age (4.23\%), diseases $(2.29 \%)$, accidents $(0.36 \%)$, suicides ( $0.28 \%$ ) and other natural reasons ( $0.76 \%$ ). Very insignificant percentage of infant deaths was also reported during the specified period ( $0.08 \%$ ). No one was murdered during the previous three years in Pettah forane.

Chart No. 33 : Occurrence of death within three years and its causes

## SECTION TWO

Second section of this chapter is devoted to report the information regarding the individual members of the families in Pettah foronate. There were 8876 persons covered in the survey from the 19 Parishes. It is $4.07 \%$ of the Archdiocesan Population. Gender distribution in the Pettah Foronate was found almost ideal with $50.20 \%$ (4456) males and $49.80 \%$ (4420) females. Sector-wise and subject-wise collection of data was carried out with regard to the members.

## Parish-wise distribution of population

| Sex-wise distribution of population |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Female |  | Male |  | Total Value | Total \% |
| Row Labels | Value | \% | Value | \% |  |  |
| Kariavattom | 123 | 51.68\% | 115 | 48.32\% | 238 | 100.00\% |
| Pangappara | 131 | 52.82\% | 117 | 47.18\% | 248 | 100.00\% |
| Vikas Nagar | 138 | 53.91\% | 118 | 46.09\% | 256 | 100.00\% |
| Kumarapuram | 378 | 48.40\% | 403 | 51.60\% | 781 | 100.00\% |
| Pushpagiri | 199 | 50.25\% | 197 | 49.75\% | 396 | 100.00\% |
| Monvila | 142 | 45.22\% | 172 | 54.78\% | 314 | 100.00\% |
| Pullukad | 35 | 55.56\% | 28 | 44.44\% | 63 | 100.00\% |
| Cheruvaikal | 85 | 48.02\% | 92 | 51.98\% | 177 | 100.00\% |
| Muttada | 922 | 50.05\% | 920 | 49.95\% | 1842 | 100.00\% |
| Kunninpuram | 206 | 50.74\% | 200 | 49.26\% | 406 | 100.00\% |
| Kushavarkal | 114 | 55.34\% | 92 | 44.66\% | 206 | 100.00\% |
| Pettah | 1177 | 50.75\% | 1142 | 49.25\% | 2319 | 100.00\% |
| Karali | 38 | 50.00\% | 38 | 50.00\% | 76 | 100.00\% |
| Pongummoodu | 310 | 48.51\% | 329 | 51.49\% | 639 | 100.00\% |
| Avukulam | 36 | 42.86\% | 48 | 57.14\% | 84 | 100.00\% |
| Njandoorkonam | 147 | 49.83\% | 148 | 50.17\% | 295 | 100.00\% |
| Thundathil | 197 | 50.51\% | 193 | 49.49\% | 390 | 100.00\% |
| Chengottukonam | 8 | 57.14\% | 6 | 42.86\% | 14 | 100.00\% |
| Mangattukonam | 70 | 53.03\% | 62 | 46.97\% | 132 | 100.00\% |
| Grand Total | 4456 | 50.20\% | 4420 | 49.80\% | 8876 | 100.00\% |

## Parish-wise distribution of population

In Pettah forane, according to the data, Pattah parish had the largest number of respondents to the survey (2319), followed by Muttada (1842) and Kumarapuram (781) and pongummoodu (639). Chengottukonam had the smallest number of families (14). Considering the number of persons and number of families, Pettah was a smaller forane.

## Sex-wise distribution of the population

According to Table No.34, Pettah Forane covering 19 parishes had a total of 8876 persons with 4456 males $(50.20 \%)$ and $4420(49.80 \%)$ females in 2485 families. This means that the family size of the surveyed families was 3.57 in the foronate. Sex ratio was 992.

Chart No. 34 : Sex-wise distribution of the population

## Age-wise distribution of the total population

The total population was categorized into 6 groups as given in the Table No. 35. It was reported that the largest group ( $28.57 \%$ ) was in the age group of 22-40 years (2536). This includes majority of the youth and this is a potential asset to the community. The next largest section (27.76\%) belonged to the age of group of 41-59 (2464). According to the data available, the number of senior citizens was 1314 ( $14.80 \%$ ). It was found that the region had a very large section of people in productive age group of 22-59 (56.33\%). Infants in the age group of 0-5 constituted of 0.6.89\% (612).

Chart No. 35 : Age-wise distribution of the total population

## Blood Groups

Table No. 36 deals with the distribution of persons according to their blood group. It was noted that $25.46 \%$ of the population in the Foronate did not know their blood group. Among those who knew, the largest section constituted of $26.52 \%$ of persons having $\mathrm{O}+\mathrm{ve}$ (O Positive), followed by persons with $\mathrm{B}+\mathrm{ve}$ ( $16.88 \%$ ), $\mathrm{A}+\mathrm{ve}$ ( $12.49 \%$ ), $\mathrm{AB}+\mathrm{ve}$ (3.44\%), O-ve (3\%), B-ve (2.17\%), A-ve (1.55\%).

Chart No. 36 : Blood Groups

## Blood Groups of persons in the age group 18-45 years

Persons in the age group of 18-45 were separately considered as it was the most eligible group to donate blood. Therefore, their prevalence in the region was specially analyzed. Table No 36a presents the findings. The persons in the above-said age group consisted of 3821 respondents in the region. $9.77 \%$ (867) of respondents did not know their blood group. A careful examination revealed that among the members of this group, the same pattern of group-distribution as the general population was found without any change in trend. The largest section constituted of $11.47 \%$ (1018) of persons who had $\mathrm{O}+\mathrm{ve}$ (O Positive), followed by persons with B+ve (7.88\%), A+ve ( $5.67 \%$ ), $A B+v e(1.70 \%)$, $0-v e(1.36 \%), B-v e(1.03 \%)$ and $A-v e(0.69 \%)$ and $A B-v e(0.259 \%)$.

Chart No. 36a: Blood Groups of persons in the age group of 18-45 years

Among the members of this group, the percentage of respondents who did not know their blood group decreased from $25.46 \%$ to $9.77 \%$ with a difference of 15.69 percentage points.

## Marital status

The marital status of total number of respondents in Pettah forane was examined in the survey and is presented in Table No.37. Of the total population, $53.79 \%$ (4774) were married, while $35.23 \%$ (3127) were unmarried. Widows ( $446-5.02 \%$ ) were far more than widowers ( $72-0.72 \%$ ) in the Foronate. There was a slight difference in favour of males between the number of wives abandoned by husbands (35-0.39\%) and the number of husbands abandoned by wives (18-0.18\%). 192 persons ( $2.16 \%$ ) were found living together without a valid marriage. Only a very small number of persons (25-0.28\%) got legal divorce from the Church.

Chart No. 37 : Marital status

## Life Status

The survey tried to categorize the respondents according to various positions they held in their current life. According to the details given in Table No. 38, students currently studying in various levels constituted the largest section with $21.43 \%$ (1902), followed by the unemployed persons ( $20.65 \%$ ), workers ( $16.70 \%$ ), employed persons $(16.22 \%)$, pensioners $(7 \%)$, children before the school age ( $<4$ ) $(6.25 \%)$ and job-aspirants ( $4.37 \%$ ). The dropout students who were neither job aspirants, nor workers, nor the unemployed constituted only a negligible percentage ( $0.73 \%$ ). The smallest sections were seminarians/aspirants ( $0.70 \%$ ), social workers ( $0.55 \%$ ), priests/ nuns ( $0.39 \%$ ). $5 \%$ of persons did not give any information regarding their status.

Chart No. 38 : Life Status

A substantial percentage of persons were found to be unemployed in the region. This is a case for concern. Workers in the unorganized sectors were $16.70 \%$. Taken together, this is a huge share of population below the lower middle class or in the unorganized sector.

## Educational Qualifications

The current status of education of the respondents as shown in Table No. 39 was analyzed. A small percentage of respondents ( $6.82 \%$ ) consisted of the illiterate, persons not studying and the mere literate (605). The largest section of respondents (1839) had completed the High School level of education (20.72\%). There was an upward trend from KG to HS. But, it was noted that there was a decline of students in Higher Secondary courses (14.57\%). This trend was found followed to the upper levels of higher education up to M.Phil/ Ph.D. $6.85 \%$ (608) students completed at the time of the survey non-technical professional courses and $2.46 \%$ of respondents in technical courses. It was also found that some youth preferred to go for graduate Diploma courses (1.87\%).

Chart No. 39 : Educational Qualifications

A vast majority of respondents excluding the illiterate, those not studying and the mere literate persons, did not have good education eligible for higher jobs in Pettah forane. Technically and professionally educated persons were numerically much limited. All the students studying up to IX standard were made to pass as per the Government Education Policy. After Xth class, before or after the public examination, majority dropped out of general and formal education. This is a serious issue to be addressed.

## Sex-wise Educational Qualifications of persons in the age group of 05-15 years

The status of educational qualifications of children belonging to the various age groups was further analyzed to find out the differences among persons of various age groups. Out of 1220 persons who belonged to the age group of 05-15, a very insignificant percentage of children was found illiterate ( $0.41 \%$ ) with $0.25 \%$ males and $0.16 \%$ females, mere literates ( $0.98 \%$ ) with $0.16 \%$ males and $0.82 \%$ females and those not studying $(0.82 \%)$ with $0.33 \%$ boys and 0.49\% girls (Table No.39a)

Children studying in Lower Primary level were the largest percentage ( $29.84 \%$ ) with $15.82 \%$ males and $14.02 \%$ females. The next largest section (26.96\%) was studying in Upper Primary level with 13.93\% of males and 13.03\% of females. High School students were $20.25 \%$ with $10.41 \%$ males and $9.84 \%$ females.

From the above analysis, it can be noted that in the three levels of school education, girls were found less in percentage than the level of boys. Among those who were not studying and the mere literates, the percentage of girls were more than that of the boys, while, as noted above, among the illiterates, boys were more than the girls in percentage.

Chart No. 39a. : Sex-wise Educational Qualifications of persons in the age group of 05-15 years

## Sex-wise Educational Qualifications of the persons in the age group of 1625 years

The largest section of persons ( $33.53 \%$ ) in the age group of 16-25 had HSS level of education with slightly more percentage of males (17.06\%) than females (16.47\%). But, when degree, PG, professional courses, M.Phil/ Ph.D
levels were considered, girls slightly outnumber boys in this age group. Of the $18.88 \%$ percentage of the degree holders, $10.50 \%$ were girls, while $8.38 \%$ were boys. Similarly, of the $15.16 \%$ of professionals, $7.80 \%$ were girls with $7.36 \%$ boys. Those who had M.Phil/ Ph.D (1.46\%) consisted of $0.87 \%$ of females and $0.58 \%$ of males (Table No. 39b.)
The analysis reveals that in higher education courses, female presence was higher than male presence among the persons in the age group of 16-25 in Pettah forane. However, in the case of Diploma, technical education and certificate courses, it was males who were found more than females. Significantly, there were no illiterates in this age group in Pettah Forane

Chart No. 39b. : Sex-wise Educational Qualifications of the persons in the age group of 16-25

## Sex-wise Educational Qualifications of the persons in the age group of 2635 years

Educational Qualifications of the persons in the age group of $26-35$ is revealed in Chart No. 39c. Among them the largest section ( $21.81 \%$ ) had degree level of education with a higher female presence (12.39\%) than male presence (9.48\%). In this age group, females were more in HSS (9.17\%) and PG courses (5.96\%) than males in HSS (7.49\%) and PG (5.2\%). See Table No. 39c
When this age group (16-28 years) is considered separately, very close to $50 \%$ of the total population had higher education with a higher percentage of female presence in the forane.

Chart No. 39c. : Sex-wise Educational Qualifications of the persons in the age group of 26-35

## Medium of Instruction opted for school education

Table No. 40 reveals the distribution of persons who had a chance to go to school in their life time in Pettah foranate in terms of their medium of instruction. According to the data available, a simple majority of respondents ( $53.77 \%$ ) opted for Malayalam vernacular language for their studies in the school. One third of the respondents opted for English medium (33.36\%) and a small percentage went for Tamil (1.59\%).

Chart No. 40 : Medium of Instruction opted for school education

A clear preference for English was found in the data. But, preference for Malayalam Medium was not negligible, though declining.

## Medium of Instruction opted for education by children in the age group of 05-15 years and their sex-wise distribution

Figure No. 40a and Table No. 40a shows the sex-wise distribution of children in the age group of 5-15. It was found that a good majority of students opted for English medium (72.79\%) with a higher percentage of boys (38.77\%) than girls (34.02\%). But, 10.98\% of girls and $10.08 \%$ of boys opted Malayalam medium out of the total of 21.07\%. Boys and girls preferred English Medium in this age group. In this age group, those who opted for Hindi and Tamil were a negligible percentage.

Chart No. 40a. : Medium of Instruction opted for education by children in the age group of 5-15 and their sex-wise distribution

## Medium of Instruction opted for education by persons in the age group of 16-25 and their sex-wise distribution

Compared to the earlier group, in this age group, the total percentage of persons who opted for English Medium came down from $72.79 \%$ to $55.47 \%$, now, with a slightly higher percentage of women ( $28.43 \%$ ) than men ( $27.04 \%$ ). Similarly, the percentage of persons who opted for Malayalam medium went up from $21.07 \%$ to $37.10 \%$ with $18.66 \%$ men and $18.44 \%$ women. (Table No. 40b.)

Chart No. 40b. : Medium of Instruction opted for education by persons in the age group of 16-25 and their sex-wise distribution

This clearly shows that the new generation preferred to go for English Medium than Malayalam Medium in Pettah Forane. In the sex-wise analysis, women showed a higher preference to English than men.

## Medium of Instruction opted for education by persons in the age group of 26-35 and their sex-wise distribution

Compared to the immediate higher age group, the persons in the age group of $26-35$ preferred generally Malayalam ( $54.33 \%$ ) to English ( $37.17 \%$ ). It was found that more women ( $28.58 \%$ ) than men ( $25.75 \%$ ) opted Malayalam in this age group. In English Medium, the percentage of women (19.48\%) remained higher than men (17.68\%). (Table No. 40c.)

Chart No. 40c. : Medium of Instruction opted for education by persons in the age group of 26-35 and their sex-wise distribution

When the age of the persons went up, the preference changed drastically with regard to the Medium of instruction in favour of Malayalam. While in the lower age group women preferred English to Malayalam, in this age-group, higher percentage of them opted for Malayalam.

## Subjects opted for studies after 'Plus Two'

Analysis was done for the total population of 8876 and presented in Table No. 41 Excluding 49.81\% (4421) of persons who did not have any chance to study up to 'Plus Two' level and some others who did not provide any information in this regard (9\%), more respondents, among the others, opted for Science subjects (8.07\% $-716)$, Arts ( $7.68 \%-682$ ), commerce ( $6.15 \%-546$ ) Engineering subjects ( $5.15 \%-457$ ), and other subjects included in professional courses (1.23\%-478).

Chart No. 41 : Subjects opted for studies after 'Plus Two'

In Pettah Forane, in general, more people opted for non-professional and non-technical courses.

## Sex wise distribution of subjects opted for studies after Plus Two in the age group of 16-25 years

In Pettah Forane, among persons in the age group of 16-25 years, while 15.97\% of persons opted for Science subjects with $5.28 \%$ of men and $10.69 \%$ of women, $14.39 \%$ opted for Engineering subjects for their higher education with $8.91 \%$ of men and $5.48 \%$ of women. In this age-group, compared to men ( $2.84 \%$ ), higher percentage of women (4.88\%) went for Arts subjects. (Table No. 41a.)

Chart No. 41a. : Subjects opted for studies after Plus Two in the age group of 16-25

In this age group of 16-25, the largest section of persons opted for Engineering and Science subjects with a clear preference of men for Engineering and women for pure science subjects. A slow shift from Arts subjects to Science and Engineering subjects was observed in favour of the latter in this age group compared to the figures obtained in general analysis.

## Subjects opted for studies after Plus Two in the age group of 26-35 years

In this inter-age group analysis, preference for engineering subjects remained higher (12\%); Commerce (10.40\%) and Arts subjects (10.32\%) were opted by a slightly smaller percentage of persons. (Table No. 41b.)

When sex-wise preference in this age group(26-35) was separately considered, more men opted for Engineering and Commerce, while more women went for Arts and Science.

But, in the intra-age group analysis, compared to the earlier age group where Engineering and Science subjects were prefered by more persons, the liking shifted to Commerce and Arts. In the sex-wise intra group analysis, female preference was in favour of Science and Arts.

Chart No. 41b. : Subjects opted for studies after Plus Two in the age group of 26-35

## Preferred Education Institutions

The survey looked into the distribution of educational institutions which the respondents/ their parents/guardians chose for their studies. The options included State-aided institutions which were managed by private individuals or organizations but financially supported by Governments, State unaided institutions managed by private individuals or organizations but following State syllabus, purely State Government institutions, CBSC and ICSE.
The results are presented in Table No. 42. The preference of the respondents was found in the order of State Government institutions (30.17\%), State-aided institutions (28.56\%), State unaided institutions (14.66\%), CBSC (6.15\%) and ICSE (3.41\%).

Chart No. 42 : Preferred Education Institutions

Largest sections of the persons depended on State Government institutions in Pettah Forane in general.

## Preferred Education Institutions by the persons in the age group of 5-15 years

Separate analysis was carried out for three age groups to understand the preference of persons in each of the age groups. Substantial changes were visible in the preferences of the age groups in question from those of the general population. The largest percentage of the present students in this age group (23.20\%) preferred State unaided educational institutions, followed by those who preferred CBSE (21.80\%), state aided (18.44\%), State Government (15.25\%) and ICSE (10.33\%). (Table No.42a)

While it was found in the sex-wise analysis that more percentage of boys opted for CBSE $(12.30 \%)$, state aided ( $9.84 \%$ ), State Government ( $8.20 \%$ ) and ICSE ( $6.15 \%$ ), more girls opted for State unaided ( $12.70 \%$ ) institutions in the age group of 5-15 years.

Chart No. 42a. : Preferred Education Institutions in the age group of 5-15 years

The preference of the youngest generation shifted from the State Government institutions preferred by the general population to State unaided institutions. Better facilities and or quality of education and or increased availability of unaided educational institutions might be the reasons for this shift. While more girls were sent to state unaided institutions than boys (10.49\%), more boys were given education in CBSE and ICSE schools. A male preference is visible due to parents' influence in this age group, when most parents take decisions about their children.

## Preferred Education Institutions in the age group of 16-25 years

In this age group, largest section of persons (27.85\%) went for state aided educational institutions with $13.99 \%$ of females and $13.86 \%$ of males. Second preference of people in this age group was for state government institutions $(25.08 \%)$ with more men $(13.73 \%)$ than women $(11.35 \%)$. Third preference went for State unaided institutions ( $20.33 \%$ ) with $11.62 \%$ of women and $8.71 \%$ of men. (Table No. 42b.)
Preference of women remained for state unaided in this age group. More women $(3.76 \%)$ than men $(3.04 \%)$ reported that they had ICSE education. It was also noted that women's preference increased for state institutions from the earlier age group keeping almost equal to men.

Chart No. 42b. : Preferred Education Institutions in the age group of 16-25 years

## Preferred Educational Institutions in the age group of 26-35 years

$32.03 \%$, the largest section reported that they had studied more in state government institutions, with $17.13 \%$ women and $14.91 \%$ men. The next option was for state aided institutions ( $30.05 \%$ ) with more men ( $15.90 \%$ ) than women (14.14\%). In this age group, more females (8.94\%) than males (9.94\%) reported that they had been sent to state unaided institutions exhibiting a female preference. (Table No. 42c.)

Chart No. 42c. : Preferred Educational Institutions in the age group of 26-35 years

Consistently, in the three age groups, it was found that more females were given the opportunity to study in state unaided institutions compared to other categories of institutions. It was generally found that in Pettah Forane girls were given almost equal opportunity for education with some difference in preference regarding educational institutions.

## Employment Sectors

Table No. 43 presents the distribution of employees according to their sectors of employment. Diverse sectors were considered for analysis such as those employed in State Government, those employed in Public sector, those employed in private non-service sector, those employed in private service sector, those self-employed in firms, wage labourers, fishing and agriculture workers, those employed in other States, those employed in Gulf countries, those employed in Europe and those employed in other foreign countries.

It was found that the largest section of the employed respondents were in the private non-service sector (12\%). When $50 \%$ of the total population who were not employed and $10 \%$ of persons about whom no information was available were excluded from further analysis, of the remaining, $11 \%$ were in self-employment units which included wage labour, fishing and agriculture, $9 \%$ in State Government direct institutions and $4 \%$ in Gulf countries. Those employed in public sector $(2 \%)$, other Indian states (1\%) and European countries were negligible.

Chart No. 43 : Employment Sectors

The sectoral picture of employment of the respondents was found very disheartening with very small percentage of persons employed and with those employed in non-recognizable and non-rewarding positions.

## Sex wise distribution of employment sectors in the age of 18-28 years

According to Table No. 43a, majority of the respondents in the age group of $18-28$ years $(55.98 \%)$ reported that they did not have any employment in the listed sectors. Barring them, the largest section of people (18.03\%) said they had employment in the private sector with more men (10.34\%) than women (7.69\%). The next important sector of occupation for the above-said age group was self-employment ( $6.72 \%$ ) with more men ( $5.82 \%$ ) than women $(0.90 \%)$. The third largest section in the age group has reported that they were employed in the Gulf countries $(3.43 \%)$ with more men ( $2.26 \%$ ) than women ( $1.16 \%$ ). The next important sector of employment for this age group was state Government jobs ( $2.78 \%$ ) with $1.94 \%$ men and $0.84 \%$ ) women.

Chart No. 43a. : Sex wise distribution of employment sectors in the age of 18-28 years

In all the sectors of employment in Pettah Forane with reference to the age group of 18-28 years, women were found sharing a smaller share of the work participation. The findings show a similar trend of sector participation with the general population with largest share of work participation in private sector.

## Sex wise distribution of employment sectors in the age of 29-35 years

With regard to the persons in the age group of 29-35 in Pettah Forane, the trend of work participation shows the same features with the largest section having private sector employments ( $28.31 \%$ ) with more men (16.33\%) than women (10.98\%), followed by self-employed sections (13.99\%) with more men $11.95 \%$ than women (2.04\%), those working the Gulf Countries ( $8.07 \%$ ) with more men ( $5.64 \%$ ) than women ( $2.43 \%$ ) and state government employments ( $6.51 \%$ ) with more women ( $3.40 \%$ ) than men ( $3.11 \%$ ). (Table No. 43b)

The intra-group comparison showed that this age group also had followed the same trend as that of the above age group of 18-28 years. In the sex wise observations, it was found that females had a slightly better share of the government jobs with an increase of 0.29 percentage points and in the rest of the sectors, men shared more space in work participation.

Chart No. 43b. : Sex wise distribution of employment sectors in the age of 29-35 years

## Sex wise distribution of employment sectors in the age of 36-60 years

Chart No. 43c. : Sex wise distribution of employment sectors in the age of 36-60 years

In the age group of 36-60, the self-employed sector observed the largest section of the respondents (20.08\%) with more men $(16.11 \%)$ than women ( $3.9 \%$ ) showing a huge difference between men and women. This was followed by the State Government sector ( $14.35 \%$ ) with more men ( $8.58 \%$ ) than women ( $5.76 \%$ ), private sector $(13.20 \%)$ with more men ( $8.4 \%$ ) than women ( $4.74 \%$ ) and employment in Gulf countries ( $5.58 \%$ ) with more men ( $4.87 \%$ ) than women (0.71\%). (Table No. 43c).

The findings show that the older generation preferred more for self-employment sector, may be because it gave them more freedom, or they might have had some capital for investment with them after retirement from regular jobs or gulf countries. Substantial percentage of persons in this age group was employed in State Government and private sectors. In this age group, sex-wise analysis showed that women had a smaller share of work participation in the Pettah Foronate.

## Careers / employment positions

Table No. 44 discusses the careers and employment positions. Along list of 32 positions/careers was considered for the purpose of measuring the space occupied by the respondents in these positions.

It was disappointing to find that the percentage of respondents in recognizable or respectful positions and careers were clearly insignificant. Barring the section (33.88\%) of unemployed persons and $12.8 \%$ who did not provide any
information regarding this, it was found that in Pettah Forane, $7.14 \%$ were house managers, $6.02 \%$ were wage labourers, $4.57 \%$ pensioners, $4 \%$ self-employed, $3.29 \%$ teachers, $2.81 \%$ Engineers, $2.66 \%$ technical areas, $2.03 \%$ clerks, $1.83 \%$ drivers. The percentage of Gazette officers was found very meager with $1.24 \%$.

Chart No. 44 : Careers/ employment positions

The data showed that the size of employed persons and the size of persons employed in recognizable positions were very small pointing to a weaker socio-economic status occupied by the respondents.

## Sex-wise distribution of Careers/ employment positions in the age group of 18-28 years

In this age group of 18-28 years, the significant career positions were found as occupied by engineers (5.30\%) with more men ( $3.94 \%$ ) than women ( $1.36 \%$ ), followed by wage labourers ( $4.46 \%$ ) with a huge percentage of men $(4.27 \%)$ and a very small percentage of women ( $0.19 \%$ ), home managers ( may be understood as house wives in the traditional terminology) occupying $4.20 \%$ of the share with very high share for women ( $4.07 \%$ ) and very negligible share for men( $0.13 \%$ ), nurses ( $3.36 \% 0$ with $2.71 \%$ for females and $0.65 \%$ for males, IT Professionals ( $2.97 \%$ ) with
more men (1.94\%) than women (1.03\%), teachers ( $2.20 \%$ ) with more women $(1.55 \%)$ than men ( $0.65 \%$ ), technically skilled jobs ( $2.07 \%$ ) with more men (1.49\%) than women ( $0.58 \%$ ) and accountants ( $1.36 \%$ ) with more men ( $0.78 \%$ ) than women ( $0.58 \%$ ). Very negligible share of the occupational careers such as doctors, advocates gazette officers were reported as occupied by the age group of 18-28 in the Pettah Forane. (Table No 44a)

Chart No. 44a. : Sex-wise distribution of Careers/ employment positions in the age group of 18-28

Women had a very large share in house management as house wives. Women faired better than men in nursing and teaching. But, women's share in engineering, technically skilled jobs, accountancy, IT field was found very low.

## Sex-wise distribution of Careers/ employment positions in the age group of 29-35 years

Chart No. 44b. : Sex-wise distribution of Careers/ employment positions in the age group of 29-35

In this age group of 29-35 (Table No 44b), the significant career positions were found as occupied by home managers $(9.95 \%)$ with very high share for women $(9.39 \%)$ and very negligible share for men $(0.57 \%)$, wage labourers $(7.47 \%)$ with a huge percentage of men $(7.01 \%)$ and a very small percentage of women ( $0.45 \%$ ), engineers (7.24\%) with more men (4.52\%) than women (2.71\%), teachers ( $6.90 \%$ ) with more women( $5.09 \%$ ) than men $(1.81 \%)$, IT Professionals $(6.11 \%)$ with more men( $4.75 \%$ ) than women ( $1.36 \%$ ), self-employed jobs ( $5.20 \%$ ) with more men $(3.73 \%)$ than women ( $1.47 \%$ ), technically skilled jobs ( $4.98 \%$ ) with more men $(3.73 \%)$ than women $(1.24 \%)$, clerks ( $3.15 \%$ ) with more women ( $2.26 \%$ ) than men ( $1.24 \%$ ), nurses ( $3.51 \%$ ) with $2.26 \%$ for females and $1.24 \%$ for males. Very small or negligible share of the occupational careers such as doctors, advocates gazette officers were reported as occupied by the age group of 18-28 in the Pettah Forane.
The sex-wise career-wise trend remained more or less unchanged in this age group as compared with the results regarding the above age group.

## Sex-wise distribution of Careers/ employment positions in the age group of 36-60 years

The analysis of the careers occupied by the persons in the age group of 36-60 (Table No 44c) showed some substantial changes when compared with the earlier age groups in the region. None was reported job/less in this age group. The largest sections were clerks ( $32.13 \%$ ) with more women ( $27.53 \%$ ) than men ( $4.60 \%$ ), followed by teachers $(20.05 \%)$ with more men $(16.14 \%)$ than women $(3.91 \%)$, Gazette officers $(14.52 \%)$ with more men ( $8.66 \%$ ) than women ( $5.86 \%$ ), engineers ( $13.10 \%$ ) with more men ( $8.45 \%$ ) than women ( $4.66 \%$ ), peons ( $8.42 \%$ ) with more women ( $4.75 \%$ ) than men ( $3.67 \%$ ), accountants ( $5.62 \%$ ) with more men ( $4.93 \%$ ) than women ( $0.69 \%$ ), doctors $(2.77 \%)$ with slightly more males (1.62\%) than females (1.14\%).

Chart No. 44c. : Sex-wise distribution of Careers/ employment positions in the age group of 3660 years

In this age group of 36-60 years, the number and percentage of clerks, teachers, gazette officers, peons, accountants, and doctors have increased. Very large percentage of women worked as clerks than men. Among doctors, women were found in more percentage than men. Contrary to the earlier age groups in the region, here teachers and nurses were found in smaller percentage than men.

## Diseases

Health is an important indicator of wellbeing and progress of individuals and communities. The survey examined the distribution of respondents according to their diseases. Table No. 45 reports the spread and size of such distribution. It was found that $23.33 \%$ of respondents were affected by one or the other diseases listed for survey. Five major diseases found among the respondents were Diabetic (7.94\%), Blood Pressure (6.53\%), Allergy (2.59\%), Heart diseases (2.33\%) and Rheumatic (2.06\%). According to the data available, $73.67 \%$ (27580) did not have any disease in the foronate of Pettah.

Chart No. 45 : Diseases

It can be noted that the widely spread illnesses were life style diseases. Other diseases were also found in smaller numbers of respondents.

## Sex-wise distribution of diseases in the age of 0-6 years

According to Table No.45a, it was found that $93.12 \%$ of infants did not have any of the diseases listed in the survey, as reported by their parents/guardians, with a slightly higher percentage of boys ( $46.85 \%$ ) than girls $(46.28 \%)$. Other diseases reported among the infants covered by the responses of the survey were allergy ( $1.72 \%$ ) with more boys ( $1.00 \%$ ) than girls ( $0.72 \%$ ), Asthma ( $0.72 \%$ ) with more boys ( $43 \%$ ) than girls ( $0.29 \%$ ), B P ( $0.72 \%$ ) with more boys $(43 \%)$ than girls $(0.29 \%)$, diabetic $(0.43 \%)$ with more boys $(0.29 \%)$ than girls $(0.14 \%)$, heart problems $(0.14 \%)$ only for girls, malaria ( $0.14 \%$ ) only for boys, skin ( $0.14 \%$ ) only for boys, thyroid ( $0.14 \%$ ) only for girls, bone only for girls, and rheumatic ( $0.29 \%$ ) for both boys and girls at equal extent. Other diseases not mentioned in the survey consisted of $2.29 \%$ with more boys (1.29\%) than with girls (1\%).

Chart No. 45a. : Sex-wise distribution of diseases in the age of 0-6

Boys were affected by more diseases than girls in this age group.

## Sex-wise distribution of diseases in the age of 7-15 years

In this age group (Table No.45b), it was found that $91.29 \%$ of the children did not have any of the diseases listed in the survey, as reported by their parents/guardians, with a slightly higher percentage of boys ( $46.93 \%$ ) than girls (44.36\%). Major diseases reported among the children covered by the responses of the survey were allergy $(2.28 \%)$ with more boys ( $1.39 \%$ ) than girls ( $0.89 \%$ ), Asthma ( $0.59 \%$ ) with boys and girls at the equal extent, bone problems $(0.40 \%)$ with boys and girls at equal extent, mentally retarded $(0.30 \%)$ with more boys $(0.20 \%)$ than girls ( $0.10 \%$ ), heart problems ( $0.30 \%$ ) with more boys ( $0.20 \%$ ) than girls ( $0.10 \%$ ), thyroid ( $0.30 \%$ ) with more boys ( $0.20 \%$ ) than girls ( $0.10 \%$ ), diabetic ( $0.20 \%$ ) only for boys, B P ( $0.20 \%$ ) only for boys, rheumatic ( $0.20 \%$ ) both boys and girls at equal extent, and cancer, Dengue/CG, skin diseases at the same percentage ( $0.10 \%$ ) only for boys. Other diseases not mentioned in the survey affected $3.66 \%$ of the children with more boys $(2.08 \%)$ than with girls (1.58\%). In this age group, no children were affected by diabetic, cancer, HIV/AIDS, jaundice, malaria, dengue/CG, asthma, T B, leprosy, skin, elephanticities, thyroid, verocos and psychic disorders.

Chart No. 45b : Sex-wise distribution of diseases in the age of 7-15

In this age group also, boys were found affected more by diseases than girls.
78 TRIVANDRUM LATIN ARCHDIOCESE. PLATINUM JUBILEE SURVEY-2011

## Sex-wise distribution of diseases in the age of 16-35 years

In this age group (Table No.45c), it was found that $87.66 \%$ of the young people did not have any of the diseases listed in the survey, with a slightly higher percentage of boys (44.19\%) than girls (43.48\%). Major diseases reported among the youth covered by the responses of the survey were allergy ( $2.65 \%$ ) with more girls ( $1.61 \%$ ) than boys ( $1.05 \%$ ), thyroid ( $1.01 \%$ ) with more girls ( $0.97 \%$ ) than boys ( $0.04 \%$ ), diabetic ( $0.90 \%$ ) with more boys ( $0.60 \%$ ) than girls $(0.30 \%)$, asthma $(0.75 \%)$ with boys and girls at equal extent, $\mathrm{BP}(0.45 \%)$ with more girls $(0.30 \%)$ than boys $(0.15 \%)$, rheumatic ( $0.41 \%$ ) with more girls ( $0.30 \%$ ) than boys ( $0.1 .1 \%$ ), bone ( $0.49 \%$ ) with more girls ( $0.34 \%$ ) than boys $(0.15 \%)$ and skin $(0.30 \%)$ with more girls $(0.19 \%)$ than boys $(0.11 \%)$. In this age group, no children were affected by elephanticities, leprosy, TB and Malaria. Other diseases not mentioned in the survey affected $4.30 \%$ of the children with more girls ( $2.17 \%$ ) than boys ( $2.13 \%$ ).

Chart No. 45c. : Sex-wise distribution of diseases in the age of 16-35

It was observed that when the age went up, girls were affected by diseases than boys. Boys were becoming healthier than girls in this age group of 16-35 years.

## Sex-wise distribution of diseases in the age of 36-60 years

In this age group (Table No.45d), $60.14 \%$ reported that they did not have any disease, in which $31.11 \%$ were males and $29.03 \%$ were females. Major diseases reported among the persons covered by the responses of the survey were diabetic ( $9.10 \%$ ) with more males ( $4.80 \%$ ) than females ( $4.30 \%$ ), BP ( $8.22 \%$ ) with slightly more women $(4.14 \%)$ than men $(4.08 \%)$, rheumatic $(2.77 \%)$ with more women ( $2.06 \%$ ) than men $(0.71 \%)$, thyroid $(2.74 \%)$ with more females $(2.30 \%)$ than males $(0.44 \%)$, allergy $(2.74 \%)$ with more women ( $1.59 \%$ ) than men ( $1.15 \%$ ), heart problems ( $2.25 \%$ ) with $1.37 \%$ males and $0.88 \%$ females, bone ( $1.86 \%$ ) with more women ( $1.15 \%$ ) than men $(0.71 \%)$, asthma ( $1.67 \%$ ) with more women ( $1.04 \%$ ) than men ( $0.63 \%$ ), verocos ( $1.01 \%$ ) with $0.66 \%$ women and $0.36 \%$ men, psychic ( $0.60 \%$ ) with more men ( $0.33 \%$ ) than women ( $0.27 \%$ ). Other diseases not mentioned in the survey affected $5.32 \%$ with more females ( $2.85 \%$ ) than males ( $2.47 \%$ ). Some were affected by the diseases such as cancer, HIV/AIDS, jaundice, Malaria, skin, elephanticities and mentally retarded cases in a negligible way. None were affected by leprosy or TB.

Chart No. 45d : Sex-wise distribution of diseases in the age of 36-60 years

In this age group of 36-60 years, it was noted that both men and women were affected almost in the same manner by one or the other disease. However, thyroid was prevalent mainly among women rather than among males.

## Sex-wise distribution of diseases in the age above $\mathbf{6 0}$ years

In this age group above 60 years old (Table No. 45e), $29.22 \%$ of people were not affected by any of the diseases listed in the survey with more male (15.22\%) than female (13.99\%). Major diseases affected by this older age group were diabetic ( $23.48 \%$ ) with more women( $12.08 \%$ ) than men ( $11.4 \%$ ), BP ( $17.82 \%$ ) with more women $(10.10 \%)$ than men (7.71\%), heart (7.99\%) with more men (4.98\%) than women (3\%), rheumatic (4.57\%) with more female $(2.87 \%)$ than male $(1.71 \%)$, asthma ( $3 \%$ ) with more female ( $1.98 \%$ ) than male $(1.02 \%)$, bone diseases ( $2.46 \%$ ) with more women ( $1.64 \%$ ) than men ( $0.82 \%$ ), allergy ( $1.64 \%$ ) with more female ( $1.02 \%$ ) than male ( $0.61 \%$ ), verocos (1.09\%) with men and women at equal extent, thyroid ( $1.09 \%$ ) with $0.68 \%$ females and $0.41 \%$ males. Psychic cases, skin diseases, mentally retarded cases, elephanticities, leprosy, TB, dengue/CG, HIV/STD and cancer $(0.48 \%)$ affected a very negligible percentage of people in this age group. Other diseases not mentioned in the survey affected $5.19 \%$ with more males ( $2.63 \%$ ) than females ( $2.53 \%$ ). None were affected by Malaria and jaundice.

Chart No. 45e. : Sex-wise distribution of diseases in the age group above 60 years

It was observed that in this age-group above 60 years, women became more vulnerable to more diseases than men.

## Diseases at a glance

During the aging process, people were becoming more and more vulnerable to various diseases. At the earlier stages of life, boys were healthier than girls, then girls became healthier and men and women were almost coping with diseases at the same level and at the last stage, it was men who fared better than women.

## Bad habits

The survey tried to catch the trend of bad habits prevalent among the respondents. Table No. 46 contains the distribution pattern. Accordingly, a vast majority (93.39\%) reported that they did not have any bad habits. Of the remaining, $3.45 \%$ (306) were found to be having alcohol consumption as a habit. The other bad habits like smoking $(2.02 \%)$, betel leaf chewing $(0.36 \%)$, pan masala use ( $0.16 \%$ ) and use of drugs $(0.05 \%)$ were found in smaller percentages.

Chart No. 46 : Bad habits

Given the circumstances of an urban area where the listed bad habits were spreading fast among the people, the present figures suggest a re-probing of the phenomenon.

Further scientific enquiries were required to validate the claim of the $93.39 \%$ of respondents who reported that they had no bad habit.

## Distribution of bad habits in the age group of 05-15 years

Chart No. 46a. : Distribution of bad habits in the age group of 5-15

In this early age group of 5-15 (Table No.46a), a very vast majority of children ( $99.58 \%$ ) were found not having any of the listed bad habits. Out of the $0.42 \%$ of children who had bad habits of drinking and smoking, $0.34 \%$ of the children had the habit of alcohol drinking with equal percentage of boys and girls. The remaining (0.8\%) were girls who used to smoke, as per the data available. Though the percentages are small, the problem is serious considering the age group of the section.

The data points to the spreading of alcohol drinking and smoking among the adolescent boys and girls in this early age group of 5-15. Many children start these habits during their teens. A bundle of causes may be behind this problem, which needs detailed studies to understand it in its full perspective.

## Distribution of bad habits in the age group of 16-25 years

In the next higher age group (Table No.46b),, $0.97 \%$ of children had the habit of drinking with $0.67 \%$ boys and $0.30 \%$ girls. The boys alone had the habit of smoking ( $0.45 \%$ ). A number of boys started using Pan Masala ( $0.15 \%$ ). $98.44 \%$ of people in this age group said that they did not have any bad habits.

Chart No. 46b. : Distribution of bad habits in the age group of 16-25

## Distribution of bad habits in the age group of 26-60 years

In this age group of 26-60 years (Table No. 46c), according to the data available, drinking and smoking were found as the major bad habits. As in the general analysis, vast majority of the respondents reported that they did not have any bad habits. $4.99 \%$ reported that they had a habit of drinking alcohol with $4.51 \%$ male drinkers and $0.47 \%$ female drinkers. $2.94 \%$ of persons said that they had the habit of smoking, with $2.75 \%$ males and $0.19 \%$ females. Pan Masala, drugs consumption and betel leaf chewing were the other habits found among the age group, but in a negligible percentage.

Chart No. 46c. : Distribution of bad habits in the age group of 26-60

## Distribution of bad habits in the age group above $\mathbf{6 0}$ years

Among senior citizens, the trend was not very different. Among them, drinking was the major bad habit with $4.79 \%$ of them succumbed to it. As found in other age groups, majority of them were males ( $3.95 \%$ ) with a small percentage of females ( $0.84 \%)$. Majority reported that they did not have any of the bad habits. Among this group, betel chewing was found increasing with $1.37 \%$ in general with $0.91 \%$ males and $0.46 \%$ females. (Table No.46d)

Chart No. 46d. : Distribution of bad habits in the age group above 60 years

The observations point to the fact that most of the respondents did not want to reveal that they had a bad habit. This attitude may prevent the effectiveness of the efforts to address the problem.

## Disabilities

The survey included the subject of disabilities to find out the size and type among the respondents in Pettah foronate. Data regarding 11 disabilities as given in Table No. 47 were collected in the survey. The data showed that only $4.95 \%$ of the respondents had one or the other disabilities. Partial vision (1.26\%) was found to be of the major problem in the foronate in comparison with other disabilities which were of insignificant size.

Chart No. 47: Disabilities

## Involvement in Faith-based and social organizations

Distribution of the respondents according to their membership/affiliation/ association with faith based/ secular organizations was tabled in Table No. 48. It was surprisingly noted that $57.94 \%$ of the respondents were not part of any of the 17 types of organizations listed in the table in Pettah Forane. Some of the organizations in which the respondents had some kind of association were, in the order of descending percentages, BCCs (13.78\%), political organizations (7.20\%), KCYM (5.05\%), prayer groups (2.11\%) and pious associations (2.04\%). Distributions in other organizations were found negligible.

Chart No. 48 : Involvement in Faith-based and social organizations

Since membership, association or affiliation of a person with any of the social or faith-based organizations is considered as a sign of civic sense, social contacts and proactive and positive personality, the small percentage of persons with such associations is a case for concern. Social capital which is considered as a vital resource is very low in the community in Pettah forane.

## Involvement in Church and other organizations in the age group of 18-60 years

Majority of the respondents ( $55.68 \%$ ) in the age group of 18-60 years reported that they did not associate with any of the listed organizations. Among the respondents in this group, the largest percentage of persons (14.71\%) was involved in BCCs with more women ( $8.71 \%$ ) than men ( $6 \%$ ), followed by political organizations ( $6.82 \%$ ) with more men $(3.71 \%)$ than women $(3.11 \%)$, KCYM $(5.84 \%)$ with more men ( $3.33 \%$ ) than women $(2.51 \%)$, SHGs $(3.03 \%)$ with more women ( $2.69 \%$ ) than men ( $0.34 \%$ ), catechism teachers associations (1.99\%) with more women (1.54\%) than men ( $0.45 \%$ ) and pious associations ( $1.91 \%$ ) with more women ( $1.12 \%$ ) than men ( $0.78 \%$ ). (Table No. 48a)
In BCCs, SHGs, vanitha vedi units, pious associations, KCSL, prayer groups and catechism teachers associations, women were found more in percentage, while in KCYM and political organizations men were found more in the age group of 18-60 years.

Chart No. 48a. : Involvement in Church and other organizations in the age group of 18-60 years

Involvement in Church and other organizations in the age group above 60 years

Chart No. 48b. : Involvement in Church and other organizations in the age group above 60 years

In this age group (Table No. 48b), the highest percentage of persons (17.93\%) participated in BCCs with more men ( $11.07 \%$ ) than women ( $6.86 \%$ ), followed by political organizations ( $5.95 \%$ ) with more women ( $3.06 \%$ ) than men (2.89\%), prayer groups ( $3.97 \%$ ) with more women ( $2.48 \%$ ) than men ( $1.49 \%$ ) and pious associations ( $3.14 \%$ ) with more men ( $1.74 \%$ ) than women ( $1.40 \%$ ).
In this age group above 60 years, more men were involved in BCCs, while more women were associated with SHGs, Vanitha vedi, prayer group, pious associations, catechism teachers associations, and politics.

## FAITH LIFE OF INDIVIDUALS

Three indicators were included in the survey to measure the faith life of the individual respondents. Participation in Holy Mass, participation in Catechism class and participation in the Sacrament of Reconciliation were selected for the purpose. The data on these subjects were documented in Table Nos.49, 50 and 51.

## Participation in Holy Mass

According to Table No. 49, the majority ( $69.59 \%$ ) of respondents used to go for Holy Mass on a weekly basis. A small percentage of people $6.05 \%$ went for Holy Mass daily and $11.09 \%$ went for Holy Mass 2-3 days in a week. While $4.17 \%$ went for Holy mass once in a year, $3.08 \%$ never went for Holy Mass.

Chart No. 49 : Participation in Holy Mass

## Participation in Holy Mass in the age group of 05-18 years

In this age group of 5-18 years, where children and young persons are considered (Table No. 49a), a good majority of them ( $78.72 \%$ ) claimed that they went for holy Mass once in a week with more boys $(40.53 \%)$ than girls $(38.12 \%)$. The next largest section (11.17\%) with more girls ( $6.48 \%$ ) than boys ( $4.69 \%$ ) went for Holy Mass $2-3$ days a week. Only a small percentage of persons ( $3.39 \%$ ) went for daily Mass with more boys ( $1.73 \%$ ) than girls ( $1.69 \%$ ). There were $1.36 \%$ of this age group went for holy mass once in a year.

Chart No. 49a : Participation in Holy Mass in the age group of 5-18 years

While boys topped among the weekly mass goers, girls topped among the Mass goers 2-3 days a week. Girls slightly stood higher among the daily Mass goers.

## Participation in Holy Mass in the age group of 19-60 years

In the age group of 19-60 years (Table No. 49b), a slight majority of persons (69.85\%) reported that they went for Holy Mass once in a week, with more women ( $35.57 \%$ ) than men ( $34.28 \%$ ). The second largest section $(11.24 \%)$ said they went for Holy Mass two-three days a week with more women (6.64\%) than men (4.60\%). Those
who participated in Holy Mass daily constituted of $5.67 \%$, of which $3.23 \%$ females and $2.44 \%$ males.

Chart No. 49b. : Participation in Holy Mass in the age group of 19-60 years

In this age-group of 19-60 years, women were more faithful to participation in Holy Mass among those who went for it daily, weekly and 2-3 days a week.

## Participation in Holy Mass in the age group above $\mathbf{6 0}$ years

The largest section of the members of the age group above 60 years ( $55.18 \%$ ) reported that they went for Holy

Mass once on a week with more females ( $28.73 \%$ ) than males ( $26.48 \%$ ). Those who went for daily mass constituted of $13.62 \%$, of which $7.56 \%$ were males and $6.06 \%$ were females. $12.48 \%$ of people in this age group went for Mass tw0-three days a week. It was reported that $6.77 \%$ of members attended Mass only once in a year, while $6.50 \%$ never participated in Holy Mass.

Chart No. 49c. : Participation in Holy Mass in the age group of 19-60 years

## Participation in catechism classes

Participation in catechism classes was a concern of the children and youth and so $60.80 \%$ of the total respondents were excluded from further analysis as they might be above or below the age traditionally considered for catechism studies. No data was available from $9.52 \%$. Of the remaining, the largest section, that is, $16.54 \%$ regularly went for catechism, while $3.15 \%$ (280) never went. $1.98 \%$ (176) occasionally went for catechism classes (Table No. 50).

Of those who regularly went for catechism, females were more than the males.

Chart No. 50 : Participation in catechism classes

## Participation in catechism classes in the age group of 05-25 years

In the age group 5-25 years (Table No. 50a), the largest section (48.88\%) reported that they went to catechism classes regularly with more girls/women (24.81\%) than boys/men (24.07\%). $6.13 \%$ of persons said they never went for catechism classes with more boys/men (3.28\%) than girls/women (2.85\%). Still smaller section (4.67\%) informed that they occasionally went for classes of catechism with slightly more girls/women ( $2.39 \%$ ) than boys/ men $(2.28 \%)$. It was noted here that a large section of persons said that it was not applicable to them, may be due to their age and professional constraints. The fact that in many parishes, catechism classes have been conducted for persons up to the level of degree, that is, up to 21 years may be brought to mind while analyzing this data.

Chart No. 50a : Participation in catechism classes in the age group of 5-25 years

No major variations were found between men and women in the frequency of their going for catechism classes, in this age group.

## Participation in the Sacrament of Reconciliation

Similarly, the Table No. 51 deals with sacrament of confession and people's participation in it. Setting aside the children who had not taken first communion (11.33\%) and some people who did not provide information (7.30\%) regarding this aspect, $42.07 \%$ of the total respondents occasionally went for the sacrament. A substantial percentage of persons ( $21.07 \%$ ) went for yearly confession. 441 ( $4.97 \%$ ) never went for the sacrament of confession. Only $13.26 \%$ (1177) went for monthly confession.

Chart No. 51 : Participation in the Sacrament of Reconciliation

In Pettah Forane, majority of the individual members were found to be honoring the obligations of faith life to a great extend with majority of the concerned sections going for Holy Mass weekly and for Confession at least occasionally. However, the participation in catechism classes was not found encouraging.

## Participation in the Sacrament of Reconciliation in the age group of 10-18 years

Faithfulness of the persons belonging to the age group of 10-18 to the sacrament of confession in Pettah Forane was analyzed separately (Table No. 51a). The largest section, that is, $42.48 \%$ of the respondents, said that they occasionally went for the sacrament of confession with equal percentage of men and women (21.24\%). The next largest section ( $25.83 \%$ ) said that they went for it once in a month with more women (14.22\%) than men (11.61\%). There were $11.88 \%$ of respondents who said that they went for confession on an annual basis with more women $(6.39 \%)$ than men $(5.49 \%)$. However, there were $2.88 \%$ persons who never went for confession with more men (2.16\%) than women (0.72\%).

Chart No. 51a. : Participation in the Sacrament of Reconciliation in the age group of 10-18 years

It was noted that many of the faithful in this age group of 10-18 years went for confession in view of the obligation to confess at least once in a year. Taken together various frequencies, it was found that women faired better in their faithfulness to confession.

## Participation in the Sacrament of Reconciliation in the age group of 19-60 years

In this age group of 19-60 years, the largest section (48.47\%) with $25.74 \%$ females and $22.73 \%$ males reported that they occasionally went for Confession. The next largest section $(24.97 \%)$ said they went for it yearly, of which $13.06 \%$ were females and $11.92 \%$ were males. Those who went for monthly Confession were $12.52 \%$ with $6.72 \%$ females and $5.80 \%$ males. $4.83 \%$ never went for the Sacrament with $3.12 \%$ men and $1.71 \%$ women.

Chart No. 51b. : Participation in the Sacrament of Reconciliation in the age group of 19-60 years

Occasionally confessing people are the largest section in this age group of 19-60 years. Women were found more faithful to the sacrament of Confession occasionally and monthly.

## Participation in the Sacrament of Reconciliation in the age group above $\mathbf{6 0}$ years

In this age group above 60 years, the largest section ( $42.36 \%$ ) with $21.44 \%$ males and $20.91 \%$ females reported that they occasionally went for Confession. The next largest section ( $25.75 \%$ ) said they went for it yearly, of which $13.06 \%$ were females and $12.65 \%$ were males. Those who went for monthly Confession were $14.24 \%$ with $7.64 \%$ females and $6.59 \%$ males. $8.35 \%$ never went for the sacrament with $4.31 \%$ men and $4.04 \%$ women.

Chart No. 51c. : Participation in the Sacrament of Reconciliation in the age group of above 60 years

In this age group above 60 years, the percentage of women who went for occasional Confession went down, while women who were used to go for monthly and yearly Confession went up.

As far as the faith life of the people as measured by the above indicators was concerned, a good majority of the people still continued to participate in important obligations of the faithful. At the same time a section of people, however, small it is, never bothered to possess a Bible, or go for Holy Mass or Confession.
In this chapter, the observations reflected from the available data were narrated in a very simple and clear manner for any lay person to understand. In the analysis on individual data, age wise and sex-wise interpretations were given. In the next chapter, major findings, the cause and effect relationships, the impact analysis and recommendations will be discussed.

## CHAPTER 3

## FINDINGS <br> AND DISCUSSIONS

Chapter 3 presents the summary of findings of the survey culled out from Chapter 2. It further discusses a causeeffect relationship bringing out the root causes and impacts of the findings. The discussion is based on the logic that whatever we find in the survey has a cause and consequence. During the process, a set of recommendations relating to each of the major sectors to sustain the positive aspects and address the negative aspects are presented.

## SUMMARY OF FINDINGS

## SECTION ONE: Families

The survey covered 2485 families from 19 parishes in Pettah Forane. This is \% of the total number of families covered by the survey in the Archdiocese. In the Forane, the largest number (694) and percentage (27.93\%) of respondent families lived in Pettah Parish, while the next largest number of families (501) was found in Muttada Parish (20.16\%) followed by Kumarapuram with 179 families ( $07.20 \%$ ). Chengottukonam Parish had the smallest number of respondent families (8) in the Foronate ( $0.32 \%$ ).

## Housing

In Pettah Forane, though a good majority of families (69.01\%) had their own houses, $11.63 \%$ (289) of families were found to be homeless at the Forane level and 12.03\% of families (299) lived in rented houses in the Foronate. Most of the houses were either concrete or multi-storied. However, quite a few families lived in huts or thatched or sheet roofed houses. While almost half the number of families had small houses of 1-4 rooms, an equal size of families lived in houses having more than 4 rooms.

Majority of the houses (70.50\%) accommodated single families. A substantial number of households accommodated more than one family, indicating congestion within the house and lack of sufficient privacy.
Though the largest section (64\%) had only 1-4 members living in it, a good number of $(21 \%-514)$ houses accommodated 5-8 members.

The problem of housing can be solved with internal resources, since the number of homeless families is not very high. A parish level and forane level resource mobilization and planning can address the problem in collaboration with other civil society and government stakeholders.

## Land

The Forane has 2270 (18.83\%) landless families. 1891 families (76.10\%) had their 'own' land. The size of the landless includes the homeless and so the strategies adopted to address the housing problems may be applicable in this regard also. Both of them need more participatory action and planning.

The families of the forane had only small plots of land.
The largest section of families in the Foronate (923) had only $1-5$ cents of land ( $37.14 \%$ ). While $23.50 \%$ (584) of families owned 5-10 cents each, a small percentage of families ( $7.81 \%$ ) had more than 16 cents of land.
With regard to $34.81 \%$ (865) of total families, control over land was vested with male adult members, while only $22.70 \%$ (564) families reported that their land was with female adult members. A good number of families, that is, $449(18.07 \%)$ families said that the land was 'owned' jointly by the male and female adult members. A gender bias against women is visible in this matter.

## Energy Consumption

Majority of the families (1964) in the Forane used LPG (79.03\%). 35.45\% (881) families still used traditional stove using firewood. Very few families used non-conventional sources of energy like bio-gas plants, solar equipments, etc.

## Economic Conditions

The survey examined the economic status of the families in terms of their possession of home appliances, vehicles, fishing assets, other occupational assets and trade and commerce. It was found that in all these matters, the families in Pettah forane were very much behind and reflect a very poor economic status.

## Spending Patterns

In Pettah forane, almost half of the families (49.74\%) spent more than Rs.3000/- per month for food. The largest percentage of families (18.23\%) spent less than Rs.2000/- for education. $41.53 \%$ spent between Rs.500/- and Rs.1000/- per month for medical care.

## Debt

Majority ( $55.41 \%-1377$ ) of the families was indebted to one or the other way. Among those who had debts, the largest section of families (44.14\%) had a debt up to Rs. 50000

## Agriculture and Livestock

$90.02 \%$ did not have any of the listed or other items, indicating that the people in the region were not interested in agriculture and livestock.

## Media and Publications

Television was the most popular medium used by majority of families ( $73.80 \%$ ), followed by mobile phones ( $71.19 \%$ ). Dailies $(61.21 \%)$ were the next largest source of information. Only a small percentage of families subscribed to Jeevanadam (Weekly publication of the KRLCC) (6.04\%) and Jeevanum Velichavum (Monthly publication of the Latin Archdiocese of Trivandrum) (14.41\%).

## Ration Cards

A good majority of families ( $80.82 \%$ ) did possess ration cards (2058). But, those who did not have a ration card amounted to 427 families (17.18\%).

## APL and BPL families

A majority of the families had APL cards ( $67.3 \%$ ), while $15.1 \%$ had BPL cards. The economic situation reflected in the survey calls for more families to get registered as BPL to be come eligible for government entitlements.

## Medical Insurance

A good majority of families (72.03\%) did not have a health insurance policy at the time of data collection.

## Toilets

2369 families ( $95.33 \%$ ) had toilets attached to their homes and only $1.73 \%$ of families (868) used public toilets. 14 families used open space for defecation in this urban region.

## Source of Water

The largest section of families, that is, $62.98 \%$ (1565) in Pettah Forane had drinking water through paid pipe connected to their houses (piped water), while $36.22 \%$ (900) depended on own well together with other sources.

## Drainage and Solid Waste Disposal

Majority of the families (58.83\%) used arranged pits to drain waste and used water.
The majority of the families ( $56.30 \%$ ) deposited their solid waste in their premises.

## Education

## Education support given to children

Most of the families who had children in schools and colleges paid good attention to their studies by way of providing tables and chairs (48.05\%), a proper time for study at home (36.22\%) and study materials including text books and note books and other instruments. The largest section (47.48\%) of families reported that they always cared for their children's study. However, community support for education of the children was very low.

## Faith Life

A vast majority of the families (97.18\%) had P O C Bible in their homes. $91.03 \%$ (2262) of the families always had family prayer. A simple majority of families ( $57.46 \%$ ) always participated in Basic Christian Community (BCC) meetings.

## Death within three years

No one died during the t4hree years prior to the survey in $89.58 \%$ of the families (2226) in Pettah foronate. Death did occur in a few families due to reasons such as old age (4.23\%), diseases (2.29\%), accidents (0.36\%), suicides ( $0.28 \%$ ) and other natural reasons ( $0.76 \%$ ).

## SECTION TWO

There were 8876 persons covered in the survey from the 19 Parishes. Gender distribution in the Pettah Foronate was found almost ideal with $50.20 \%$ males and $49.80 \%$ females. The family size of the surveyed families was 3.57 in the foronate. Sex ratio was 992.

## Age-wise distribution of the total population

The region had a very large section of people in productive age group of 22-59 (56.33\%). Infants in the age group of $0-5$ constituted of $6.89 \%$ (612).

## Blood Groups

$25.46 \%$ of the population in the Foronate did not know their blood group. Among those who knew, the largest section constituted $26.52 \%$ of persons having $\mathrm{O}+\mathrm{ve}$ (O Positive).

## Blood Groups of persons in the age group of 18-45 years

The persons in the age group 18-45 years consisted of 3821 respondents in the region. 9.77\% (867) of them did not know their blood group.

## Marital status

53.79\% (4774) were married, while $35.23 \%$ (3127) were unmarried. Among the unmarried persons, those above 40 years 134 persons ( $3.37 \%$ ). Widows ( $446-5.02 \%$ ) were far more than widowers ( $72-0.72 \%$ ) in the Foronate.

## Life Status

Students currently studying in various levels constituted the largest section with $21.43 \%$ (1902), followed by the unemployed persons (20.65\%), workers (16.70\%).

## Educational Qualifications

In general, a small percentage of respondents (6.82\%) consisted of the illiterate, persons not studying and the mere literate (605) in the foronate of Pettah. The largest section of respondents had completed the High School level of education (20.72\%).

## Medium of Instruction opted for school education

A simple majority of respondents ( $53.77 \%$ ) opted for Malayalam vernacular language for their studies in the school. One third of the respondents opted for English medium (33.36\%) and a small percentage went for Tamil. Younger generations preferred English Medium to Malayalam medium for their studies.

## Subjects opted for studies after 'Plus Two’

Science (8.07\%-716)), Arts (7.68\%), Commerce (6.15\%-546) and Engineering subjects (5.15\% -457) were the most popular subjects among the educated persons in the forane. Science and Engineering subjects were the most liked subjects for study among the young people. Females liked science more and males liked engineering more.

## Preferred Education Institutions

The preference of the respondents was found in the order of State Government institutions (30.17\%), State-aided institutions $(28.56 \%)$, State unaided institutions ( $14.66 \%$ ), CBSE $(6.15 \%$ ) and ICSE $(3.41 \%)$. The younger ones went for state unaided institutions, while the elder groups opted for state aided institutions. More percentage of boys opted for CBSE (12.30\%); more girls opted for State unaided (12.70\%) institutions.

## Employment Sectors

The largest section of the employed respondents was in the private non-service sector (12\%). Majority of the
respondents in the age group of 18-28 years and of 29-35 reported that they had employment in the private sector with more men (10.34\%) than women (7.69\%).

## Career Sectors/ employment positions

It was found that in Pettah Forane house managers (7.14\%), wage labourers (6.02\%), pensioners (4.57\%) dominated the employed population. The percentage of Gazetted officers was found very meager with $1.24 \%$.

## Diseases

Five major ailments found among the respondents were Diabetic (7.94\%), Blood Pressure (6.53\%), Allergy (2.59\%), Heart diseases (2.33\%) and Rheumatic (2.06\%). $73.67 \%$ (27580) did not have any disease in the foronate of Pettah. In the age-wise analysis, the young persons did not have major illnesses. When people grew older, they did have life style diseases such as diabetic, BP and rheumatic. However, in the age group above 60 years, majority of the people had health problems and diseases.

## Bad habits

A vast majority ( $93.39 \%$ ) reported that they did not have any bad habits. Of the remaining, $3.45 \%$ (306) were found to be having alcohol consumption as a habit. Among senior citizens, drinking was the major bad habit with $4.79 \%$ of them succumbed to it. Males dominated in bad habits.

## Disabilities

Only $4.95 \%$ of the respondents had one or the other disabilities. Partial vision ( $1.26 \%$ ) was found to be of the major problem in the foronate in comparison with other disabilities which were of insignificant size. $94.74 \%$ (54) of those who had partial vision (57) were above 40 years old.

## Involvement in Faith-based and social organizations

BCCs $(13.78 \%)$, political organizations $(7.20 \%)$, KCYM ( $5.05 \%$ ), prayer groups ( $2.11 \%$ ) and pious associations $(2.04 \%)$ were the main organizations with which quire a few people associated, while $57.94 \%$ of the respondents were not part of any of the 17 types of organizations listed in the table in Pettah Forane.

## Faith Life of Individuals

The majority ( $69.59 \%$ ) of respondents used to go for Holy Mass on a weekly basis. In the age group 5-25 years, the largest section (48.88\%) reported that they went to catechism classes regularly with more girls/women (24.81\%) than boys/men $(24.07 \%)$. $42.07 \%$ of the total respondents occasionally went for the sacrament of Reconciliation

## SUGGESTIONS FOR ACTION AND FOLLOW UP

The following discussion is meant to provide an insight into the potential solutions of the problems found in Pettah Forane. It is very much likely to find the same problems in more or less the same volume in other Foranes also. Therefore, the recommendations and suggestions may also look similar. Therefore, it is strongly advocated to use these suggestions as general ones and to plan specific projects with people's active participation with specific objectives.

- Several subjects covered by the survey are causally connected to one another. Only if the root causes are identified and addressed efficiently, the related consequences will disappear and the problems will be solved in a sustainable manner. Therefore, there is no point in finding out solutions for each and every individual problem separately. Thus, the suggestions given below may be taken to address the entirety of the problems under our concern.
- Most important and core issue of community and family development is related to education because good education fetches good jobs, better income, higher civic sense, better awareness about bad habits and diseases. Regular and better income leads to good health and nutrition, proper sanitation and hygiene. Better jobs and better income ensures normally land ownership and houses to live comfortably.
- All the children capable of learning shall be enrolled at the appropriate age in schools accessible to the families according to their existing financial and other conditions. Lack of good education is at the root of the low profile of employments and low income.
- Parent and family attention and support to children for their studies shall be enhanced through regular community linkages and contacts which is possible through parish level programs.
- At the same time, committed efforts shall be taken and sustained to enhance the quality of teaching and formation in schools through building up the capabilities of teachers.
- Special programs in schools to attend to the students with learning difficulties shall be designed and implemented.
- Higher education shall be promoted and encouraged with special programs and individual attention to students in higher classes.
- Career guidance programs shall be designed and implemented at High School, Higher secondary and College levels for helping students and their parents to chose the appropriate courses.
- Technical and professional education shall be promoted among the talented students.
- Special programs shall be designed to prevent drop outs from schools and colleges.
- Parish level and Forane level education monitoring committees shall be formed to take stock of the progress and the Archdiocese shall be alert to ensure the system functioning.
- It is important and urgent that some community support may be designed and initiated in all the parishes for the education of economically poor students. Scholarships and promotional programs are good means for encouraging studious children in this regard.
- Special funds shall be set up by the parishes, if not by the families, for the promotion of education after Xth class specially to support the poor students. Mere funds are not enough to address the problem. Alternative financial support to the families, motivation to the parents and elder brothers or sisters, and parish level community support and direct orientation and motivation to the students and teachers are some of the measures that can be thought of in this regard. Special career guidance courses can also be conducted at suitable intervals and for suitable groups. Education should be a community concern, not only a family concern.
- Information on the availability and possibility of employment opportunities shall be made accessible to prospective job aspirants in the parishes. The prospective job aspirants shall be trained to motivate them to access and follow up the source of information on job opportunities, eligibility conditions, time to apply, application processes, potential benefits, time taken to process the applications, recruiting authority and its legal status, the things to remember while preparing applications for jobs, dispatch details, etc
- Labourers in the unorganized sector shall be organized and trained to manage their income judiciously in favour of their families' progress and development, to upgrade their existing skills, to be responsible in their jobs, to be aware of their rights, to avoid spending on unnecessary and unhealthy items.
- People opting for other countries for employment and labour shall be trained to secure jobs with optimum expenses and time. They also need to be sensitized on the potential dangers of illegal and fraudulent ways.
- Social security schemes shall be implemented for those in the private and unorganized sectors. They shall be helped to access information on the existing programs.
- A kind of employment exchange at the parish levels and forane levels shall be started to take stock of the employment and labour situations affecting the job aspirants.
- An ongoing campaign shall be initiated to promote thrift and saving habits for special purposes like house construction and or land purchase. This shall include continuous coaching in family budgeting and auditing.
- Entrepreneurship and business management shall be promoted among the interested persons.
- Special financial schemes involving the community shall be initiated to help people to build up necessary assets like land and house together with assets for livelihood.
- Effective linkages may be made with Panchayat and Government schemes with regard to land and house and promotion of education.
- Families who are strengthened with own houses and land shall be encouraged to support the landless and homeless by supporting them to build up their existing assets, business and other source of legal income.
- The need for and importance of using non-conventional and renewable sources of energy shall be made an urgent agenda in the forane level across the parishes. Existing institutional frameworks may be utilized for the purpose. Catechism classes, youth movement and even pious associations shall be led to consider the environmental issues as issues related to faith and spirituality.
- The families of the Forane may be alerted to listen to the affairs of the Church in Kerala and elsewhere through subscribing to church publications.
- Families need to be continuously cautioned about the undue influence the modern media and communication channels may make on them and on their children.
- Parish level counseling centers may be started and run professionally to attend to cases of perversions in any aspect of life.
- The catholic population in Pettah forane may be especially encouraged to go for vegetable cultivation in their homesteads, together with rearing cattle where ever possible in view of making good food available to their own families.
- Special programs may be designed to ensure BPL cards to those who really deserved. These programs can be planned and implemented in collaboration with the local bodies.
- Special programs and campaigns are recommended to enroll those who have not taken medical insurance so far, in collaboration with the authorized insurance companies.
- Local bodies can be alerted to the question of water, sanitation and drainage issues. Government programs can be linked to those families who do not have their own sanitary latrines and regular access to drinking water.
- Community-based rehabilitation programs have been found successful to support people with disabilities.
- BCC meetings need to be meaningful and participatory. Each and every one shall get one's space to share one's views and opinions. Disagreements may not be ignored or fought with, but should be understood and attended to. Participation in BCC meetings shall not be another ritual. BCCs shall be a meaningful platform for integrated involvement of the faithful to get involved in pastoral and social affairs of their community.
- Measures should be designed to engage the productive age-group in suitable places for utilizing their potential for their families and communities.
- It is recommended that each parish takes initiative to conduct blood testing camps and document the donors' details for future networking for blood.
- Counseling programs and handholding initiatives are required to rehabilitate those who are in difficulty such as widows and abandoned women or unwed mothers. There is a need to bring back to the Church those who are living together through practical and constructive strategies and policies.
- Now that the figures are alarming and disturbing, collective campaigns shall be initiated to prevent dropouts after SSLC or XIIth class.
- People shall be encouraged to get involved in the social and or church-based organizations for the creation of social capital through making these organizations transparent, democratic and accountable.

The above discussions and suggestions for action are meant to prompt more innovative and practical ideas to address the problems reflected in the survey findings. It is for the forane communities to take up the issues one by one according to their priorities.

ANNEXURE 1

## Tables
