PREFACE

History always recalls National Census as one of the greatest achievements of any ruler who accomplishes it, precisely because it presupposes vision, systematic planning and sincere dream for sustainable development of his or her kingdom.

2012 was a milestone in the annals of the Latin Archdiocese of Trivandrum which celebrated its Platinum Jubilee that year. One of the important events which added colour and grandeur and substance was the socio-economic, pastoral and civic survey of the Archdiocesan population. Though the diocese was not new to such surveys, the present one was special with its coverage and depth. It was this bold decision and constant encouragement of Archbishop Soosa Pakiam that enabled us to fulfill such a satisfying, though hard and challenging, task with commendable output.

Preliminary discussions of the survey began in the beginning of 2011. There were many who enriched us to shape the survey format with solid support. The following ones deserve special mention of thanks: Fr. E.J. Thomas S J, Fr. Joye James S J, Dr. Irudayaraj, Dr. Charles Leon, Dr. Biju and Msgr. Eugene H. Pereira. It was also placed before the Diocesan Senate and other relevant Archdiocesan platforms, besides the directors of different ministries in the Archdiocese. A sample survey was carried out at Kochuthura, Nettayam and Thope during February – March, 2011. The format for data collection was presented in the Presbytery held on 23rd August, 2011 along with the sample survey results. Suggestions were incorporated therein.

A Training of Trainers (ToT) was organized at the diocesan level on July 17th and 23rd 2011, for personnel such as the parish BCC coordinators, animators of various ministries and other parish representatives on the methodology of enumeration. They functioned as a resource team for training the enumerators at the villages. By the end of July, parish level training was completed. The field level survey was completed in five months starting from the month of August 2011. Some 2050 people were involved in the enumeration. From September 2011 onwards parishes began sending the completed survey forms. The commendable efforts of the parish priests, parish councils and other teams deserve a word of appreciation and thanks. Meanwhile, a new software was developed on VB.Net with MySQL for data entry and report generation. It is flexible enough to generate any combination of options. This parish/user-friendly software would not have been materialized but for the hard work and skills of Adv. Justus who deserves special thanks and it is joyfully recorded here.

Data entry which began in November 2011 took almost eight months to complete. 39 people at different locations and times committed themselves to make it a reality. Though the names of all the members involved in the data entry are impossible to be mentioned here, the names of Mrs. Dayana, Mrs. Mercy, Miss. Jimmy Mole, Mr. Nandu, Mr. Sumesh, Bros. Ajith, Shijin, Immanuel, Marthoma and Lawrence can not go without mentioning. Their committed efforts are thankfully remembered here. Sr. Mary Vaz, the BCC office secretary, along with the animators and staff of BCC made all efforts needed to coordinate the entire process of data collection and entry. They together do deserve gracious thanks.

On 1st July 2013, the day of the Platinum Jubilee celebration, we could release the forane-wise family directory before the public which represented the source of this data base. After clearing errors the final data and its results were presented in the Presbytery on 14th August, 2012 and priests were introduced to the use of the software. This introduction was given for the parish – forane representatives also.

The complete data were then handed over in November 2012 to ADHWANA, a State Level professional NGO, in order to bring out the report of the survey with the findings and recommendations. The volume in your hands with lot of information in tables and charts, along with analysis, findings and recommendations generated from the supplied

data is the result of sustained hard work of Dr. J. Mary John and his team of experts and staff. A big thanks to them. A special word of appreciation and thanks is due to SKETCH TRICKS for accomplishing the designing and printing works beautifully. We thankfully acknowledge the contributions of Mr. Augustin Kanippally in drafting a brief outline of the forane background of Palayam. We are indeed indebted to the Fr. Lenin Raj, the Secretary and Director, Trivandrum Social Service Society and to his staff in extending all possible supports throughout the process of survey, besides the financial assistance to carry out this task constraint-free.

Archdiocesan Synod, one of the great events of the Platinum Jubilee, discussed and suggested plans on various sectors and fields of activities. Further planning in detail, taking into account the ground realities of the parish communities needs to be done, yet. The plan will be SMART plan: Specific, Measurable, Achievable, Realistic and Time-bound. The survey and the report generated certainly will have its impact on that. The Report may serve as a historical data on our diocesan community and can form basis of comparison for future social analysis and planning, whenever necessary.

However, the findings of this survey shall better be used with constant and serious inputs from people's active participation at all levels of interventions—parish, forane and Archdiocesan. It is our modest expectation that it forms the basis for future planning.

We, the members of the Survey Team, take this opportunity to thank you, one and all for your share in making this a reality for the service of our valiant people who dare even the elements for sustenance and survival.

Survey Coordination Team

FOREWORD

"To know thyself is the greatest knowledge". The aims of "Latin Archdiocesan survey 2011" are: to know our Archdiocese in a better way; to know our strengths and weaknesses; to know the exact population; to situate ourselves with other communities; to find the areas of our development; to focus our ministries to the real needs of people. This is an eye opener to all members of our Archdiocese. The survey results reveal what we are and where we are today after 75 years of journey as a faith community rooted in Jesus and his principles.

"Latin Archdiocesan survey 2011" attempts also a study of each individual family and person in our Archdiocese. This effort taken in view of reaching substantiated inferences about our community has now reached to the present stage through expert guidance, participatory and collective action and thought, group discussions, well designed interview schedule, effective training sessions, tedious home- to- home data collection, tailor-made software preparation, patient data entry and intelligent data analysis-interpretation and high standard of organizing various factors.

This survey reports are arranged in two levels, namely Archdiocese-Forane level and Forane-Parish level. This is a very helpful tool for the decentralized planning in our Archdiocese which is a key principle of our first synod. Different ministries and commissions have to make use of this survey analysis for their entire planning of the ministry and could reflect in the annual plan and budget at least for the next 5 years. The forane which has regional preferences and priorities should make use of these survey findings for their long and short term planning of various ministries and concerns they face. As pastors and leaders of the community, they should make use of these results and analysis for their parish ministry. The parish councils, finance councils and other bodies in the parishes have to see their priorities and levels of different areas and should make efforts to improve them by planning and executing different programs for the target groups.

I sincerely appreciate this great task and all the persons who toiled to make this dream a reality. We are on our way to an improved situation not only in terms of our socio-economic progress but also in terms of our skills to understand the reality.

I love to state here that undertaking such an exercise should not be stopped with this one. At the completion of every tenth year, a similar exercise has a more relevant space in the process of updating the information. I once again appreciate each and every one behind this great achievement.

THIRUVANANTHAPURAM LATIN ARCHDIOCESE. HISTORICAL BACKGROUND

Introduction

Christianity claims its presence in Kerala since the 1st century itself. Its inception was supposed to be by 52 AD with the arrival of St. Thomas, the Apostle, in this land. However, a historical study of Christian community in Kerala forgetting the services of foreign missionaries, who sacrificed their lives to promote social justice among the people of this land, who were suppressed and depressed under the then prevailing untouchability and colour discriminations, may perhaps be incomplete.

Origin of Christian Community

In the past, Quilon was a prominent and predominant commercial centre of Travancore. Even before the merchants from western countries came to Travancore for their trade and commerce, the missionaries from Europe visited Travancore to propagate the Good News of Jesus, the Christ. Marcopolo, a famous traveler from Venice, who visited Quilon in the year 1292 AD has engrossed that there was a Christian community in this land. The seeds of faith, sown by the Franciscans and Dominicans, which were confirmed and strengthened by St. Francis Xavier, the Jesuit, and his followers, resulted in the formation of Christian communities along the coastal area of the erstwhile Travancore.

Pope John XXII, by a Decree "ROMANUS PONTIFEX" established the Diocese of Quilon in the year 1329, which became the first diocese in India. The writings of St. Francis Xavier mentions places such as Vizhinjam, Karumkulam, Puthiyathura, Pulluvila, Kollamcode, Vallavila, Thoothoor, Puthenthura, Thengappattanam, Inayam, Midalam, Vaniyakkudi, Kulachal, Kadiyappattanam, Muttom, Pallom, Manakkudi. The areas from Kulachal in the south to Adimalathura in the north were under a vicariate as recorded by Fr. Valithano, a Jesuit Missionary. There are evidences that Christian communities were existing at Mampally and Roitora even prior to the arrival of Francis Xavier.

Formation of Trivandrum Latin Diocese

By 17th century the Carmelite Missionaries landed in India. In 1898, when Rt. Rev. Dr. Aloysius Maria Benziger was the Bishop of Kollam, the Carmelite Missionaries from Belgium resorted at Travancore and concentrated on mission works. Their mission area covered the present dioceses of Kollam, Punalur, Thiruvananthapuram, Neyyatinkara and Kottar which were part of the Diocese of Kollam. In 1930 Kottar diocese came into existence. In 1937 Pope Pius XI by a Decree "IN ORA MALABARICA" established the Trivandrum Latin Diocese by bifurcating the Kollam Diocese. The revenue *Taluks* of Chirayinkeezh, Thiruvananthapuram, Nedumangad and Neyyatinkara were placed under the jurisdiction of Trivandrum diocese. In 1952 the coastal parishes from Pallithura to Erayimmanthura were de-linked from Cochin Diocese and attached to the Diocese of Trivandrum.

Bishops on Service

On formation of Trivandrum Diocese Rt. Rev. Dr. Vincent Dereira, the then Bishop of Kollam was appointed as the

1st Bishop of Trivandrum Diocese. During his tenure the catholic population in the diocese increased to around three Lakhs and in the educational sector there were 63 primary schools, 28 U.P schools, 15 High Schools, 2 Training schools and 3 Colleges.

Rt. Rev. Dr. Peter Bernard Pereira, who followed Bishop Vincent Dereira was the first Bishop from the soil and his tenure was from October 1966 to June 1978. Bishop Pereria lighted the lamp for many social developmental activities in the diocese. One of such is Marianad Community Development Programme. Trivandrum Social Service Society, a registered social service society is a pioneering initiative of Bishop Pereira. The Indian Space Research Organisation at Thumba was made possible because of the visionary intervention of Bishop Pereira. It was during his time that the land base for the future development of Trivandrum diocese was created.

Bishop Peter Bernard Pereira was succeeded by Bishop Jacob Archaruparambil OFM Cap, who was in service from October 1979 to 1990. It was during his period that the historical event of Kottar Living Together took place in the Golden Jubilee year of the diocese which gave new outlook to the diocese as a Participatory Church and the Church as the People of God by inculcating the vision of II Vatican Council.

In the year 1990 Bishop Soosa Pakiam took charge of the diocese. Tremendous achievements both in the spiritual as well as social arenas have been made in the diocese during the past 23 years. Decentralization and participation were the basic principles adopted in every stage of administration in the Local Church.

Bifurcation of the Diocese and Elevation as Archdiocese

In 1996 Trivandrum diocese was bifurcated and a new diocese came into being - Neyyatinkara Diocese. Thus the area of Thiruvananthapuram diocese was reduced to 686 sq. k.m. which encompassed the areas from Ayiroor of Chirayinkeezh Taluk in the north to Erayummanthurai of Vilavancode Taluk of Kanyakumari Dist in the south. A major portion of Trivandrum diocese is located along the coastal belt with six foranes, which extends to about 76 k.m in length. There are two foranes in the interior.

In the year 2004 Pope John Paul II was pleased to elevate Trivandrum diocese as an Archdiocese with Alappuzha, Kollam, Punalur and Neyyatinkara as its suffragent dioceses. Bishop Soosa Pakiam was elevated as the Archbishop of this ecclesiastical region.

Renewal Process in the Diocese

The general observation is that the socio-economic, educational and political situation of the people of our diocese is not very impressive and the available statistics shows that they are far behind many of the other communities in Kerala. Diocese has adopted many strategies over the years to lift the community to the mainstream according to the need of the time. Especially community building that took place after the 'Kottar Living Together' and the structural and functional changes evolved in the diocese have contributed much to its growth.

There are several parishes (80) and sub-stations (43) working as the arms of the Archdiocese to implement, *inter alia*, the socio-economic-pastoral and educational activities with the people. Basic Christian Communities (BCCs) have been formed in all the parishes and sub- stations in order to enhance and sustain the active participation of the people and decentralization of the ministries. Pastoral ministry touches the pastoral and spiritual life of the people through the commissions of Bible, Catechism, Liturgy, Family Apostolate, Evangelization, Ecumenism and Dialogue.

In the educational sector there are 5 Higher Secondary Schools, 2 High Schools, 4 U.P Schools, 17 L.P Schools, 1 CBSC School and one Centre for Excellence, one Engineering College, one Nursing College, one ITC and one B.Ed College under the Archdiocesan management. Other than this there are 19 schools under the direct control of parish managements and 25 schools under the management of the religious and 4 schools under the Trusts of Latin Catholic lay people.

Social action ministry steered by Trivandrum Social Service Society has five departments such as (1) Capacity building, (2) Advocacy, Policy Lobbying and Net-working, (3) Socio-economic development and employment, (4) Health, environment and education and (5) Administration and Research. The activities are carried out through

various community based-organizations (forums) and institutions. There are 6 forums and 11 institutions under Social Action Ministry taking care of various target groups.

Other relevant activities of the Archdiocese are carried out through the Board for Clergy and Religious, Board for Temporalities, Board for Evangelization and Board for Laity. There are other autonomous ministries such as BCC, Youth Ministry, Media and Fisheries.

Conclusion

The present survey is the first of its kind in terms of the preparations undertaken for execution, wide coverage of all Parishes and Foranes of the Archdiocese, inclusion of major socio-economic and pastoral subjects, the systematic conduct and team work and involvement of professional experts in various stages. The task and the results of this program are considered as one of the milestones in the annals of the archdiocese of Trivandrum. If this survey and its finding could be instrumental for various ministries to bring out certain remarkable changes in the growth of the People of God in our local church, that will certainly open up for a new horizon in the path of development and building up of the Kingdom of God.

CHAPTER 1

INTRODUCTION

Context

The Latin Catholic Archdiocese of Trivandrum was established in 1937. Half a century has elapsed under four Prelates. The Golden Jubilee Celebrations offered a good opportunity for reflection on the current status as well as future possibilities of the Diocese. Naturally the importance of developing socio-economic as well as pastoral profiles of the population, parishes, Foranes and the Archdiocese as a whole was keenly felt. After weighing the pros and cons as well as considering the modalities to be adopted, it was decided to do a comprehensive and integrated census survey, covering the entire families and individuals of the Archdiocese.

Goal/Overall Objective of the Survey

The ultimate goal of the Census survey was to ensure that Archdiocesan, Forane and parish level socio-economic and pastoral planning processes are made more specific, measurable, achievable, realistic and time bound (SMART) and based on empirical data.

Specific Objectives

- To collect/generate comprehensive and reliable data bearing on all aspects in the socio-economic and pastoral life of the families and individuals in the Archdiocese
- To prepare and bring out separate reports for each forane and a consolidated report of the entire Archdiocese, containing the findings of the survey.

Data Base

All Latin Catholic families who were members of the Parishes belonging to the Latin Archdiocese of Trivandrum (hereinafter called Archdiocese) consisted of the data base for the survey.

Source of data

The source of data used for this report was the census survey conducted by Trivandrum Social Service Society (TSSS) during the 2011-2012 period.

Geographical Coverage

The survey tried to cover all the Latin Catholic families who were members of 115 Parishes in 8 Foranes in the Archdiocese. The names of Foranes and corresponding number of parishes covered in the survey are given in the table below:

Foranes and number of parishes covered in the survey

Sl. No	Foranes	No of Parishes including sub-stations

Demographical Coverage

The Survey covered 58501 families and 217821 individuals with 112287 males (51.55%) 105534 females (48.45%) in 8 foranes.

Sectoral Coverage

The survey covered several important and relevant sectors and subjects and collected data on families and their members. The following table shows the family-based and individual-based data collected on various areas and subjects.

Data collection process

Having decided on the geographical, demographical, sectoral and subject-wise coverage, a specific interview schedule corresponding to the areas and subjects was framed by the Archdiocesan team as the main tool for collection of data. Keys and supporting notes were made and sufficient copies were printed. Simultaneously, investigators for data collection were identified by the Parishes at the BCC level under the guidance of the Archdiocesan survey team. Subsequently, trainings were conducted to impart necessary knowledge and skills to the enumerators identified for data collection. Under the direct monitoring of the Parish Priests, the enumerators collected data from the families at the BCC unit level in the parishes.

Data collection involved 2050 persons and took 6 months to cover the entire area. During the process, frequent visits and interactions were made by the survey team.

Data processing

The data thus collected in printed schedules were sorted out and minor errors were rectified. The entire data were then entered into a tailor-made SOFT WARE so that the outcome of the survey could be directly accessed by the parish priests to understand the profile and situation of each and every family in the Parish. Subsequently, it was decided to prepare a consolidated survey report which could be of immense support for multi-level planning processes in the Archdiocese for a reasonable period of time.

Accordingly, data entry was completed with the support of a team of technical personnel and a directory of families was released based on it. Finally, the work of tabulation and analysis of data together with the task of report formulation at the Forane and diocesan levels was entrusted with a State level specialized agency, ADHWANA. After tabulation of the entire data at the Forane and diocesan levels, interpretation and analysis of the data were completed. Forane-wise reports were separately prepared for 8 Foranes and an Archdiocesan report was prepared at the end. During this process, series of discussions took place with the Survey Coordination Team.

The Reports

Each report is organized into three chapters. This first chapter deals with context and methodology of the entire process of the census survey. The second chapter presents the data processed in interpretative narration with charts or tables, hinting on the findings and implications of the information. Where ever relevant, sex-wise and age-wise analysis was attempted. In the third chapter, a summary of findings, related conclusions and some recommendations are given. The recommendations are meant to provide a space for more thinking to address the problems reflected in the survey findings. However, it is for the concerned communities to collectively plan appropriate programs to address their issues in a meaningful manner.

In all cases, original tables are given in the Annexure, while charts and summary of some tables are included within the report at appropriate place.

Limitations of the Survey

- Though it was planned to cover the entire families and all the parishes in 8 Foranes in the Archdiocese, the coverage is subject to further verification with other sources of information such as Parish records.
- The usual data collection errors crept into the data to a small extent. The enumerators were mostly raw persons without prior experience in the job.
- Data requirement on a large number of subjects was not fully responded in several sectors and no data was available on those subjects.
- It was also found that some of the data available were not tallying with other related data, may be, due to differences in understanding the questions from the part of the interviewers and respondents.
- Since there were no earlier reliable reports or statistics corresponding to the regions and subjects covered by this survey, the analysis could not be carried out by comparing or contrasting with the past situation.

Scope of the Survey

- In spite of the above limitations, which one has to expect in any such large process, the present survey has brought forth a very high level of qualified and quantified information useful for planning in sectors and localities covered in the survey.
- It brought forth conclusions and recommendations which could be followed up by the Archdiocese in the near future through its various Ministries and Commissions.
- It provides reasonable insights for other dioceses to take up similar processes for planning.
- The tables annexed to this report at the end will help individual parishes to find their situation and plan their programs accordingly.

Palayam Forane

This volume is the Forane level Report of the Palayam Forane. Palayam Forane consists of 19 Parishes. All the sectors and subjects mentioned above were covered in the survey. In the next chapter, the data on Palayam Forane is presented with charts and tables at appropriate places.

Chapter 2

PRESENTATION OF DATA

Introduction

In this chapter, the data collected from 19 parishes of Palayam Forane are presented in a processed format and their nuances are narrated with the support of corresponding charts/tables in the order of subjects as organized for data collection. There are two sections in this chapter. The first section presents the data on family-related subjects while the second section provides for data on individual members of the respondent families.

Parishes and Families

There are 3608 families in 19 parishes in Palayam forane. This is 5.81% of families in the Archidiocese. All the parishes in the forane are comparatively smaller except Palayam parish in terms of number of families. Palayam is the biggest parish in the forane with 1159 families, followed by Vellayambalam (372), Nanthancode (213), Thycaud (210) and Poozhikkunnu (209). There are seven parishes with families between 100 and 200, while there are seven other parishes with families below 100. Most of the parishes are located within the Trivandrum Municipal Corporation area. Family size in the forane is 3.50%.

Parishes and Families

House Ownership

Out of a total of 3608 families in the Palayam Forane, covering 19 parishes, the vast majority (69.37%) have own houses. They are followed by those which have rented (14.80%) and are homeless (10.73%). No data are available in the case of a few (5.10%). (**Table No.1**)

Chart No.1: House Ownership

Glancing across the parishes, we notice that Nettayam with 77.57% tops the list of those having own house, followed by Christurajapuram (77.53%) and Kodappanakunnu (76.25%). Killippalam with 58.33% records the lowest rate, followed by Thycaud (61.43%) and Vellayambalam (62.90%). Thrikannapuram tops the list of those having no house (20.24%), followed by Kachani (19.57%) and Kanajirampara (17.39%).

The homeless means people not having own house, but living with relatives. Data show that homelessness is a big problem in the Forane. That there are several families without own house is a matter for concern.

Type and Quality of House

Exactly half of the houses (46.56%) have concrete roofs, while very few houses are huts (0.64%) or thatched (1.33%). Some (9.01%) have sheet roof and a larger section (13.17%) have tiled roof. Some (12.08%) are multistoried structures. A few families (3.46%) live in flats in the Forane. (**Table No.2**)

Chart No.2 : Type and Quality of House

Across the parishes Thycaud (66.57%) tops the list of houses with concrete roof, followed by Kulasekharam (58.23%) and Christurajapuram (57.30%). As for multistoried buildings, Kuravankonam (38.85%) ranks first, followed by Kanajirampara (25%) and Killippalam (21.30%).

No. of Rooms

The majority of houses (57.54%) have one to four rooms, while a substantial proportion (24.70%) has more than 4 rooms. This categorization does not apply to a large number of houses (11.86%), while data are not available for the rest (5.90%). (**Table No.3**)

Chart No.3 : No. of Rooms

Among the parishes, Manacaud (50.47%) tops the list of those having more than 4 rooms, followed by Kuravanakonam (46.5%) and Punnakamughal (44.19%). In this matter Kulasekharam (7.59%) is in the last place, followed by Christurajapuram (14.51%) and Peroorkada (19.58%). Among houses with 1-4 rooms Kulasekharam (77.22%) occupies the first rank, followed by Christurajapuram (69.66%) and Mudavanmughal (68.75%).

No. of Families in the Household

The majority of the households (68.79%) have only one family, those with two families constituting 14.50% and those with 3 families a small fraction of 3.35%. Only marginal 0.64% households have more than 3 families. (**Table No.4**)

Chart No.4 : No. of Families in the Household

Across the parishes we see that Kuravankonam (84.62%) tops the list of those with just one family, followed by Poozhikunnu (80.38%) and Punnakkamughal (74.42%). Punnakkamughal (23.81%) stands first in the matter of having two families, followed by Manacaud (19.63%) and Nettayam (18.69%). Mudvanmughal (7.29%) stands first among houses accommodating 3 families, followed by Nanthancode (7.94%) and Kuravankonam (5.77%). Mudvanmughal (2.08%) has the largest number of houses shared by more than 3 families. It is followed by Kulasekharam (1.27%) and Nanthancode (0.94%).

Members in the Households

More than half of the households (65.72%) have 1-4 members, while a sizable proportion (20.43%) has 5-8 members. Only a marginal few (1.47%) have more than 8 members. (**Table No.5**)

Chart No.5 : Members in the Households

Among the parishes, Kuravankonam (82.69%) ranks first in the matter of having fewest members (1-4), followed by Poozhikunnu (75.12%) and Kachani (73.91%). As regards houses with 5-8 members, Mancaud (30.84%) occupies the first place, followed by Nanthancode (28.17%) and Thycaud (25.71%).

Land Ownership

Most of the houses (74.61%) are built in own land, while a large number of people (17.35%) are landless. A few (1.77%) are on tenancy; some (1.52%) in 'otti' land, a few (0.50%) in 'puramboke' land and a marginal few (0.28%) in church land. (**Table No.6**)

Chart No.6 : Land Ownership

Looking across the parishes, we see that Poozhikunnu (91.31%) leads the list of those who have own land, followed by Mudavanmughal and Thrikannapuram (83.33% each) and Katchani (82.61%). With regard to tenancy, Nanthancode (4.23%) holds the first rank, followed by Kuravankonam (3.85%) and Mudavanmughal (3.31%). In the matter of house on puromboke land, Kuravanakonam (1.92%) is in the first place, followed by Nanthancode (1.88%) and Manacaud (1.87). There are only two parishes where houses are on church land: Kulasekharam (1.27%) and Palayam (0.78%). In respect of otti land, Kanjurappara is in the first place (5.43%), followed by Killippalam (3.70%) and Palayam (2.07%). Thycaud (31.90%) leads in the matter of landlessness, followed by Killippalam (31.48%) and Manacaud (26.17%).

Area-wise Distribution of Land

Data reveal that nearly half (44.29%) are nominal holders with land ranging between 1 to 5 cents. A large proportion (20.15%) has land in the range of 5-10 cents, while a few (5.52%) are in the 10-15 cents category. Those who possess more than 16 cents account for 5.82%. (**Table No.7**)

Chart No.7 : Area-wise Distribution of Land

Palayam (55.39%) dominates the nominal holders of 1-5 cents, followed by Kulasekharam (53.16%) and Thycaud (50.95%). In the matter of 5-10 cents, Peroorkada (34.39%) tops, followed by Punnaikamughal (30.23%) and Manacaud (26.17%). Katchani (17.39%) leads the list of the 10-15 cent holders, followed by Thrikkannapuram (11.48%) and Kanjirappara (10.87%). Thrikkannapuram (25.60%) is in the first place in the matter of holding more than 16 cents, followed by Mudavanmughal (20.18%) and Christurajapuram (10.11%).

Sex-wise Distribution of Land

There is a marked male domination with regard to land ownership, males recording 40.11% as against the 19.79 of females. Many title deeds (14.11%) are in the name of both man and woman. (**Table No.8**)

Chart No.8 : Sex-wise Distribution of Land

Poozhikunnu (50.72%) dominates in the matter of male ownership, followed by Peroorkada (44.44%) and Kulasekharam (43.04%). In the matter of female ownership, leadership rests with Punnaikamughal (27.91%), followed by Malamughal (25.69%) and Kuravankonam (25%). In regard to joint ownership, it is again Punnaikamughal (25.58%) that leads, followed by Poozhikunnu (23.44%) and Christurajapuram (20.22%).

Cooking Fuel Used

Data reveal that the majority (73.39%) is using LPG for cooking fuel. A large section (40.52%) still is in the habit of depending on ordinary, firewood-based stoves. An almost equal number (40.33%) use electrical stoves, also. A few families use smokeless stove (2.69%). A marginal few (1.16%) use bio-gas, while a smaller section (0.39%) uses solar power. (**Table No.9**)

Chart No.9 : Cooking Fuel Used

Glancing across the parishes, one notices that Palayam tops in the matter of the use of smokeless chulas, followed by Poozhikunnu (16.49%) and Malamughal (7.22%). In respect of ordinary stoves, again Palayam (32.49%) leads, followed by Poozhikunnu (11.08%) and Malamughal (7.22%). In the matter of bio-gas, it is the privilege of Poozhikunnu (33.33%) to lead, followed by Palayam (26.19%) and Peroorkada (9.52%). Nettayam (35.71%) ranks first as regards the use of solar power, followed by Palayam (21.43%) and Poozhikunnu (14.29%). With regard to the use electricity, it is the turn of Palayam (12.92%) again to lead followed by Poozhikunnu (12.03%) and Thrikannapuram (10.31%).

In this advanced age group B.P., asthma, T.B., HIV/STD, malaria, filariasis, skin disorders, thyroid problems, bone disorders, varicose veins, rheumatism, allergy and psychic disorders are predominant among females.

A learning that emerges is that consistently the females are more prone to certain health problems. This trend

grows with age. This is pointing to the need for special attention in these areas. One probable reason for this is that females are given less attention in the matter of food and medical care. Another may be the difference in body chemistry.

Bad Habits

The vast majority (89.66%) are not under the influence of any bad habit. Drinking (2.15%) occupies the first place, followed by smoking (1.60%), betel chewing (0.36%), panmasala chewing (0.24%) and drug addiction (0.02%). (**Table No.46**)

Sex-wise distribution of participation in Holy Mass in the 5-18 age group

Chart No. 49a : Sex-wise distribution of participation in Holy Mass in the 5-18 age group

The majority (62.87%) are in the habit of weekly Mass attendance, females (31.99%) leading over against males (30.88%). Several (11.80%) attend 2-3 days a week, again females (5.99%) having a slight lead over males (5.82%). A few (4.62%) are in the habit of daily attendance, males (3.04%) having an unusual lead over females (1.58%). A marginal few (1.37%) attend Mass only once a year, females (0.73%) having an edge over males (0.64%), while a higher percentage (1.63%) never go to Mass, females (0.94%) leading the group against males (0.68%). (**Table No.49a**)

Sex-wise distribution of participation in Holy Mass in the 19-60 age group

The majority in this age group too (60.51%) are in the habit of weekly Mass attendance, with an edge for females (30.61%) over males (29.90%). Several (10.18%) attend 2-3 days a week, again females (6.23%) having a slight lead over males (3.95%). Quite a few (5.54%) are in the habit of daily attendance, females (3.23%) having a lead over males (2.31%). Some (4.14%) attend Mass only once a year, males (3.00%) having an edge over females (1.14%), while a higher percentage (1.14%) never go to Mass, males (1.14%) leading the group against females (1.14%). (**Table No.49b**)

Chart No.49b : Sex-wise distribution of participation in Holy Mass in the 19-60 age group

Females, as is to be expected, are more fervent in the matter of attending Holy Mass.

Sex-wise distribution of participation in Holy Mass in the age group above 60 years

Almost half in the age group (49.32%) attend Mass on a weekly basis, males (25.34%) having an edge over females (23.98%). Some (12.30%) attend Mass 2-3 days a week, males (6.24%) again having a lead over females (6.06%). There are several (11.43%) who go to Mass on a daily basis, females (6.06%) leading against males (5.38%). Some (4.51%) attend Mass only once a year, females (2.53%) having an edge over males (1.98%), while a higher percentage (7.73%) never go to Mass, females (4.20%) leading the group against males (3.52%). (Table No.49c)

Chart No.49c : Sex-wise distribution of participation in Holy Mass in the age group above 60 years

It is to be assumed that in this group of old people, females are too weak to attend Mass as they would like.

Participation in Catechism Classes

For the majority (60.53%) this is not applicable, males (30.49%) dominating over females (30.14%). Many (14.38%) are regular in attending catechism classes, the lead being for females (7.58%) over against males (6.79%). A few (1.22%) attend occasionally, males (0.68%) leading the group against females (0.55%). A higher percentage (3.33%) never attend, males (1.79%) having a slight lead over females (1.54%).(Table No.50)

Chart No.50 : Participation in Catechism Classes

Sex-wise distribution in the participation in catechism classes in the 5-15 age group

Most of the children in this age group (62.64%) are regular in attending catechism classes, females (31.37%) having a slight edge over males (31.26%). While some (3.30%) attend occasionally, males (1.98%) having an edge over females (1.32%), a higher percentage (1.32%) never attend, males (3.13%) leading over against females (2.58%).

Chart No.50b : Sex-wise distribution in the participation in catechism classes in the 16-25 age group

For the majority in this group (49.54%) this is not applicable, equally for males and females. A large section (22.07%) regularly attend, females (12.18%) having an edge over males (9.89%). A few (2.09%) occasionally attend, males (1.22%) leading as against females (0.87%). Several (7.85%) never go for catechism, males (4.43%) leading against females (3.41%). (**Table No.50b**)

Participation in Confession

The largest section (35.92%) is those who make confession occasionally. They are followed by those who make confession only yearly (20.44%). While many (10.29%) make monthly confessions, some (5.39%) altogether abstain from confession. (**Table No.51**)

Chart No.51 : Participation in Confession

Sex-wise Participation in Confessions in the 10-18 age group

The largest section (37.11%) is formed by those who make confession occasionally, females having an edge (18.99%) over males (18.12%). Many (18.49%) make confession monthly, females (9.71%) leading as against males (8.78%). Quite a few (8.78%) are in the habit of making confession once a year, males (7.11%) leading in this against females (6.43%). A marginal few (1.48%) never make confession, males (0.93%) having an edge over females (0.56%). (**Table No.51a**)

Chart No.51a : Sex-wise Participation in Confessions in the 10-18 age group

Females are, on expected lines, more fervent in regard to making confession.

Sex-wise Participation in Confessions in the 19-60 Age Group

Those who make confession occasionally dominate (39.96%), females (21.44%) taking the lead over males (18.53%). While some (9.74%) make confession once a month, females (5.76%) taking the lead over against males (3.98%), a larger section (24.38%) make confession only annually, males (12.95%) leading against females (11.43%). There are many (6.19%) who never make confession, males (4.14%) having a clear lead as against females (2.05%). (**Table No.51b**)

Chart No.52b : Sex-wise Participation in Confessions in the 19-60 Age Group

The pattern of female dominance in this matter continues in this age group as well.

Sex-wise Participation in Confessions in the age group above 60 years

Chart No.52c : Sex-wise Participation in Confessions in the age group above 60 years

Many (40.42%) are in the habit of making occasional confession, females (20.77%) taking the lead as against males (19.65%). While some (10.51%) make confession once a month, females (6.30%) taking the lead over against males (4.20%), a larger section (22.37%) make confessions only annually, males (12.11%) having an edge over females (10.26%). There are some (7.42%) who never make confession, males (4.39%) having a clear lead as against females (3.03%). (**Table No.51c**)

Females continue to maintain their lead in the matter of making confession.

In the next chapter, a list of findings together with some suggestions for action is given.

CHAPTER 3

CONCLUSIONS AND RECOMMENDATIONS

Finally, having analyzed the data available, it is time to arrive at some conclusions and recommend a future course of action. In fact it is for the concerned regions and its parishes to think about making use of this information and plan activities and programs accordingly. The following suggestions may be taken only as a guide to think differently and innovatively to address the problems that have come to the limelight at the end of this exercise.

- A significant proportion of the people are homeless. This is a matter of concern. Homelessness needs to be addressed on a priority basis. Those who live in huts, sheet-roofed houses and thatched houses may be considered as homeless since these are generally not livable on a long term.
- Most of the houses are small ones, but may be comfortable with concrete or tiled facilities. They presumably belong to the lower middle class, when other indicators of economic status are considered.
- In many cases more than one family is accommodated in one building. This is related to homelessness and stems from poverty. In many cases, more than 8 persons live in a single household. This problem should be addressed through tackling poverty.
- Landlessness is also rather pronounced in the Forane. Nearly half (44.29%) of the families who have land of their own are nominal holders with land ranging between 1 to 5 cents. There is a marked male domination with regard to land ownership. This also deserves the priority attention of the authorities.
- Landlessness and homelessness are rooted in the same problem of poverty. Ordinary and temporary solutions may not be sufficient to address these problems. Long term and sustainable strategies need to be developed in collaboration with other stakeholders such as local, state and central governments and corporate business houses.
- A large section is using ordinary stoves, which smoke and lead to environmental pollution as well as health problems. Efforts should be made to educate the people to use more environment-friendly and healthy as well as women-friendly stoves and cooking fuels.
- A few families apparently have no home appliances, indicating low economic status. Initiatives for improving the economic condition of the people, though a smaller section in this forane should be taken up.
- A large section has no vehicles at all, another indicator of low income and savings.
- While most of the people have TV, Mobile, Daily news papers and land phones, a smaller section of people subscribes church publications. Effective campaign may bring in some positive results in this regard.
- A large majority of people does not have any of the listed work equipments, indicating low economic assets and base for growth. This is the case with trade and commerce, farming and livestock.

- People in the region spend more for food than for education. They spend moderately on medical care. Most of the families spend more on other items. Awareness programs and training on family budgeting may be a good guide to many to plan their income.
- Majority has debts of smaller volumes. Thrift and credit promotion programs may attend to this problem.
- Though a vast majority has ration cards, quite a number of families do not have this important entitlement. Special campaigns may help to motivate people to secure it.
- Majority is not covered by the medical insurance, which is one of the cheapest and useful social security measures. It is very often a matter of going for it, rather than of financial incapability.
- Since only a few families do not have sanitary latrines, it is easier for planning to include all of them in a single program which could be supported by a few rich ones in the region.
- Though most of the families have their own and public source of water, there are a few ones who lack it. They need to be helped by others through effective projects.
- A significant chunk (20.81%) do not use any methods for waste disposal, indicating that they throw them away in the open air creating problems to others and environment. Effective control measures shall be taken to prevent families from dumping their wastes in the open.
- Though a vast majority of families manage their solid waste in a proper manner, there are a few families throwing waste into water bodies. This trend needs to be blocked by means of awareness programs and motivation through all available platforms.
- Most of the families provide study facilities to their children, through a few do not take proper care in this regard. Most of the parents pay attention to the education of their children. Community support to the poor families for education of their children is low.
- Though most of the families do have POC Bible, there are a few families who do not have. If they are so poor, it is easily possible to provide a copy to each of them with the support of others.
- Families of the forane have regular family prayer. Only a few families are negligent on this matter. They could be guided properly to start family prayer.
- There are many families who do not participate in BCC meetings regularly. They may be led to understand the importance of joining and participating in BCC meetings and activities.
- The vast majority are unemployed. While the figures may not be very accurate, the issue of unemployment is a fact and should be urgently addressed.
- The majority of households are indebted, many having substantial debts.
- The majority are APL card holders, implying that many deserving households do not get their rightful ration support. Action must be initiated to remedy this situation.
- Also, many are not covered under any health insurance. Immediate action needs to be taken to bring all under some sort of health insurance.
- A few households depend on open spaces for their toilet purposes. This social evil should be rooted out at the earliest.

- Several households do not use any scientific methods of waste disposal and some have the unhealthy habit of throwing their waste into water bodies. This is a very serious crime and people should be educated against it.
- It is alarming that sex ratio is declining in some parishes in the Forane. Urgent action is called for to rectify this anomaly.
- There is a lack of soft skill development, reflected in the low percentage of IT professionals. IT is a growing employment sector and all out efforts should be made to provide IT training to the young generation.
- Prevalence of life style diseases such as B.P. and diabetes is matter for concern. An integrated health care program is called for. The presence of leprosy and filariasis should also cause concern.
- Low health status of women is another matter of serious concern.
- Though the majority is regular in Mass attendance and confession, some are staying away from these practices, which are central to Christian living. Appropriate pastoral remedial action is called for.
